Jackson Mill - CE-137

Jackson Mill is a 2 story frame grist mill building resting upon a stone foundation. It is 3 bays long and three bays deep with a leanto frame wing on the west side of the building. Most of the old sash have been broken out and some of the red clapboards are falling from the framing. From the road it appears to be of Mid-19th Century date. It is adjacent to the Principio Creek and down hill from the J. & A.R. Brickley house. Two other small, stone foundation, frame houses lie on the opposite side of the creek.

Poor Condition

MMB - 4/9/70
