HERITAGE2031
MARYLAND’S STATEWIDE PRESERVATION PLAN
Maryland Historical Trust Authors and Contributors

Lead author: Nell Ziehl, Chief, Office of Planning, Education and Outreach
Graphic design and research: Brenna Spray, Outreach Coordinator

Additional contributors: Marcia Miller, Chief, Office of Research, Survey & Registration | Jen Chadwick-Moore, Historic Preservation Information System Specialist | Jessica French, National Register Administrator | Grace Davenport, National Register Assistant | Lara Westwood, Librarian

With special thanks for content and images provided by Baltimore Heritage (p. 33), Willie Graham (bottom left cover, p. 104), Annapolis Maritime Museum/Jay Fleming (p. 2), Michael Dowling (below), the National Park Service (p. 21, 78), Visit Frederick (p. 130), and the Library of Congress (p. 31, 67). Unless otherwise indicated, all photos are either open source or provided by the Maryland Department of Planning, the Maryland Historical Trust, and Jefferson Patterson Park & Museum.

Many Thanks to Our Partners & Hosts

Archeological Society of Maryland | Calvert Library | Department of Housing and Community Development | Dorchester County Public Library | Elizabeth Mekonnen | Frederick County Visitors Center | Havre de Grace Arts Collective | Maryland Association of Historic District Commissions | Maryland Center for History and Culture | Maryland Commission on African American History and Culture | Maryland Humanities | Maryland Museums Association | National Park Service - Chesapeake Bay Office | Plan B | Preservation Maryland | Washington County Free Library

And to those who participated in the survey, forums, and interviews; advertised opportunities for participation; provided comments; and reviewed draft language and illustrations.

Acknowledgements

The production of this statewide historic preservation plan has been financed in part with federal funds from the National Park Service (NPS), U.S. Department of the Interior (DOI). However, the contents and opinions do not necessarily reflect the views or policies of DOI, nor does the mention of trade names or commercial products constitute endorsement or recommendation by DOI.

The Statewide Preservation Plan

The Maryland Historical Trust (MHT), a division of the Maryland Department of Planning (MDP) is the state agency dedicated to preserving and interpreting the legacy of Maryland's past. Governed by a 15-member Board of Trustees, MHT offers an array of state and federal programs that support historic preservation, archaeology, and cultural heritage protection and interpretation. MHT has administrative headquarters in Crownsville and operates Jefferson Patterson Park and Museum (JPPM) in Calvert County, which in turn houses the Maryland Archaeological Conservation Laboratory (MAC Lab).

As Maryland’s State Historic Preservation Office (SHPO), MHT is mandated to “prepare and implement a comprehensive statewide historic preservation plan,” pursuant to Section 101(b)(3)(c) of the National Historic Preservation Act, as amended. Regulations require a plan “that provides guidance for effective decision making about historic property preservation throughout the state.” In this way, the plan serves the broader preservation community, not just MHT. In addition to historic preservation, which typically refers to architecture, the plan includes archaeology and cultural heritage more broadly.

In recent years, MHT has updated the statewide preservation plan at five-year intervals. However, in soliciting feedback for the last iteration of the statewide plan, it became clear that the goals identified remained relevant for a much longer period. For this reason, the last plan update was presented as a sequel to the previous one (PreserveMaryland and PreserveMaryland II, respectively) and retained the same goals. For the current planning process, MHT made the decision to extend the timeframe to eight years (2024-2031), with a midterm update in 2028. Rather than repeat the full public engagement of a typical planning cycle at the midterm, MHT will work with partner agencies and organizations to update the objectives and strategies within the goals identified in Heritage2031 and reissue the plan.

Once the plan is completed, NPS reviews the final document to ensure that it:

- includes significant and meaningful public participation;
- identifies significant issues affecting historic resources; and
- proposes realistic solutions and sets priorities for preservation action.

The final plan is approved by the MHT Board of Trustees prior to public release. Although the plan is intended to serve as a roadmap for the broader preservation community, and MHT encourages participation in the implementation, there is no mandate or requirement for individuals or organizations to adhere to the plan. MHT will use the plan to inform its agency’s work over the next eight years and report annually to NPS on its progress.
**Partners & Process**

*Heritage2031* is the result of collaborative work among many partners engaged in historic preservation, archaeology, and cultural heritage, including Preservation Maryland (PM), the Maryland Commission on African American History and Culture (MCAAHC), the Archeological Society of Maryland (ASM), the Council for Maryland Archeology, the Maryland Association of Historic District Commissions (MAHDC), the Maryland Heritage Areas Coalition, the Maryland Museums Association (MMA), Maryland Humanities, the Maryland Center for History and Culture (MCHC), and the NPS Chesapeake Bay Office. MHT Trustee Samuel J. Parker, Jr. served as the chair of the planning process. These partners gave feedback on planning strategies, helped develop questions for public input, advertised public meetings and surveys, co-hosted focus groups, facilitated discussions, and helped bring their constituents to the table. (For more information on the key agencies and organizations involved in the planning effort, see the directory in Appendix III.)

It is important to note that MHT is not the only agency responsible for Maryland’s historic and cultural properties. State agencies that participated in the planning process include the Maryland Department of Natural Resources (DNR), which oversees state parks and intersects with MHT’s work on climate planning and adaptation; the Maryland Department of Transportation (MDOT) and the State Highway Administration (MDOT SHA), which operates the Maryland Scenic Byways program and the Historic Markers program and conducts archaeology throughout the state; the Maryland Department of Housing and Community Development (DHCD), which houses the Maryland Main Street program and financial incentive programs including Community Legacy grants, which often support preservation and rehabilitation; and the Maryland Department of General Services, which maintains historic properties in state ownership. MHT staffs the inter-agency Maryland Heritage Areas Authority (MHAA) and the African American Heritage Preservation Program (AAHPP), a joint program of MHT and MCAAHC, which provide substantial financial support to historic preservation and cultural heritage efforts throughout the state. MHT’s participation in the Adaptation and Resiliency Working Group of the Maryland Commission on Climate Change and the Smart Growth Coordinating Committee of the Smart Growth Subcabinet allows *Heritage2031* to be integrated into those interagency efforts as well.

In preparation for *Heritage2031*, MHT reviewed relevant strategic plans from partner organizations, as well as planning documents from agencies that intersect with historic and cultural resources. Where appropriate, these programs and entities are referenced in the plan’s strategies. MHAA and JPPM are embarking on strategic planning processes that will use this document to inform their future efforts and ensure consistency.
MHT received feedback from participants around the state, including (but not limited to) representatives of state agencies and local governments, public officials, community advocates, consultants, developers, historic preservation commissioners and planners, stewards of historic properties and cultural sites, members of indigenous communities and state-recognized tribes, and nonprofit staff and volunteers. Opportunities for public participation included:

- Regional public meetings in Hagerstown, Havre de Grace, Owings, Baltimore City, Frederick, and Cambridge (approximately 75 attendees)
- Regional in-person meetings in Hagerstown and Columbia on African American heritage, co-sponsored with MCAAHC (approximately 20 attendees)
  A virtual town hall meeting (approximately 30 attendees)
- Virtual focus groups organized by topic and profession (approximately 240 attendees)
  - Preservation Planners (with MAHDC)
  - Culture, Climate, and Resiliency
  - Documenting Underrepresented Communities (with NPS Chesapeake Bay Office and Maryland Humanities)
  - Archaeologists (with ASM)
  - Architects and Developers Roundtable (with Ann Powell, PlanB and Vice Chair, PM)
  - Maryland Inventory of Historic Properties (MIHP) / National Register of Historic Places (National Register) Priorities and Issues
  - Museums and Cultural Institutions (with MMA and MCHC, two focus groups)
  - AAHPP Priorities (with MCAAHC, two focus groups)
- A general survey open April to August 2023 (398 responses)
- Targeted surveys to constituent groups (81 responses)
  - General public survey: pushed out through social media, email distribution, public meetings, Maryland Association of Counties conference
  - Archaeology survey: distributed via Discovering Archaeology Day at JPPM, Council for Maryland Archaeology, Maryland Advisory Committee on Archaeology, ASM, people who have self-selected for MHT's archaeological email distribution list
  - Student survey: developed with University of Maryland (UMD) graduate student Elizabeth Mekonnen, outreach to preservation-related disciplines at the UMD, Goucher College, Morgan State University, University of Maryland Baltimore County (UMBC)
  - Cultural/historical institutions survey: developed and circulated in partnership with MMA and MCHC
  - MDP regional planners survey: combined with meeting to solicit feedback on overall planning issues by region related to preservation
For the general survey, the questions were:

- What aspects of cultural heritage are most important to you?
- What do you think is most critical to protect the heritage that matters to you?
- What do you feel is the largest obstacle facing historic preservation, archeology, and/or cultural heritage preservation?
- What do you feel is the most important benefit of historic preservation, archeology and/or cultural heritage preservation?
- What do you feel can be done to improve the practice of historic preservation, archaeology and/or cultural heritage preservation in Maryland?

The targeted surveys were structured similarly, with customization based on topic or audience.

The public regional meetings were also structured around a set of open-ended questions, although all feedback was welcome and recorded. The questions were:

- What are your top goals for historic preservation, archeology and/or cultural heritage in your region?
- What are some of the key obstacles or threats to historic properties, archeological sites and/ or cultural heritage in your region?
- Are there property types or local histories (historic contexts) that are particularly threatened or under-documented in your region?
- What can MHT, other agencies or partner organizations do to better support your preservation efforts?
- Is there anything more that you'd like to share with us today?

All public engagement opportunities were advertised by email (more than 17,000 recipients), social media (more than 7,600 followers) and plan partner organizations (reach unknown). Prior to finalization, Heritage2031’s summary of public feedback and the draft goals and objectives were posted online for 30 days of public comment. MHT staff also followed up directly with relevant state agencies to ensure that they had an opportunity to review the plan and affirm its alignment with agency goals. In response to the draft, MHT received dozens of comments through MarkUp, an online application that allowed for collaborative feedback, as well as a Google Form set up for this purpose. Staff also directly solicited input on the draft from the MHT Board and project partners, including PM, MCAAHCh, DNR, DHCD, Maryland State Archives (MSA), MMA, the Maryland Coalition of Heritage Areas, and the Maryland Commission on Indian Affairs (MCIA). Feedback on the public draft was very positive and, in response to comments, we have added strategies and clarifying language to finalize these portions of the plan.
Planning Timeline

**December 2022 to March 2023**
- Internal meetings, background reading to prepare for plan launch
- One-on-one stakeholder interviews, primarily representing state agency partners

**February 2023**
- Create plan web page, hold key partner meetings

**March 2023**
- Develop and distribute targeted and general surveys
- Virtual focus groups by topic
- Regional public meetings

**May 2023 to October 2023**
- Virtual focus groups by topic
- Regional public meetings

**July and August 2023**
- Regional public meetings

**November and December 2023**
- Internal meetings, partner meetings to identify draft goals/objectives/strategies
- Draft plan posted for comment

**December 2023 to January 2024**
- Internal meetings, partner meetings to identify draft goals/objectives/strategies

**March 2024**
- Final approval by MHT Board and NPS
Public Outreach: Summary of Feedback & Issues Raised

Through surveys, public meetings, and focus groups, members of the public provided more than 2,200 comments for the 2024-2031 planning process. MHT staff individually coded and analyzed all comments received to help identify broad themes and issues, presented below.

Changes from PreserveMaryland to Heritage2031

In one public meeting, a participant suggested that we could just continue to use the same set of goals from the PreserveMaryland plans (2014-2023), given how broad they are and that so much feedback could be categorized within those umbrellas. While the general observation is true, the nature and type of feedback we received indicated that circumstances were markedly different than in the previous planning processes. Many of PreserveMaryland II’s objectives had been accomplished or seen substantial progress; however, many of the recommended actions to improve networking and collaboration (Goals 4 and 5) were disrupted by the pandemic. Public meetings in 2023 showed a fragmented community, substantial staff turnover at the local and state levels, diminished volunteer capacity, and a lack of information about resources available. For these reasons, Heritage2031 includes more information intended to help orient people to existing resources and networks, in addition to recommended strategies to address these needs.

Public participation also differed in significant ways – for example, fewer people participated in in-person meetings, but more people participated in surveys and virtual offerings. We also received less feedback about regional needs and challenges – likely due to these changes in modes of participation – than in the PreserveMaryland planning efforts. As a result, we did not have enough feedback to inform separate sets of regional objectives as in previous plans and have instead focused on statewide recommendations. As in previous years, however, entities operating on a local and/or regional level are encouraged to use these goals and objectives to guide their activities as well.
Importance of Preservation in Revitalization, Identity, & Quality of Life

Overwhelmingly, from the general public, we heard that historic preservation, archaeology, and cultural heritage play important and underappreciated roles in understanding Maryland communities and their histories. Participants in the general survey, for example, prioritized the most important benefit(s) of cultural heritage as “helps us connect with our history” and “helps us tell our story to future generations,” with 65% of respondents ranking each of these choices as a “5” (see graph below). Related feedback included a widespread concern about lack of history/related instruction in schools and a need for educational and interpretive programs to engage youth.

Notably, the focus on community identity and learning from the past seem to have often connected to current cultural concerns including racial justice, challenging and changing historical narratives, diversifying perspectives within history to include marginalized peoples, and an appreciation of the role that history plays in helping us understand the present. We believe this context offers an important opportunity for people involved in heritage preservation and interpretation to make meaningful contributions to these local, state, and national conversations; indeed, many organizations and entities have already stepped up to do so. While we received a range of comments, overwhelmingly participants favored a focus on justice, equity, access, and inclusion to help Marylanders better understand their own histories and engage together for future progress.
Practitioners working within preservation and related fields were more likely to identify the importance of preservation and cultural heritage in economic revitalization and quality of life. They also shared a widespread concern about a lack of advocates for historic preservation (on the state and local levels), a lack of common messaging points, and insufficient data to persuade decision-makers about these benefits. Respondents of all types noted a widespread perceived loss of cultural resources due to development pressure and neglect, and several noted heritage tourism and interpretive programming, using place-based approaches, as important ways to meet educational and economic revitalization goals.

Changing Practice and Needs of Historic Preservation

Through all avenues for public input, participants noted the high – and rising – costs of historic preservation, coupled with the challenges of finding appropriate tradespeople and contractors and (to a lesser extent) materials. Incentive programs can be difficult to access, and many participants noted that current federal, state, and local incentives are not sufficient to subsidize the cost of preservation relative to new construction. While participants widely understood the value and benefits of rehabilitating and restoring historic properties, property stewards and developers, in particular, voiced concerns about strict interpretations of the Secretary of the Interior’s Standards for Rehabilitation – the federal standards for what constitutes the appropriate treatment of historic properties – for local regulatory purposes and incentive programs at all levels. (Some practitioners felt that the interpretation of the Standards, in response to this kind of pushback, have already become too watered down; these comments were, however, in the minority.) Several participants commented that historic preservation should help meet skyrocketing needs for affordable housing or, at the very least, not hinder efforts.

There is an ongoing concern about a lack of diversity among practitioners, along with calls – including from current students – for more engagement, like paid internships, for young people who may be interested in pursuing historic preservation and related fields professionally. One commenter noted referenced The Relevancy Guidebook, a new publication from Landmarks Illinois, which examines historical preservation’s current challenges from a nonprofit perspective. Several participants flagged concerns about professional qualifications in the practice, which can severely impact who can participate in cultural heritage fields and carry out grant-funded activities. (NPS has indicated that the Secretary of the Interior’s Professional Qualifications Standards are outdated and revisions are planned, but they remain the professional standards for historians, architectural historians, archaeologists, architects, and experts in historic architecture.)

As noted in previous plans, Maryland’s cultural resources data can be outdated and has significant gaps, especially related to marginalized and underrepresented communities and more recent historic buildings. (Properties built in 1973 now meet the 50-year threshold for consideration as potentially “historic.”) It is
also expensive for individuals and local governments to participate in traditional architectural documentation programs, including the MiHP, maintained by MHT, and the National Register, maintained by NPS. Participants expressed an urgent and ongoing need for state and local agencies to invest in data collection, make systems easier to use, and share data related to cultural resources. Without access to good data, it is difficult to make good planning decisions, and more historic and cultural sites will be lost. Many participants also expressed an interest in using different kinds of data – for example, oral histories – to capture the experiences and histories of marginalized and underrepresented communities. Some expressed a desire to document and protect places of cultural significance that do not meet the criteria for the National Register and noted that there is no easy way to do this, at least within traditional documentation and preservation programs.

In many ways, this feedback received during the planning process mirrors national conversations about historic preservation standards, policies, and programs. For example, the documentation discussions dovetail with a recent report released by the National Conference of State Historic Preservation Officers (NCSHPO) that examines how we recognize our historic places, with particular attention to the National Register. Many local historic preservation commissions (HPCs) allow greater flexibility in alterations than state and federal incentive programs; this can help meet local community needs but also creates confusion for developers and property owners. NPS has responded in part by recently issuing new guidance about the use of substitute materials on historic properties. The federal Advisory Council on Historic Preservation issued a recent policy statement on climate change and historic and cultural properties and released new draft guidance on affordable housing and historic preservation, both of which promote expanded guidance and flexibility in federal preservation standards to meet goals in these areas. Conversations about these preservation policy issues are continuing to evolve.

Federal and state agencies also acknowledge that outdated systems can create barriers to use and access. Over the course of the last statewide preservation plan, both NPS and MHT have introduced online submissions for tax credit programs, MHT has created a digital process for project review submissions called “e106,” and NPS has introduced electronic National Register submissions. Over the course of the last statewide preservation plan, both NPS and MHT have introduced online submissions for tax credit programs, and NPS has introduced electronic National Register submissions. Through the NCSHPO, MHT is participating in these broader conversations, and we expect that policy changes will continue to be proposed and discussed within the timeframe of this plan; however, it is difficult to anticipate how far-reaching these proposals might be.
Historic Cemeteries

Throughout the planning process, participants voiced concerns about the lack of data and resources available to help preserve and protect Maryland’s historic cemeteries. This issue also connects to historic preservation policies, in that cemeteries are typically not eligible for inclusion in the National Register, which can limit their protection and eligibility for incentives. They exist in a gray area between historic properties, archaeological sites, and cultural landscapes, despite being important places of cultural memory. As such, documentation of historic cemeteries is uneven throughout Maryland; there is no standard for documentation or single repository of information. Development pressures throughout the state and climate change, particularly sea-level rise on the Eastern Shore, imminently threaten some of these cherished sites. In 2022, MHT and MCMAHC collaborated on a report to the Chairmen of the Senate Budget and Taxation Committee and House Appropriations Committee of the Maryland General Assembly, which outlined challenges facing Maryland’s historic African American cemeteries and proposed recommendations. Issues outlined in the report, which overlapped heavily with feedback received during the planning process, included:

- lack of maintenance and missing grave markers;
- missing and deteriorated burial records;
- unknown or inaccurate cemetery boundaries and grave locations;
- best practice guidance needed for locating unmarked cemeteries;
- unknown or contested ownership;
- cemetery locational data unknown or inaccessible;
- statutory and regulatory weaknesses in cemetery protection;
- desecration and disturbance are rarely prosecuted; and
- issues of public interest and engagement, including public access, lack of funding for interpretation and memorialization, and lack of education, training, and networking.

While African American cemeteries are among the most vulnerable of Maryland’s historic cemeteries and need special attention, the issues and recommendations made in the report are applicable to all historic cemeteries. For these reasons, we have proposed that this plan’s key objectives for cemeteries should be consistent with the 2022 report.

Urgent Need for Expanded Technical Assistance, Capacity Building, & Collaboration

As mentioned previously, many participants in the planning process indicated a breakdown of network and connections through pandemic and its aftermath. The need for networking, capacity building, and collaboration – which had been raised in previous statewide preservation plans – had only become exacerbated in the last few years. While staff turnover at some organizations provided fresh energy, it often came with a loss of institutional
knowledge and established relationships. As a result, we received many requests for public and private sector partners to make more technical assistance, training, and networking opportunities available both locally and at the statewide level. Many participants expressed that they need help to understand the resources available, especially from different agencies and programs for funding and research related to cultural heritage. Some noted that time and transportation costs for travel from the Eastern Shore, Southern Maryland, and Western Maryland to the central part of the state, where more resources are located, can be insurmountable for smaller and community-led organizations.

In particular, participants noted that local advocacy nonprofits, which campaign to preserve historic places, seemed to have disappeared from the landscape, and those that remained did not know where to turn for support. Community-led organizations, which sometimes engage in specific cultural heritage projects, often rely heavily or exclusively on volunteers. In some cases, Maryland’s heritage areas have developed the capacity to serve as regional umbrellas for various groups engaged in preservation, archaeology, and cultural heritage, but this service is uneven across the state. Groups of practitioners – including the staff of museums and cultural institutions, local preservation planners, and lay advocates for preservation – expressed a desire for both regional and statewide information exchange, among peers. Participants requested a mix of virtual and in-person opportunities to support accessibility needs, as well as special support for all-volunteer organizations and organizations led by and serving Black, Indigenous, and marginalized communities.

**Climate Change and Sustainability**

In comparison to previous planning years, participants seemed much more attuned to concerns about climate change and its impacts on historic and cultural properties, especially participants working and living on the Eastern Shore. In particular, participants raised concerns about cemeteries and archaeological sites, as well as vulnerable sites connected to Black and Indigenous communities that are imminently threatened by sea-level rise. Participants also noted that heritage-related events and educational programming, as well as the fundraising events needed to sustain organizations, are increasingly threatened by severe weather events.

This feedback dovetails with MHT’s observation that requests from local governments have also increased over the last three-five years, asking for more assistance in hazard mitigation and climate adaptation, and we expect this to continue. Unfortunately, MHT no longer has funding to support dedicated assistance to local governments and partners on this issue.

**MARYLAND CLIMATE ADAPTATION AND RESILIENCE FRAMEWORK RECOMMENDATIONS 2021-2030**

In 2020, the Maryland Commission on Climate Change’s Adaptation and Resiliency Working Group was charged with updating the state’s adaptation plan and developing a framework for action on climate change over the next 10 years, specifically in vulnerable and under-served communities. The Maryland Climate Adaptation and Resilience Framework Recommendations: 2021-2030 establishes the vision, goals, strategies, and activities that will guide the next decade of adaptation implementation across the state. Although historic properties are not called out for specific action, the Framework reinforces the importance of cultural heritage in considering climate impacts, the role of arts and culture in climate communications and resilience, and the relationship of natural and cultural systems threatened by climate change.

**GUIDELINES ON FLOOD ADAPTATION FOR REHABILITATING HISTORIC BUILDINGS**

In 2021, in response to the challenge of meeting both climate adaptation and historic preservation goals, NPS issued Guidelines on Flood Adaptation for Rehabilitating Historic Buildings, to in an effort to help project managers and planners make historic properties more resilient to flooding risk while meeting the Secretary of the Interior’s Standards for Rehabilitation. Practitioners in Maryland may also wish to consult MHT’s 2018 Flood Mitigation Guide: Maryland’s Historic Buildings and Planning for Maryland’s Flood-Prone Archeological Resources, released in 2019, which together give an overview of the threats presented by sea-level rise, riverine flooding, and increased precipitation, while presenting different planning approaches and opportunities.
Accessibility of Public and Private Programs

As in previous statewide preservation plans, participants challenged federal, state, and local programs to do everything possible to increase ease of use and accessibility, especially to those participants who have limited or no access to funds. Many of these challenges have been addressed through the following initiatives:

- Increased support for research and documentation.
- More flexible emergency funding.
- Reduced recordkeeping requirements.
- Streamlined processes, including electronic applications.
- Increased funding through tax credits or incentives.
- New programs, such as the African American Heritage Assistance Program.

We heard a broad recognition of the value of historic preservation in sustainable development, particularly in fostering walkable communities and electric vehicles. We anticipate that this conversation and approaches will continue to evolve on the federal, state, and local levels, and that MHT and its partners will need to track developments and help communicate best practices throughout the state.

The Moore-Miller Administration has flagged climate change as an urgent priority to be addressed and has created new capacity at the state level to pursue an aggressive climate change agenda. The next eight years will be crucial to ensuring that more assistance becomes available for communities grappling with cultural heritage and climate change. The period covered by Preserve Maryland and AmeriCorps VISTA (2012-2023) saw important increases to state investment in historic preservation and cultural heritage, including funding increases for the Maryland Heritage Areas Program ($3 million to $6 million annually), the creation of a new small commercial tax credit ($2 million annually), and increased appropriations for competitive commercial tax credit (up to $20 million).
MHT, its sister agencies, and partner nonprofits widely recognize the need to increase program accessibility, particularly to be responsive to the needs of underrepresented and marginalized communities. In practice, this will require new and substantial investment in outreach, personnel, systems for implementation (for example, staff liaisons to develop relationships, training in cultural competencies, new software and software training, dedicated staff to assist applicants who need more help). MHT has embarked on a Board-led Justice/Equity/Diversity/Inclusion effort to examine its own programs and impacts; over the course of the last plan, MHAA completed phase one of an equity assessment to improve equitable grantmaking. Some measures can and will be undertaken with existing resources; however, in many cases, additional investment will be necessary to respond to the needs identified. In other cases, existing regulations and policies exist that create barriers to access.
Vision

To protect and share Maryland's diverse cultural heritage, fostering a sense of pride, awareness, belonging, and stewardship among our communities, while promoting:

- Economic Vitality,
- Equity and Accessibility,
- Sustainability,
- Educational Enrichment, and
- Climate Resilience.
To achieve this vision, in 2031....

- Communities and places underrepresented in the historical record are prioritized in documentation, protection, and interpretation. (Goal 1)
- Professionals and the public involved in historic preservation, archaeology, and cultural heritage efforts have the training, education, and support they need. (Goal 2)
- Climate adaptation, local planning, and economic development efforts use cultural heritage to maximize effectiveness and benefits. (Goal 3)
- Data and financial programs related to cultural heritage are efficient, easy to use, and easy to access. (Goal 4)
- Decision-makers, property owners, and the general public understand the value of historic preservation, archaeology, and cultural heritage protection. (Goal 5)
Goal 1: Prioritize community histories and places underrepresented in the historical record
Goal 1: Prioritize Underrepresented Communities

Objective 1: Document, protect, and share the histories and existing culture of Native American peoples in Maryland, in partnership with tribal communities.

STRATEGIES

- Continue offering archival consultation and/or training for tribal communities' preservation needs. – MSA and tribal communities.
- Provide links to publicly-available tribal resources on the Mayis: Indigenous Records webpage. – MSA
- Develop Paleoindian fluted point sequence for archaeological surveys to better place finds in context relative to other regions. – MHT, ASM
- Ensure that Piscataway history and culture is central to the management and interpretation plans for the Southern Maryland National Heritage Area. – Southern Maryland National Heritage Area, NPS, Piscataway Conoy Tribe and Tribal Council, Piscataway Indian Nation
- Lead the preparation of National Register documentation on American Indian heritage in Baltimore City. – MHT
- Develop a historic context study or report showing the relationship between Maryland road development and Native American paths. – MDOT SHA
- Partner with Piscataway Indian Nation and Piscataway Conoy Tribe for programming that focuses on recreated Woodland Indian Village and Piscataway culture. – JPPM
- Partner with the Maryland Commission on Indian Affairs and tribal leaders and communities to share stories, historic sites, and events on the MD TWOFIFTY website and social media. - Maryland 250 Commission
- Include Native American communities and perspectives in developing programming for the 250th. - Maryland 250 Commission, state agencies, tribal communities
Goal 1: Prioritize Underrepresented Communities

Objective 2: Explore and interpret post-Civil War African American stories in Maryland.

**STRATEGIES**

- Produce a statewide African American Civil Rights Multiple Property Documentation (MPD) form for inclusion in the National Register. – MCAAHC, MHT, nonprofits dedicated to Black history throughout Maryland
- Facilitate the development of National Register nomination forms for at least three Rosenwald schools. – MHT
- Update the Chestertown Historic District National Register nomination to document the city’s diverse history. – MHT, Town of Chestertown
- Commemorate the 60th anniversary of the signing of the Civil Rights Act through the “Year of Civil Rights” (2024). – MCAAHC, Association of African American Museums, NPS African American Civil Rights Network
- Complete historical and archaeological study of the rural community of Wallville (Calvert County), in partnership with descendant communities. – JPPM, MHT
- Document segregation-era resort towns of Eagle Harbor, Cedar Haven, and Columbia Beach for inclusion in the MIHP and National Register. – MHT, local communities
- Establish the Freedman's State Historical Park, the former home of George Enoch Howard (Montgomery County), and develop a master plan for the site. – DNR, PM
- Develop a historic context study for African American archaeological sites. - MDOT SHA, MHT
- Identify, examine, preserve, and present an inclusive variety of documentation and commemoration of sites of racialized conflict, trauma, and survival, primarily, but not exclusively, those associated with racial terror lynchings. – Maryland Lynching Truth and Reconciliation Commission, local governments, community organizations
- Partner with the Maryland Commission on African American History and Culture and other partners to share stories, historic sites, and events on the MD TWOFIFTY website and social media. - Maryland 250 Commission
- Include African American communities and perspectives in developing programming for the 250th. - Maryland 250 Commission, state agencies, local communities

**SITES OF CONSCIENCE**

The [International Coalition of Sites of Conscience](https://sitesofconscience.org) is a global network of historic sites, museums, and memory initiatives connecting past struggles to today’s movements for human rights and social justice. Sites of Conscience provide safe spaces to remember and preserve even the most traumatic memories, enabling their visitors to make connections between the past and present. The [Maryland Lynching Memorial Project](https://marylandlynchingtruth.org), the [Harriet Tubman Underground Railroad State Park](https://www.maryland.gov/MarylandStateParks-HarrietTubman), and the [National Museum of Civil War Medicine](https://www.unc.edu/~nmcwmed/) are all Maryland-based coalition members.

Text from the International Coalition of Sites of Conscience website.
Goal 1: Prioritize Underrepresented Communities

Objective 3: Increase the quality and quantity of data in the MIHP for places associated with underrepresented communities.

STRATEGIES

- Expand the documentation of Asian American heritage in Baltimore City and the DC Metro area. – MHT, Maryland-National Capital Park and Planning Commission
- Based on the existing statewide historic context study, continue to identify and document LGBTQ sites to the MIHP and National Register. – MHT, local governments, PM, nonprofit organizations
- Work with community partners to develop a course to identify, document, and designate places of significance to underrepresented communities for preservation and interpretation. – MAHDC, MHT
- Document cultural and designed landscapes in the MIHP (for example, industrial landscapes in Western Maryland). - MHT

INDIGENOUS CULTURAL LANDSCAPES

Indigenous Cultural Landscapes (ICLs) evoke the natural and cultural resources supporting Native American lifeways and settlement patterns in the early 17th century. Important to descendant communities today, and to conservation strategies in the Chesapeake, these landscapes comprise the flora, fauna, ecosystems, topography, waterways and other natural features that sustained an Indian group in its totality. The concept attempts to demonstrate that the Native American view of homeland is holistic, rather than compartmentalized into discrete site elements such as “hunting grounds,” “villages,” or “sacred sites.” Now part of the Captain John Smith Chesapeake National Historical Trail, ICL documentation was developed with participation from tribes in the Chesapeake Bay region and can be used for planning and interpretive efforts. To date, researchers have documented ICLs in Maryland on the Nanticoke River, the Lower Susquehanna River, and the Nanjemoy and Mattawoman watersheds.

LGBTQ+ CONTEXT STUDY

In partnership with MHT, PM helped develop an historic context study in 2020 on LGBTQ history in Maryland and, in 2022, produced a pamphlet about LGBTQ resources with the UMD, Baltimore City Commission for Historical and Architectural Preservation (CHAP), Montgomery County Planning, and Baltimore Heritage. Covering nearly 400 sites in each of Maryland’s counties, this work illuminates Maryland LGBTQ+ history in rural, suburban, and urban locations, including sites associated with non-binary historical figures, “out” elected officials, community groups, and advocacy for AIDS treatment and marriage equality.
Goal 1: Prioritize Underrepresented Communities

Objective 4: Secure support for and begin to implement the recommendations in the June 2022 Historic African American Cemeteries report to the Joint Chairmen of the Maryland General Assembly by MCAAHC and MHT.

AFRICAN AMERICAN BURIAL GROUNDS

In 2022, Congress passed the African American Burial Grounds Preservation Program, which authorizes NPS to create a grant program to research, identify, document, preserve, and interpret historic African American burial grounds. Provisions allow NPS to distribute this funding, estimated at $3 million annually, to other federal agencies, state, local, and tribal governments, other public entities, educational institutions, historic preservation groups, and private nonprofits.

STRATEGIES

- Provide funding to support historic African American cemetery maintenance, rehabilitation, and restoration activities. – MCAAHC
- Explore creation of a historic African American cemetery collection to serve as the central repository for research. – MCAAHC
- Create and disseminate best practice guidance on how to use archaeological investigations, land survey techniques and archival research approaches for identifying historic African American burial sites. – MCAAHC, MHT, Coalition to Protect Maryland Burial Sites
- Support development of a publicly accessible, map-based data layer dedicated to historic cemeteries throughout Maryland. - MHT, Office of Cemetery Oversight (OCO), Banneker-Douglass Museum, MDOT SHA, DNR, local governments
- Create burial sites preservation boards responsible for maintaining inventories and information related to cemetery maintenance and preservation at the local level. – county governments, OCO, MCAAHC (consultation on issues African American cemeteries)
Goal 1: Prioritize Underrepresented Communities

Objective 5: Increase and stabilize funding for the research and documentation of historic and cultural properties, with a focus on underrepresented resources and communities.

STRATEGIES

- Pursue expanded Historic Preservation Non-Capital grant funding. – MHT, PM, local advocates
- Pursue federal funding to support research and documentation, particularly for the National Register. – MHT, CLGs, nonprofit organizations
- Expand MCAAHC funding to include research and documentation for African American heritage. – MCAAHC, Banneker-Douglass Museum, local advocates
- Collaborate annually to identify research topics and funding/partnership opportunities. – MHT, PM
- Increase support for the collection of oral histories at the local and state level, including training, resources, funding, and data collection programs. – MSA, MHAA, MSAC, MCHC, Maryland Humanities

MARYLAND 250 COMMISSION

The Maryland 250 Commission will develop, encourage, and execute an inclusive, statewide, yearlong observance of the 250th anniversary of our nation's founding, recognizing all Marylanders' struggle for life, liberty, and the pursuit of happiness, before, during, and after the Revolutionary War. Semiquincentennial events, programs, and opportunities are expected to begin in 2024 and last through 2027. The Maryland 250 Commission goals, which intersect with Heritage2031, are to:

- Acknowledge that the confiscation of Indigenous land and displacement of Indigenous people is central to the United States' origin story and recognize the persistence and contributions of these communities today.
- Honor the legacy of both free and enslaved African Americans in the making of Maryland and the nation, whose untold stories of heroism and perseverance are critical to the understanding of our shared past and present.
- Support the identification and enhancement of cultural assets that tell the story of who we are as Marylanders and promote place-based visitor experiences for residents and visitors alike.
- Engage youth, new Americans, and lifelong learners in programs designed to encourage the search for meaning behind America and deepen engagement in civic life.
- Celebrate service to country and community, and create opportunities that promote social responsibility, compassion and understanding that will unite and strengthen Maryland's diverse communities for the benefit of all.

On the Maryland 250 Commission website, you can sign up for the email list, share an idea, find resources to create your own event, and learn more about the Commission’s initiatives.
Goal 2: Support professionals and the public in historic preservation, archaeology, and cultural heritage efforts
Goal 2: Support Professionals & the Public

Objective 1: Develop and communicate improved strategies for Native American participation in planning, development, research, and interpretive projects.

STRATEGIES

- Explore models for engagement in planning and interpretative projects at the state, local, and private/non-profit level – MCIA, MHT, tribal communities, state agencies, local governments, Heritage Areas, nonprofit organizations

MAYIS

Working in partnership with Indigenous communities, MSA is building on the success of its Indigenous records website called Mayis, named for a Renape word for “a path; to go on.” Using an FY 2023 multi-heritage area grant from MHAA, the agency developed an Indigenous Archive Project for the Eastern Shore of Maryland, recording oral histories, increasing online access to archival materials, offering outreach to K-12 teachers, and hosting educational workshops. The project’s strategy is to amplify the voices of 21st-century Indigenous communities and to expand access to existing resources about those living in the region before European contact.
Goal 2: Support Professionals & the Public

Objective 2: Increase preservation and heritage-related technical assistance and support for individuals, community organizations, and nonprofits.

LOCAL NETWORKS FOR HISTORIC SITES AND MUSEUMS

There are several museum consortia in Maryland, which share resources and provide professional development opportunities. Some examples are:

- The Greater Baltimore History Alliance that encourages the interpretation of Baltimore’s multi-cultural heritage,
- The Frederick Historic Sites Consortium that, in addition to their public programming, runs the Master Docent Series,
- The Historic Sites Consortium of Queen Anne’s County that supports the preservation and stewardship of the region’s cultural heritage, and
- The Historic House Museum Consortium that has a diverse collection of sites in Maryland.

STRATEGIES

- Create regional networks of support for organizations and individuals with marginalized access to resources. - MCAAHC, PM, Heritage Areas
- Facilitate peer-to-peer networking opportunities and information exchange for museums and cultural sites. – MMA, MCHC, Heritage Areas, local museums and institutions
- Increase access to qualified historic preservation contractors and tradespeople by updating and enhancing existing databases. – PM, MAHDC
- Collaborate with Maryland universities to increase capacity for historic preservation planning and cultural heritage research, documentation, and protection. – PM, nonprofit organizations, community organizations
Goal 2: Support Professionals & the Public

Objective 3: Produce new and improved opportunities for professional training and support in historic preservation, archaeology, and cultural heritage protection.

STRATEGIES

- Facilitate a roundtable discussion and networking opportunity for preservation planners twice a year. – MHT, MDP, MAHDC
- Continue review of cultural resource documentation challenges and potential updates to recordation strategies. – MHT
- Build collaborative relationships with and conduct outreach to state and federal agencies involved in Section 106 review. – MHT, state and federal agencies
- Explore statewide education and training opportunities every other year. - PM
- Continue to expand access to training opportunities in historic preservation trades and building arts. – PM
- Collaborate with Maryland’s Historically Black Colleges and Universities to develop programs focused on creating a pipeline of new Maryland Park Service rangers and other full-time staff from among volunteers, the state foster youth system, and historically underserved communities. – DNR, PM
- Continue hosting annual Architectural Fieldwork Symposium focusing on updated policies, new and inventive technologies, current interest topics, and relevant projects. - MHT

MARYLAND APPRENTICESHIP PROGRAM

The Maryland Department of Labor recently approved an apprenticeship program sponsored by the Campaign for Historic Trades, a national workforce development program administered by PM. The first-of-its-kind apprenticeship program focuses on expanding and strengthening careers in the historic trades and sets standards – including on-the-job learning, related instruction, and core competencies – that provide a clear process for entering the workforce in roles like deconstruction technician, historic window technician, and preservation carpenter. If you are an employer who wants to hire apprentices or an individual who wants to become an apprentice, visit www.historictrades.org or email info@historictrades.org.
Goal 2: Support Professionals & the Public

Objective 4: Enhance educational opportunities for the public, particularly youth, to learn about the practice of historic preservation, archaeology, and cultural heritage protection, as well as existing programs and resources.

STRATEGIES

- Continue Scouts BSA merit badge training in archaeology. – MHT
- Establish programs and training to encourage K-12 teachers to develop STEM curriculum that includes archaeology. – MHT, ASM, local teachers
- Continue to build on public programs that focus on archaeology and cultural heritage protection. – JPPM
- Host the MHT Roadshow four times a year. – MHT
- Produce approximately one training or educational program per quarter. – PM
Goal 3: Use cultural heritage to enhance climate adaptation, local planning, and economic development activities
Goal 3: Enhance Climate Adaptation, Local Planning, and Economic Development

Objective 1: Invest in and provide technical support for climate resilience and adaptation efforts in historic communities.

STRATEGIES

- Secure funding and staffing necessary to relaunch Weather It Together Program. – MHT
- Create an educational program for preservation planners about projected climate impacts in Maryland. - MHT, MDP, Maryland Resiliency Partnership
- Collaborate as invited with frontline communities to provide assistance for cultural heritage documentation, mitigation, and adaptation. – MHT, DNR, Maryland Resiliency Partnership, local governments, nonprofit organizations, community organizations
- Support the inclusion of historic and cultural resources in the development of local hazard mitigation plans. – Maryland Department of Emergency Management, MHT, local governments
- Strengthen existing ties to Sustainable Maryland Program at UMD to ensure cross-collaboration and knowledge exchange. – MAHDC
- Integrate current climate resilience and adaptation practices into Sustainability and Modernism courses for HPCs. – MAHDC, MHT
- Develop case studies to demonstrate adaptation strategies of historic buildings and communities. – MAHDC, MHT
- Analyze and communicate climate impacts predicted for Maryland, as they relate to historic and cultural properties. - MHT, MDP, Maryland Department of the Environment

EASTERN SHORE CLIMATE ADAPTATION PARTNERSHIP

The Eastern Shore Climate Adaptation Partnership (ESCAP) was established in 2016 to help vulnerable communities prepare for climate change impacts. The partnership – an informal regional collaboration of staff from local governments, state agencies, academic institutions, and nonprofit organizations – promotes learning and collaboration among mid and upper Eastern Shore communities to prepare for changes in weather patterns, flooding, and other environmental conditions. ESCAP is a venue for partners, including MHT, to provide support, education, technical assistance, and resources to help member communities build resilience. For more information or to join the partnership, contact Eric Buehl (ebuehl@umd.edu) or Kayle Krieg (kayle@umd.edu).
Goal 3: Enhance Climate Adaptation, Local Planning, and Economic Development

Objective 2: Improve the capacity of local governments to engage in planning for cultural resources.

STRATEGIES

- Increase participation in the Certified Local Government (CLG) Program. - MHT, local governments
- Develop new course for HPCs about preservation economics to provide up-to-date information on funding access and applicable standards. - MAHDC
- Proactively document Mid-Century resources to support local planning efforts, redevelopment, and compliance review, especially in western Maryland and the DC metro area. - MHT, local governments
- Distribute guidance on archaeology review for local governments. - MHT
- Develop and share guidance to help meet energy efficiency and preservation goals at the state and local level. - MHT, MAHDC
Goal 3: Enhance Climate Adaptation, Local Planning, and Economic Development

Objective 3: Enhance the ability of historic preservation to support housing redevelopment and affordable housing needs.

STRATEGIES

- Advocate for preservation through new and existing affordable housing programs while balancing the need to keep construction costs low. – DHCD, PM
- Seek opportunities to collaborate with other state agencies when funding sources are layered and streamline applications and reviews if possible. - DHCD

UPLIFT

Maryland’s UPLIFT (Utilizing Progressive Lending Investments to Finance Transformation) program was recently created to increase homeownership opportunities, one of the most powerful drivers of the racial wealth gap, in chronically underinvested communities impacted by legacies of discrimination and redlining. Many of these communities are historic or contain historic properties. Administered through DHCD, the program will address homes impacted by appraisal gaps by accelerating the pace of new construction and rehabilitation of quality affordable housing. In its first phase, UPLIFT, which builds on the department’s Homeownership Works pilot program, will invest $10 million into new construction and rehabilitation projects in two neighborhoods, Johnston Square in Baltimore and Pine Street in Cambridge.
Goal 3: Enhance Climate Adaptation, Local Planning, and Economic Development

Objective 4: Increase investment in place-based projects prioritized by local historic communities that have been chronically marginalized or underserved.

**Baltimore Heritage Micro-Grant Program**

Baltimore’s local preservation advocacy group, Baltimore Heritage, Inc. offers micro-grants ($500-$1000) annually to help fund preservation work in the city. The kinds of projects funded reach far beyond traditional preservation work – all types of projects are eligible, as long as they relate to Baltimore’s history, heritage, historic buildings or historic neighborhoods. The goal is to help spark new and support existing neighborhood-level preservation work, and individuals and all kinds of groups – not just formal nonprofits – are eligible to apply. To learn more, visit Baltimore Heritage’s website.

**Strategies**

- Reduce barriers for redevelopment of historically disinvested communities and encourage adaptive reuse, infill development, and density in historic districts. – DHCD
- Use capital, non-capital, and local mini grants to support enhancements that may not qualify as traditional “historic preservation” projects but still contribute to vitality, quality of life, and economic potential. – Heritage Areas, local nonprofits
- Connect Marylanders to historically and culturally significant waterways for educational and recreational opportunities. – DNR, PM, Heritage Areas, local nonprofits, local governments
Goal 3: Enhance Climate Adaptation, Local Planning, and Economic Development

Objective 5: Foster the appropriate treatment (documentation, preservation, rehabilitation, redevelopment, and interpretation) of state-owned historic properties and cultural resources.

STRATEGIES

- Conduct a systemwide survey of historic and cultural resources under the jurisdiction of the Maryland Park Service, including estimated restoration and maintenance costs. – DNR, PM
- Enhance tools to support redevelopment of historic state-owned properties including local density bonuses and access to New Markets Tax Credits. - DHCD
Goal 4: Improve efficiency and accessibility of cultural heritage data and financial programs
Goal 4: Improve Efficiency & Accessibility

Objective 1: Continue to analyze the impacts of state programs and make improvements to maximize equitable benefits.

STRATEGIES

- Formalize MHT Justice/Equity/Diversity/Inclusion Working Group and workplan. – MHT, MHT Board of Trustees
- Analyze gaps in capital investments by overlaying Census tracts and project locations. – MHT
- Update the Maryland Heritage Areas Program Strategic Plan, including additional evaluation of the program structures and processes to ensure equitable grantmaking. – MHAA
Goal 4: Improve Efficiency & Accessibility

Objective 2: Maximize the ability of the Historic Revitalization Tax Credit Program to leverage investment and redevelopment in communities.

STRATEGIES

- Advocate for the increased annual appropriation for large commercial and small commercial tax credit projects. - PM
- Identify existing communities that could benefit from tax credits – but have not done so in the past - and work proactively with partners to improve access to funding and other resources. – MHT, PM
- Launch pilot project to compare the use of Baltimore City historic preservation tax credits and state historic preservation tax credits to create better coordination and a more significant impact on revitalizing communities. - MHT, CHAP
Goal 4: Improve Efficiency & Accessibility

Objective 3: Provide new financial and technical support for museums and cultural sites.

STRATEGIES

- Advocate for the reinstatement of the Historical and Cultural Museum Assistance Program. – MMA, MCHC, PM, Maryland Humanities, historical and cultural museums
- Explore opportunities to develop capacity-building assistance for museums and cultural sites dedicated to African American heritage. – MCAAHC
Goal 4: Improve Efficiency & Accessibility

Objective 4: Improve user experience through online portals offered by the state.

MDFIND

Isolated archaeological finds, like arrowheads or pottery sherds, are often the first clues that lead to the discovery of new sites. MHT’s MDFIND app is a tool for hobbyists, “citizen scientists,” beachcombers, hikers, and other members of the public to report artifacts found in Maryland’s fields, forests, and coastal areas, making them a part of archaeological discovery and documentation. This crowdsourcing app records unanticipated artifact discoveries in the field, and reports those findings to MHT archaeologists. The app allows you to upload or capture up to five images of the object(s), report the location using your phone’s GPS, specify the broad artifact type or the diagnostic artifact name (if you know it), and (optionally) report your name and contact info for any follow-up. Easy-to-use drop-down menus and links to external webpages (such as JPPM’s Diagnostic Artifacts Page) make filling out the form simple.

STRATEGIES

- Develop a system for the electronic submission of MIHP forms and Determination of Eligibility forms. – MHT
- Evaluate current grants software and options for improvement, including exploring the possible use of phone apps. – MHT, MHAA
Goal 4: Improve Efficiency & Accessibility

Objective 5: Improve data sharing among state agencies and with local planners.

STRATEGIES

• Launch a survey to understand the gaps in cultural heritage data collection at the state and local levels. – MHT, MAHDC
• Complete evaluation of National Register eligibility of locally designated historic districts, allowing for more transparent assessment of properties for financial incentives as well as planning efforts. – MHT
• Continue to identify data gaps in the MIHP and develop a plan to address them in the long-term. – MHT
• Produce regular trainings for users of Medusa, the state’s cultural resources information system. – MHT
Goal 4: Improve Efficiency & Accessibility

Objective 6: Increase access to documentation and archives held by the state.

STRATEGIES

- Continue to develop finding aids for collections held in the MHT Library and create new trainings for users. – MHT
- Continue to identify and to expand access to colonial government records relating to Indigenous communities on the Mayis: Indigenous Records webpage. – MSA
- Provide educators with resources and trainings relating to local Indigenous communities in partnership with other state agencies and tribal communities – MSA with state agencies, nonprofit organizations, tribal communities

DID YOU KNOW?

MSAC’s Maryland Traditions program hosts a resource of documentary short films on its YouTube channel. Program staff also provide oversight of the Maryland Traditions Archives, housed at Special Collections at UMBC. The Maryland Traditions Archives contain institutional records, folklorist papers, and materials documenting and/or donated by practitioners of living cultural traditions, including copious fieldwork materials. Finding aids are available online for the processed collections, which were once scattered throughout the state. MSAC will host programming in 2024 to mark the 10th anniversary of the archives and to help highlight this invaluable resource.
Goal 5: Make the case for preservation
Goal 5: Make the Case for Preservation

Objective 1: Continue to expand social media outreach and other communications.

STRATEGIES

- Increase audience for social media platforms and email distribution by one third. – MHT, MHAA
- Update course on communication for HPCs to provide information on the use of social media. – MAHDC
- Add capacity for social media, highlight preservation successes. – Local governments, Heritage Areas, nonprofit organizations
Goal 5: Make the Case for Preservation

Objective 2: Develop case studies for use by local advocates, developers, governments, and decision-makers.

STRATEGIES

- Produce case studies for historic tax credits and grant projects – MHT, MHAA
- Create a communications toolkit available online and in print that includes case studies. – PM
- Produce short videos highlighting successful grant projects. – MHT, MHAA
- Use Story Map software to share news and case studies from HPCs across the state. – MAHDC
- Explore opportunities to create economic impact studies that demonstrate the value of historic preservation and cultural heritage. – MHT, PM, MHAA
Goal 5: Make the Case for Preservation

Objective 3: Increase the capacity of local organizations to protect & advocate for historic properties.

STRATEGIES

- Engage people across the state through awareness, events, education and technical assistance programs. – PM
- Create workshops for advocates to provide up-to-date information on local historic preservation programs across the state. – MAHDC
Section 2: Supporting Materials
This timeline was put together by MHT to provide a sense of the state's development and changes. We recognize that timelines are not static and can never be complete. As new context studies are performed and additional information discovered, this timeline will be updated. We invite you to explore the full timeline and let us know if you feel that something should be added.
Maryland’s history, development patterns, built environment, and threats to historic and cultural places vary widely by region. Although we recognize that Marylanders identify the state’s regions in many different ways, for the purposes of Heritage2031, we have opted to use the regions identified in the previous statewide preservation plan, which have proven useful in illustrating differences and similarities across the state (see map on page 49).

The following snapshots provide an overview of some of the distinctive aspects of the region’s history, architecture, and landscape. These snapshots are intended to provide context for the goals, objectives, and strategies in Section 1 of the plan, with the recognition that strategies for each region may differ in the course of plan implementation. The highlights selected do not mean that the places, periods and property types mentioned are the only matters of significance or interest in each region.

The maps for each region are split into three categories:

- MHT Easement Sites, National Historic Landmarks (NHLs), National Register Sites, and MIHP sites;
- Main Street Areas, CLGs, and HPCs; and
- Museums, Protected Lands, State-owned Properties, Heritage Areas, and Scenic Byways
Western Maryland Snapshot

Western Maryland is known for its history in transportation, industry, conflict, and recreational tourism. Transportation and trade routes were key to the development of western Maryland, promising access to the region’s resources and beyond. Massawomeck and Susquehannock trails, followed by the Cumberland Road and the National Road, the C&O Canal, and the Western and B&O railroads, opened the region to development and commerce. The region’s numerous historic towns are often linked to these transportation networks. The ready transport and abundant natural resources supported several industries including coal and fire clay for brick making.

The region frequently served as an arena for conflict, from the arrival of European settlers to the Civil War. This is likely due to its position on western trade routes, its relationship with the Potomac River, and its proximity to Pennsylvania, Virginia, and West Virginia. Both Fort Cumberland and Fort Frederick played significant roles in the French and Indian War (1754-1763), with the latter also serving as a prison for British soldiers during the American Revolution and as a guard of the area’s transportation routes during the Civil War.

Recreation and tourism are important to the region’s historical development and current identity. Tourism history begins with the Victorian railroad resorts of Deer Park and Mountain Lake Park and includes more recent recreational parks like Deep Creek Lake State Park, which began as a part of a hydroelectric project in the 1920s. Seeing these travel trends, early state and federal authorities also took advantage of the rustic mountainous landscape for recreation and tourism opportunities, often using Civilian Conservation Corps labor to construct infrastructure. Like other parks, New Germany State Park, formerly New Germany Recreation Area, retains these features today. The Appalachian Trail, built between 1921 and 1937, travels through this region of Maryland, promoting tourism among state residents and out of state visitors alike.

Central Maryland Snapshot

Central Maryland is characterized by its history in German immigration, transportation, diverse agriculture, waterpower, and Civil War heritage.

The migration of Germanic immigrants from southeastern Pennsylvania through central Maryland and into the Virginia valley link the region with neighboring areas. Many surviving buildings from the mid-18th century reflect these European roots of the region’s first settlers. Like western Maryland, the region is nationally recognized for its significance in the history of transportation. Inspired by the opening of the Cumberland Road in the early 19th century, the Maryland General Assembly created a turnpike called the National Road that connected Baltimore and Cumberland, spurring the development of many towns including Catonsville, Ellicott City, Frederick, Middletown, Hagerstown, and Hancock. Likewise, the first section of the B&O Railroad was opened between Baltimore and Ellicott’s Mills (now Ellicott City) in 1830 and reached Wheeling, West Virginia in 1853.

Central Maryland is characterized by a history of diverse agriculture; farming remains an important aspect of the region’s economy and culture. Grain, particularly wheat, was the predominant crop in the region through the mid-19th century, and many surviving farmsteads and grist mills attest to its significance. By the Civil War, however, technological advances and demographic shifts led to a decline in grain production and an increase in orcharding and dairy farming. Dairy production became the principal agricultural pursuit in central Maryland through the early 20th century. However, dairy barns and supporting structures, such as milking parlors and silos, are vanishing in lieu of modern development.

The region’s rivers and streams offered abundant waterpower, supporting the establishment of numerous mills and factories. Small-scale grist and sawmills on creeks and tributaries served local customers while larger rivers like the Patapsco powered major operations, such as the 18th century flour mills in Ellicott City and the early 19th century textile factories in Oella and Daniels.

During the Civil War, Maryland was a slaveholding state, yet it did not secede from the Union. Civil War heritage tourism is a prime driver of interpretive programs and economic development in Maryland. Battlefields in the western part of the central region, such as Monocacy Battlefield and South Mountain Battlefield, have been protected and interpreted by NPS and the Maryland Park Service respectively.

DC Metro Area Snapshot

The DC Metro region is known for its association with federal institutional development and its suburbanization, including planned communities, mid-century subdivisions, and situated Modernism communities.

Early agrarian landscapes in the DC Metro area have been heavily developed, creating better transportation routes to and from Baltimore and Philadelphia, which had replaced much of the agricultural landscape by the end of the 19th century.

Numerous federal institutions and facilities, which incorporate and administer a variety of parks and museums, are located in the Washington, DC metro area. Many have architect-designed buildings and significant campuses and their siting and expansions have spurred the overall development of the region. Proximity to the federal government also drove housing and commercial expansion throughout the region.

The DC Metro area is predominantly characterized by 19th and 20th century suburban development, representing the influence of railroad, streetcar, and automobile transportation. It is also home to planned communities like Greenbelt and Belair at Bowie in Prince George’s County, mid-century subdivisions like Hammond Wood and Rock Creek Woods in Montgomery County, and situated Modernism communities, like Carderock Springs and New Mark Commons, also in Montgomery County.

DC Metro Area Museums, Protected Lands, State-owned Properties, Heritage Areas, & Scenic Byways
Baltimore Metro Area Snapshot

The Baltimore Metro region is characterized by its waterfront location and resulting history of industry, rowhouse development, immigrant communities and cultures, and a history of discriminatory zoning practices.

Baltimore City’s history is directly tied to the Patapsco River and Chesapeake Bay. Fort Whetstone, now Fort McHenry, was built at the end of the peninsula that led the Patapsco River to the entrance of the Baltimore harbor prior to meeting the Bay. By the late 18th century, the city emerged as a critical port along the East Coast, setting the stage for an evolving roster of industries in the areas surrounding the harbor. Development areas included the shipyards of Fell’s Point (1790s), the Canton area (1828), and mills in the Jones Falls valley (beginning in 1810). Industrial development pressed beyond the city limits and Sparrows Point, a rural area in Baltimore County, became a steel works in 1887. Bethlehem Steel acquired the plant in 1916 and expanded it to become the world’s largest steel mill by the mid-20th century. The Glenn L. Martin Company built an expansive aircraft manufacturing facility in Middle River in 1929. The plant produced military aircraft during World War II and transitioned to aerospace manufacturing during the Cold War period.

Baltimore’s iconic rowhouses, reputedly the largest concentration of the type in the nation, reflect the city’s economic growth from the mid-19th century into the first decades of the 20th century. The major industrial operations in Baltimore brought job opportunities and drew new European immigrant communities to the city’s neighborhoods. Baltimore’s diversity fostered now-famous local cultural traditions, including painted window and door screens (begun by a Czech grocer in northeast Baltimore) and arabbers, African American street vendors who sell fruits and vegetables from colorful, horse-drawn carts. Towards the end of the 19th century, Baltimore’s first was established by the Chinese immigrant community.

The 20th century brought major redevelopment and policy initiatives that continue to shape the city. Baltimore’s legacy of redlining, coupled with the displacement of African American communities by urban renewal, led to disparities and segregation that continue to affect the lives of residents. Pennsylvania Avenue, a historic hotbed of Black art and entertainment venues, fell victim to this racially led disenfranchisement. Renewed efforts to recreate a cultural district were successful, and in 2019, the Pennsylvania Avenue Black Arts and Entertainment District was officially designated by the Maryland State Department of Commerce. The renewal of Charles Center in the late 1950s and 1960s drew the attention of urban planners nationwide. An expansion of that initiative transformed the Inner Harbor from a defunct former port to a major tourist attraction.

Upper Bay Snapshot

The Upper Bay region was historically occupied by Susquehannock settlement prior to European colonization. After colonization, the region became known for its ties to southeastern Pennsylvania, and themes such as industry and natural resources relating to the Susquehanna River.

The region around the head of the Chesapeake Bay had strong ties to southeastern Pennsylvania, as shown in its early to mid-18th century architecture. Eighteenth-century houses in the region retain distinctive plan features that recall William Penn’s instructions to Quaker settlers. Early towns of Joppa (est. 1712) and Charlestown (est. 1742, originally styled Charles Town) became early centers of commerce and transportation.

The Susquehanna River provided a natural transportation route that facilitated industry. The Principio Furnace was established near the confluence of the river and the Bay in 1719. In Port Deposit, granite was quarried and shipped before the town’s incorporation in 1824. The town’s architecture (and even sidewalks) reflects the prevalence of the material. The nearby town of Havre de Grace also has rich associations with transportation, including the Susquehanna and Tidewater Canal (opened 1840) and two of the bay’s oldest lighthouses (Concord Point, 1827, and Turkey Point, 1833). The Susquehanna River also provides power for one of the largest non-federal hydroelectric plants in the nation at Conowingo Dam, which began operation in 1928.

Eastern Shore Snapshot

The Eastern Shore region is characterized by Native American cultural landscapes, an antebellum plantation economy, its seafood industry, and unique recreational opportunities.

Maryland’s Eastern Shore is rich in Native American, African American, and English settler landscapes. Native American heritage includes cultural landscapes and archeological sites, as well as existing communities and cultural traditions (see ICL highlight, p. 20). Internationally significant stories of African American enslavement and liberation include the cultural landscapes connected to Harriet Tubman and modern sites of Civil Rights activism in Dorchester County and Frederick Douglass’s birthplace in Talbot County. Free Black communities include “The Hill” neighborhood in Easton, which developed early, and the village of Unionville, which was founded by returning veterans of the U.S. Colored Troops. Several Rosenwald Schools, such as the San Domingo School and the Germantown School dot the landscape. The region is also rich in 18th and early 19th century buildings that reflect English settlement, such as Almodington in Somerset County (ca. 1750) and the Custom House in Chestertown (ca. 1746).

The seafood industry remains an important part of the identity of communities on both sides of the Bay, despite increasingly problematic economic and environmental issues. Crisfield’s role as the hub of the Chesapeake Bay oyster, crab, and fishing industry in the late 19th century earned it the title “Seafood Capital of the World.” Only accessible by boat, Smith Island boasts unique cultural traditions, including the multi-layered Smith Island cake. Further north, Tilghman Island in Talbot County is prominently associated with the Bay’s iconic fleet of working skipjacks. The ample waterfront on both sides of the Eastern Shore peninsula offers unique recreational opportunities.

Beginning in the 19th century, Betterton and Tolchester offered sandy Bay beaches and resort amenities to white tourists arriving by steamboat from Baltimore. The Atlantic Ocean lured beachgoers as early as the 1830s; hotel development in Ocean City began in the early 1870s. Given its land subsidence and geographic location between two bodies of water, Maryland’s Eastern Shore is particularly threatened by sea level rise.

Southern Maryland Snapshot

The Southern Maryland region is associated with English settlement history, tobacco agriculture, maritime heritage, and federal installations.

In 1634, English settlers arrived at what is now St. Mary's City. They purchased 30 acres from the Yaocomico Branch of the Piscataway Indian Nation and established both the first permanent European settlement and the first capital of the new Maryland colony, widely known for its mandate for religious tolerance. Through European colonization of the Piscataway's ancestral lands, the community members were forced to relocate, some to Canada, and some to North Carolina. A small number remained, although they were no longer unified. It was not until the 1970s when Pan-Indian movement inspired Native American groups all over the nation to reclaim their rights and identities. Out of this, Piscataway descendants saw an opportunity to recover their traditional way of life and started the long process of tribal recognition by the state. Finally, in January 2012 at a ceremony in Annapolis, representatives and leaders were officially recognized by executive order.

Cultivated through enslaved labor, tobacco was the mainstay of Southern Maryland's agricultural economy from the 1600s to the turn of the 21st century, when the state initiated a buyout program to discourage its cultivation. Buildings connected to tobacco farming are quickly vanishing from the landscape due to neglect, obsolescence, and development pressures. Areas like Hughesville still retain some of this architectural heritage.

Southern Maryland's history can also be characterized by its Black history. It is the home of the first person of African descent to serve in a legislature in America: Mathias de Sousa, who was one of the original colonists to arrive on the Ark in 1634. Southern Maryland is also the place where Josiah Henson was enslaved, and the place of brutality he wrote about in his later autobiography, which became the basis for Harriet Beecher Stowe's “Uncle Tom's Cabin.” The region also features Eagle Harbor and Cedar Haven, two of Maryland's historically African American summer resort communities that became popular during segregation.

Southern Maryland contributes to the maritime heritage of the Chesapeake Bay through the seafood industry, boatbuilding, crabbing, and oyster traditions that continue to spur the economy. As in other parts of the state, the proximity of Washington, DC led to the development of federal installations and facilities such as the Patuxent Naval Air Station at Leonardtown, the Navy Recreation Center at Solomons, and the Naval Support Facility Indian Head that contributed significantly to the heritage and economy of Southern Maryland.

According to the Maryland Department of Assessment and Taxation, there are approximately 802,453 standing structures in Maryland built prior to 1967. By contrast, documentation exists for approximately 175,000 historic and archaeological sites, maintained by MHT in its publicly accessible library and database. The return of the Historic Preservation Non-Capital Grant Program in FY 2018 has funded new archaeological and architectural documentation based on strategic survey priorities including: threatened resource types (such as dairy farms), historical or architectural significance (such as the remains of the original fort at St. Mary’s City), and regional needs (such as the Eastern Shore where stressors related to climate change threaten historic resources). However, despite the funding increase, the majority of archaeological and architectural survey efforts continue to be driven largely by the needs of private and government developers. This has resulted in increasing geographic disparity: the areas experiencing the greatest growth and urbanization (e.g., Baltimore City, Montgomery, Prince George’s, Howard, and Anne Arundel Counties) have received most of the survey work. In contrast, western and southern Maryland as well as the Eastern Shore have received significantly less attention and documentation of their historic resources – even though these areas are affected by other challenges such as changing land use (e.g., from agricultural to residential, with the loss of associated buildings and landscapes), disinvestment leading to property neglect, or impacts of climate change (e.g., sea-level rise and coastal erosion).

Although Maryland adopted an aggressive approach to the identification and documentation of historic properties early in the history of the national historic preservation program, the aging of this survey data presents challenges today. For many of Maryland’s counties, the majority of survey work was conducted in the 1970s and 1980s, when professional standards allowed less documentation than required today. Often, early surveys focused on the elite, oldest and most significant resources, leaving many historic sites associated with marginalized communities undocumented and the historical record incomplete. To
address this disparity, MHT has been assertive in seeking federal grants to study places associated with underrepresented communities. Funding has been awarded to document topics ranging from the Civil Rights movement in Baltimore, the women’s suffrage movement, Asian American and American Indian heritage, Rosenwald schools, and the full, diverse history of Chestertown on the Eastern Shore. While this progress is encouraging, MHT will continue to document historic places associated with diverse and untold stories. MHT is currently undertaking a comprehensive study of our Architectural resources within the MIHP. Additionally, staff of MHT’s Office of Research, Survey and Registration strive to maintain communication with municipal and county planning offices to discuss ongoing projects, survey procedures and priorities, and provide guidance. These efforts, combined with public outreach conducted through the Heritage2031 planning process, led to the identification of architectural and archaeological survey priorities listed in this plan.

As of early 2024, there are 43,789 standing structures and 14,888 archaeological sites in the MIHP, 97 Maryland properties designated as NHLs, and 1,834 Maryland sites listed in the National Register. It should be noted that these listings include both individual resources and historic districts, which may encompass hundreds of contributing resources. The total number of resources documented by MHT’s programs exceeds 175,000.

Appendix I: Resources for Underrepresented Communities
In the course of developing *Heritage2031*, participants requested information about contacts and resources to support work by, with, about, and for marginalized communities and communities underrepresented in the historic record. While we have compiled following charts to respond to this request, resources such as these may be helpful to all kinds of projects.

Please note: these are not exhaustive lists. They are accurate as of March 2024 and will continue to be updated on MHT’s website with new resources and funding opportunities. If you wish to be included or know another resource please let us know.

Appendix II: Survey Questions
General Survey

1) On a scale of 1 to 5 (5 being the highest), what aspects of cultural heritage are most important to you?
   a. Ethnic heritage/ancestry/genealogy   e. Cultural landscapes/waterways   h. Historic homes and neighborhoods
   b. Religious heritage and architecture  f. Cemeteries                       i. Historic downtowns/businesses
   c. Lifeways and folk traditions        g. Archaeological sites            j. Historical parks
   d. Historical and cultural museums

2) Please explain your answer. Would you add anything to the list above? If so, why?

3) What do you think is most critical to protect the heritage that matters to you? Select all that apply.
   a. State funding and financial incentives
   b. Local funding and financial incentives
   c. State/local planning
   d. Regulatory programs (e.g., local historic preservation commissions)
   e. Preservation easements
   f. Strong statewide advocates (nonprofits or private individuals)
   g. Strong local advocates (nonprofits or private individuals)

4) Please explain your answer.

5) What do you feel is the largest obstacle facing historic preservation, archaeology and/or cultural heritage preservation?
   a. Climate change/environmental risks
   b. Conflicts around new development
   c. Legislative barriers
   d. Promoting awareness of preservation efforts
   e. Funding
   f. Lack of diversity in the preservation community
   g. Educating the next generation of preservationists

6) Please explain your answer.

7) On a scale of 1 to 5 (5 being the highest), what do you feel is the most important benefit of historic preservation, archaeology and/or cultural heritage preservation?
   a. Strengthens neighborhoods
   b. Strengthens local economies
   c. Helps us connect with our history
   d. Helps us tell our story to future generations
   e. Contributes to quality of life

8) Please explain your answer. Would you add anything to the list above? If so, why?

9) What do you feel can be done to improve the practice of historic preservation, archaeology and/or cultural heritage preservation in Maryland?

10) Is there anything else you'd like to share with us?

Archaeology Survey

1) On a scale of 1 to 5 (5 being the highest), what archaeological research topics would you like to learn more about?
   a. Colonial Era
   b. History/Cultures of Indigenous Peoples
   c. Industrial Era
   d. African American Heritage
   e. Maritime/Underwater
   f. Farmsteads/Agricultural Heritage
   g. Military History (battlefields, fortifications, etc.)
   h. Transportation Networks (railroads, canals, taverns, etc.)

2) Please explain your answer. Would you add anything to the list above? If so, why?

3) What types of archaeology public programming would you like to see provided by MHT or JPPM?
   a. Youth Programs
   b. Workshops
   c. Volunteer Training
   d. Public Excavations
   e. Lectures
   f. Public Laboratory

4) Please explain your answer.

5) What do you feel is the most important issue or obstacle facing Maryland archaeology and/or archaeological sites?
   a. Funding for a wide range of projects
   b. Climate change/environmental risks
   c. Lack of diversity in the archaeological community
   d. Development pressure
   e. Communicating information to the public
   f. Finding the next generation of archaeologists
   g. Artifact hunting

6) Please explain your answer.

7) On a scale of 1 to 5 (5 being the highest), what do you feel is the most important benefit of archaeology in Maryland?
   a. Provides information about people without historical records
   b. Shows changes in environment
   c. Link between present and past
   d. Records our stories for the future
   e. Strengthens ties to social/local heritage
   f. Local economy/tourism
   g. Supplements/tests historical knowledge

19) Please share funding sources outside of those above that have been particularly helpful to your museum (i.e., other state programs or national programs).

20) Closing thoughts

1 Strongly Agree  2  3  4  5 Strongly Disagree

Museums are well-supported by Maryland state programs.
There are sufficient technical assistance programs and funding sources for Maryland museums:

21) My museum's biggest challenges are:

1 Biggest Challenge  2  3  4  5  6 Not a Major Concern

Funding for operations/staffing
Increased cost of materials
Caring for the collection(s)
Marketing and visitation
Building maintenance
Board engagement & diversity

22) Please share additional thoughts here.
Is the building that houses your museum's primary exhibit and/or majority of collection historic (50+ years)?

- Yes: 81%
- No: 14%
- Other: 5%
Annual Operation Budget vs Professional Paid Staff

For $0-$25k, 9 organizations had no paid staff. For $26k-$50k, 4 organizations had no paid staff members and 2 had 1-5 paid staff members. For $51k-$100k, 4 organizations had 1-5 paid staff members. For $101k-$250k, 1 organization had no paid staff and 8 organizations had 1-5 paid staff members. For $101k-$250k, 1 organization had no paid staff and 8 organizations had 1-5 paid staff members. For $251k-$500k, there was 1 organization with 1-5 paid staff members, 1 organization with 6-10 staff members, and 1 organization with 11-24 paid staff members.

For $501k-$1M, 2 organizations had 6-10 paid staff members.

For budgets greater than $1,000,000, 1 organization had 6-10 paid staff members, 1 had 25-50 paid staff members, and 1 had more than 50 paid staff members. For budgets greater than $3,000,000, 1 organization had more than 50 paid staff members.
For organizations with no permanent staff members, 10 had lower than 1000 visitors, 3 had 1,000-5,000 visitors, and 1 organization had 20,001-25,000 visitors. For organizations with 1-5 permanent staff members, 4 had lower than 1000 visitors, 3 had 1,000-5,000 visitors, 4 had 5,001-10,000 visitors, 2 had 10,001-15,000 visitors, and 2 had 20,001-25,000 visitors. For organizations with 6-10 permanent staff members, 1 had lower than 1000 visitors, 1 had 1,000-5,000 visitors, 1 had 20,001-25,000 visitors, and 1 had 25,001-30,000 visitors. For organizations with 11-24 permanent staff members, 1 had 30,001-35,000 visitors. For organizations with 25-50 permanent staff members, 1 had 100,000+ visitors. For organizations with more than 50 permanent staff members, 1 had 75,001-80,000 visitors and 1 had 100,000+ visitors.
Appendix III: Directory of Key Statewide and Regional Agencies and Organizations
ARCHAEOLOGICAL SOCIETY OF MARYLAND

ASM conserves and records Maryland’s archeological resources and fosters bonds between avocational and professional archeologists. ASM’s chapters include: Anne Arundel, Central, Charles County, Eastern Shore, Mid-Potomac, Monocacy, Northern Chesapeake Archaeological Society, St. Mary’s, and Western Maryland.

CHESAPEAKE CONSERVANCY

Chesapeake Conservancy is a nonprofit that ensures the Chesapeake Bay is accessible for all and is somewhere wildlife can thrive. They serve as a catalyst for change, driving innovation, and empowering the conservation community with access to the latest data and technology.

COUNCIL FOR MARYLAND ARCHAEOLOGY

The Council for Maryland Archeology, an organization for professional archeologists working in or interested in archeology in Maryland, fosters public awareness, concern, and responsibility for the conservation of Maryland’s archeological resources.

HISTORIC ST. MARY’S CITY FORT TO 400 COMMISSION

The Commission coordinates programming for the 400th anniversary of Maryland’s founding.

EASTERN SHORE LAND CONSERVANCY

The Eastern Shore Land Conservancy is a nonprofit within the charitable division of the office of the Secretary of State of Maryland. Currently, the staff and Board of Directors manage the Conservancy with five committees. They also have a large corps of volunteers through the Volunteer Land Steward program, who also help with outreach, trail maintenance, and more.

MARYLAND 250 COMMISSION

The Commission will develop an inclusive observance of the 250th anniversary of our nation’s founding, recognizing Marylanders’ struggle for life, liberty, and the pursuit of happiness. Programming is expected to begin in 2024 and last through 2027.

MARYLAND ADVISORY COMMITTEE ON ARCHAEOLOGY

The Committee advises and assists the MHT archaeology program and reviews policies, plans, rules, and regulations concerned with archaeological matters. The Committee’s members are appointed by the Governor with the advice and consent of the Senate.

MARYLAND ARCHAEOLOGICAL CONSERVATION LAB

The MAC Lab is an archaeological facility located at JPPM, holding archaeological collections recovered from land-based and underwater projects throughout Maryland. The MAC Lab also has a number of major collections given by private donations to MHT, which are available for research, education, and exhibit purposes to students, scholars, museum curators, and educators.

MARYLAND ASSOCIATION OF HISTORIC DISTRICT COMMISSIONS

MAHDC provides advocacy, training, and program support for historic districts, local governments, commissioners, and historic property owners. By working together, they feel that Maryland’s historic district commissions can help one another become more effective protectors of historic resources.

MARYLAND CENTER FOR HISTORY AND CULTURE

Previously the Maryland Historical Society, MCHC is the state’s oldest continuously operating cultural institution, with 350,000 objects and 7 million books, documents, manuscripts, and photographs on site. MCHC serves as a leader for history education for all ages, with educational programming like Virtual Field Trips, workshops, and professional development all with the goal of inspiring critical thinking, creativity, and community.
MARYLAND COMMISSION ON AFRICAN AMERICAN HISTORY AND CULTURE

MCAAHCC educates Maryland citizens and visitors about the significance of the African American experience in the state by to discovering, documenting, preserving, collecting, and promoting Maryland’s African American heritage. They also provide technical assistance to institutions and groups with similar objectives and co-administer the AAHPP, which provides funding for capital projects.

MARYLAND DEPARTMENT OF HOUSING AND COMMUNITY DEVELOPMENT

DHCD promotes and preserves homeownership, creating innovative community development initiatives. Through various designation and incentive programs such as Main Street Maryland, Community Legacy, Sustainable Communities, and the Maryland Homeowner Assistance Fund, DHCD has invested millions of dollars in historic communities and has empowered thousands to become homeowners.

MARYLAND COMMISSION ON CLIMATE CHANGE

The Maryland Commission on Climate Change has members representing state agencies and legislature, local government, business, environmental non-profits, organized labor, philanthropic interests, and the state university system. Their work is supported by eight working groups, one of which, the Adaptation and Resiliency Working Group, MDP (including MHT) serves on.

MARYLAND DEPARTMENT OF NATURAL RESOURCES

DNR leads Maryland in securing a sustainable future by preserving, protecting, restoring, and enhancing the state’s natural resources. In addition to direct stewardship of historic and archeological sites (including its Resident Curatorship Program), DNR’s programs that most impact cultural resources include their coastal programs, the Maryland Park Service, the Rural Legacy Program, and Working Waterfronts.

MARYLAND HERITAGE AREAS COALITION

The Coalition consists of 13 heritage areas in Maryland, each defined by a distinct focus or theme. These distinctive places bring together individuals, businesses, non-profits, and governments to form partnerships to preserve Maryland’s historic sites and towns, natural landscapes, and enduring traditions by supporting the economic well-being of the state’s communities.

MARYLAND COMMISSION ON INDIAN AFFAIRS

MCIA serves the interests of Native American communities in Maryland by aiding in the process of obtaining state and/or federal recognition. They promote awareness and better understanding of the historic and contemporary contributions of Native Americans and assist state, local, and private agencies in providing resources to address the educational, social, and economic needs of Maryland’s Native American communities.

MARYLAND ENVIRONMENTAL TRUST

The Maryland Environmental Trust, a unit of DNR, works with landowners, local communities, and citizen land trusts to protect Maryland’s landscapes and natural resources by providing direct assistance, information, and innovative tools to ensure the ongoing stewardship of these resources. As one of the oldest and most successful land trusts in the country, they hold more than 1,100 conservation easements preserving more than 140,000 acres statewide, some of which are held in partnership with MHT.

MARYLAND HISTORICAL TRUST

MHT is the state agency dedicated to preserving and interpreting the legacy of Maryland’s past. Through research, conservation, and education, MHT assists the people of Maryland in understanding their historical and cultural heritage. Part of MDP, MHT serves as Maryland’s SHPO pursuant to the National Historic Preservation Act of 1966. In addition to its administrative office in Crownsville, MHT includes JPPM in St. Leonard, which houses the MAC Lab.
MARYLAND HUMANITIES
Maryland Humanities creates and supports bold experiences that explore and elevate shared stories, connecting people, enhancing lives, and enriching communities. Maryland Humanities intersects with cultural heritage in a number of ways, most notably through oral history projects, Maryland History Day, and the Museum on Main Street program (a collaboration with the Smithsonian Institution).

MARYLAND STATE ARCHIVES
The Maryland State Archives serves as the central depository for government records of permanent value. Its holdings date from Maryland's founding in 1634, and include executive, legislative, and judicial records; county probate, land, and court records; church records; business records; state publications and reports; and special collections of private papers, maps, photographs, and newspapers.

MARYLAND STATE ARTS COUNCIL
The Maryland State Arts Council ensures everyone has access to the transformative power of the arts by sponsoring Arts and Entertainment Districts, which are frequently located in historic communities. They are also home to Maryland Traditions, the state's folklife program working to identify, document, support, and present Maryland folklife through grants, awards, and programming.

MARYLAND MUSEUMS ASSOCIATION
MMA is an alliance of institutions that collect, hold, interpret, and protect the material and cultural heritage of the Free State. They advocate for state museum funding, equity in the profession, and authentic interpretation of our shared histories in service of increased cultural understanding.

MARYLAND RESILIENCY PARTNERSHIP
The Maryland Resiliency Partnership collaborates with public and private partners to leverage funding, personnel, and projects to support efforts that integrate hazard mitigation, floodplain management, and coastal and climate resiliency.

RURAL MARYLAND COUNCIL
The Rural Maryland Council brings together citizens, community organizations, and government officials, as well as the for-profit and non-profit sectors, to collectively address the needs of rural Maryland communities. They provide a venue to cross traditional boundaries, share information, and address in a more holistic way the special needs and opportunities in rural Maryland. Their funding has supported historic preservation, agricultural preservation, and related technical assistance.

NATIONAL PARK SERVICE
NPS preserves natural and cultural resources through several programs such as the Rivers, Trails and Conservation Assistance program and their State, Tribal and Local Plans & Grants division, which manages multiple grant programs. The Chesapeake and Ohio Canal National Historical Park, Antietam National Battlefield, and the Harriet Tubman National Historical Park are some of the over 20 NPS sites in Maryland. The agency also maintains interpretive programs like the Captain John Smith Chesapeake National Historic Trail and Chesapeake Gateways.

NATIONAL TRUST FOR HISTORIC PRESERVATION
The National Trust for Historic Preservation is a nonprofit that works to protect significant places representing the U.S.'s diverse cultural experience by taking direct action and inspiring broad public support. National Trust programs and funds that impact Maryland's historic and cultural properties include America's 11 Most Endangered Historic Places, the Bartus Trew Providence Preservation Fund (dedicated to Maryland's Eastern Shore), and the African American Cultural Heritage Action Fund.

PRESERVATION MARYLAND
PM is Maryland's oldest non-profit preservation organization, which revitalizes and reinvests in communities, advocates, and builds the historic trades workforce. One of their marquee programs, the Heritage Fund (a joint program with MHT), helps to support and empower preservation efforts statewide through investment, coordination, training, and direct engagement.
