Maryland's Historic Revitalization Tax Credit provides funds in the form of an income tax credit for repair or renovation work on eligible historic small commercial projects. This document provides instructions for completing each part of the three-part Small Commercial Tax Credit Application. The Maryland Historical Trust (MHT) oversees the certification of historic structures and rehabilitation projects, and the awarding of tax credits.

About the Application

The small commercial tax credit includes a three-part application process. The **Part 1 Application** allows MHT to determine whether a property qualifies as a certified historic structure. The **Part 2 Application** is for MHT to evaluate whether the property owner's proposed rehabilitation work meets applicable rehabilitation standards and thus is eligible for the credit. Lastly, the **Part 3 Application** certifies that the rehabilitation work was completed as approved by MHT in Part 2 and verifies expenses.

Part 1 and Part 2 Applications may be submitted separately and at any time, although submitting Parts 1 and 2 together will expedite review. Part 1 must be submitted before Part 2 because Part 2 cannot be processed until the building is certified as a historic structure.

MHT approval of applications and amendments to applications is conveyed in writing by authorized MHT officials. MHT certification decisions are based on descriptions in application forms. If a discrepancy occurs between an application form and other submitted materials (architectural plans, photographs, drawings or specifications), the application forms shall take precedence. Originals or copies of photographs, architectural plans, drawings and other materials submitted with an application become the property of MHT and may be reproduced without permission. The applicant is responsible for complying with all federal, state and local laws applicable to a project, including, but not limited to, compliance with local zoning, building and safety codes; review by local historic preservation commissions; and compliance with applicable federal, state, and local licensing, permitting and environmental requirements. To qualify for the tax credit, property owners must complete the Small Commercial Application and the Small Commercial Application Checklists.

Historic Preservation Certifications

State income tax credits are available for a "certified rehabilitation" of a "certified historic structure."

Certified rehabilitation is restoration, repair or rehabilitation work undertaken on a certified historic structure:

- Within a 24-month period (selected by the property owner), once approval for the work has been granted by MHT,
- Where qualified expenditures exceed \$5,000 but do not exceed \$500,000, not including expenses that are funded or reimbursed by state or local grants, other Maryland tax credits or state or local financial assistance other than a loan,
- That is in compliance with a rehabilitation plan (see Part 2) that has been approved by MHT; and
- Conforms with the Secretary of the Interior's Standards for Rehabilitation.

Certified Small Commercial historic structure is one of the following:

- Primarily used for commercial income producing purposes
- Rehabilitated as part of a development project to be sold to a homeowner
- Meets the "Targeted Project" criteria as an agricultural building or post-WWII building

AND has at least one of the following designations:

- Individually listed in the National Register of Historic Places (see www.nps.gov/nr/)
- A contributing resource within a National Register Historic District
- A locally designated structure or contributing resource to a local historic district that MHT determines to be eligible for the National Register
- Located within and certified as contributing to the significance of a Certified Heritage Area.

Completing the Application

The applications may be completed electronically with Adobe Acrobat Reader. Please type or print clearly. Illegible applications will be returned. If adequate documentation is not provided, the application will be put on hold until adequate documentation is submitted. Print and mail the completed application form and supplemental materials. (Be sure to print a copy for your records.) Applications may not be submitted by e-mail.

Part 1 – Evaluation of Significance

Part 1 of the Tax Credit Application is used to determine whether a property is a “certified historic structure” (see page 2). Owners of properties that are individually listed in the National Register of Historic Places do not need to complete Part 1. For verification of National Register listing, contact MHT staff or visit <https://mht.maryland.gov/secure/medusa/> and search by your property address or historic district name. National Register properties and districts will have a purple boundary line.

To determine if a structure contributes to the significance of a listed or designated historic district, MHT will apply the Secretary of the Interior’s Criteria for Evaluating Significance within Registered Historic Districts.

Criteria for Evaluating Significance

A structure contributes to the historic significance of a district if its location, design, setting, materials, workmanship, feeling and association adds to the district’s sense of time, place and historical development.

A structure does not contribute to the historic significance of a district if it does not add to the district’s sense of time, place and historical development; or if its location, design, setting, materials, workmanship, feeling or association have been so altered or deteriorated that the overall integrity of the property has been irretrievably lost.

Ordinarily, a structure built within the past 50 years may not be considered to contribute to the significance of a district, unless a strong justification concerning its historical or architectural merit is given or the historical attributes of the district are considered to be less than 50 years old.

Based on documentation provided in Part 1, MHT may issue a certification of non-significance. Certification of non-significance is a judgment that a structure does not contribute to the significance of a National Register or local district, or to a group of structures individually listed in the National Register or under local law, and therefore is not eligible to receive a tax credit under this state program.

Any substantial damage or alteration to a property that occurs after certification under Part 1 and prior to completion and certification under Part 3 must be reported promptly to MHT. Part 1 certifications are valid for five years, after which a new Part 1 must be submitted for any subsequent rehabilitations of the same structure.

Completing Part 1

Application form

This page must be completely filled out and bear the original signature of at least one property owner. If the applicant is not the fee-simple owner of the property, the application must include a written statement from the fee-simple owner that s/he is aware of the application and has no objection to the request for certification.

MHT will notify applicants of incomplete applications or those lacking an original signature and will place them on hold for 30 days until completed. After that, the application, if not completed, will be returned to the applicant without review or denied.

You must check on the form that the property has at least one of the following designations:

- National Register historic district or National Register individual listing
- Local historic district
- Local individual listing
- Pending National Register or local designation (individual or district)

Include the name of the historic district or Certified Heritage Area. Properties that are located in historic districts must be certified by MHT to be contributing resources, as explained above. Properties that are located in Certified Heritage Areas must be certified by the Maryland Heritage Areas Authority to be contributing resources to the Heritage Area. Documentation of the Maryland Heritage Areas Authority certification must be submitted with the Part 1 application.

For local individual listings, a certification request must include a copy of the official local designation notification letter and any documentation that justifies the designation so MHT can determine whether the property is eligible for listing in the National Register. If submitting as a pending National Register district, applicants must include a copy of the draft nomination.

Targeted Structures

If your property meets the definition of one of the following, you must check the applicable targeted structures box:

- Agricultural structure means a certified historic structure that is used or ever was used to directly contribute to the production, conversion, processing, storage, sale, or management of agricultural products such as livestock, horses, poultry, crops, trees, shrubs, plants, and other vegetation, or aquaculture.
- Post-WWII structure means a building that was constructed between December 31, 1944 and January 1, 1970.

Description of Physical Appearance

Provide information about the current condition of the structure's major exterior and interior features. Note the architectural style, exterior construction materials (wood, brick, etc.), type of roof (flat, gabled, hipped, etc.), number of stories, basic plan (rectangular, irregular, L-shaped, etc.), and distinguishing architectural features.

Fully describe any changes made to the structure since its construction, such as additions, porch enclosures, relocation of doors and windows, or interior alterations. Include a full description of other structures located on the property such as carriage houses, barns and sheds. (See Special Considerations: Multiple Structures on page 6.) In most instances detailed research should not be necessary to provide an adequate description.

Example: This two-story, gable-roofed, unpainted brick structure, rectangular in shape, was constructed in 1921. It features regularly spaced window openings on the first and second floors, 6-over-6 double-hung sash windows and a columned entry portico. On the interior, the first floor is divided by a hall with a staircase and living and dining rooms on either side. The kitchen and butler's pantry are located in the rear. The second floor contains four bedrooms and two bathrooms. There is a garage at the rear of the property that was built at the same time as the small commercial building.

Statement of Significance

If the property is located within a historic district, briefly describe the way in which it relates to buildings in the district in terms of setting, scale, material, construction and age. Note any important people associated with the property, its former uses, or the name of the architect or builder, if known. Again, detailed research should not be necessary.

Example: The district is an intact grouping of architecturally significant late 19th and early 20th century brick row houses. This building is a traditional row house featuring flat brick facades with refined decoration at the doors, windows and cornice. The structure is similar to its neighbors in size, scale, building materials and style.

Attachments

Photographs

Interior and exterior photos showing the entire property before rehabilitation, including those areas where no work is anticipated, must be submitted with the application. (See Photographic Requirements on page 15 for instructions on preparing and labeling photographs.)

Historic District Map

If located in a local historic district, provide an official historic district map defining the boundaries of the historic district, and mark where the structure is located. Maps of locally designated historic districts are available from your local historic district commission or government. National Register designated properties do not need to submit a map.

Fees There is no fee for processing a Part 1 Application.

Mandatory Application Checklist

Complete, date and sign the Part 1 Small Commercial Application Checklist and submit it with the application. Applications submitted without a checklist will not be accepted.

Special Considerations

If the property falls into one of the following categories, additional information may be necessary. Provide this information with the Part 1 materials to avoid processing delays.

Moved Structures

If a structure has been moved from the site of its original construction, or is intended to be moved, a Part 1 applicant must provide additional documentation establishing the:

- effect of the move on the structure's appearance (any proposed demolition, change to the foundation, etc.);
- setting and general environment of the new or proposed site;
- effect of the move on the distinctive historic and visual character of the district or neighborhood to which the structure was or will be moved; and
- method of moving the structure.

Documentation must also include photos showing the current and previous (or proposed) environments, including adjacent structures and streetscapes.

Properties Less Than 50 Years Old

Properties less than 50 years old are generally not considered as contributing to the significance of a National Register or local district. However, such homes may be certified as historic structures if: 1) they are integral parts of an eligible historic district and the historical attributes of the district are less than 50 years old, or 2) they are exceptionally significant. If this consideration applies, provide documentation relevant to establishing one or both of these conditions.

Multiple Structures

Functionally and historically related structures on a single property will be considered a single structure under a Part 1 application. Thus, only one Part 1 application need be submitted. However, documentation, including photos and a statement of significance, must be included for every structure impacted by a contemplated rehabilitation project, and the applicant should state which structures the applicant is submitting for certification as a historic structure. A sketch map or site plan should be provided showing the current relationship of all structures.

If structures are under separate ownership, each owner must submit a separate Part 1 Application.

Part 2 - Description of Rehabilitation Work

A Part 2 rehabilitation plan must be approved and the application certified by MHT prior to the commencement of any of the contemplated rehabilitation work. If a project is considered substantially started by MHT prior to approval, the project will be ineligible for the small commercial tax credit program.

Proposed rehabilitation projects are evaluated for conformance with the Secretary of the Interior's Standards for Rehabilitation. These 10 standards are broadly worded to guide the repair, restoration or rehabilitation of all historic structures, including homes. The standards focus on preservation of significant historic materials and features of structures and apply to both interior and exterior work.

MHT reviews a rehabilitation project in context with all work proposed for the property, including if there is to be any attached or related new construction. Certification is based upon whether the overall project is consistent with the standards.

Upon review, MHT will notify an applicant in writing whether the proposed rehabilitation project is consistent with the standards. If inconsistent, MHT will, to the extent practicable, advise the applicant how the plans might be revised to achieve conformity.

Completing Part 2

Application Form

This page must be completely filled out and bear the original signature of at least one property owner. If the applicant is not the fee-simple owner of the property, the application must include a written statement from the owner that s/he is aware of the application and has no objection to the request for certification.

Incomplete applications or those missing an original signature will be placed on hold for 30 days until completed. After that, the application, if not completed, will be returned to the applicant without review or denied.

Estimated Qualified Rehabilitation Expenditures (QRE)

In order to qualify for the small commercial tax credit, a project's total QRE may not exceed \$500,000. However, only up to \$250,000 of the QREs are eligible for the 20% tax credit (i.e. the credit is capped at \$50,000 for all projects). A project requesting and eligible for the Opportunity Zone credit may receive additional credits. The final credit is calculated based on the final QRE claimed in the Part 3 application (see page 11), which may not exceed the estimate in the Part 2. Therefore the estimated QRE should be as accurate as possible.

QRE are expenditures, up to \$250,000, eligible for tax credits, such as:

- Roof repair and replacement
- Chimney repair and lining
- Window restoration
- New storm doors/windows
- Masonry repointing
- Floor refinishing
- Structural repairs
- Plumbing, electrical and mechanical systems
- Architectural/ engineering/ consulting fees
- Tool/equipment rental
- Repair of historic outbuildings

Examples of expenses not eligible as QRE include:

- Landscaping
- Sidewalks, patios, driveways
- Non-historic outbuildings
- Appliances
- New construction
- Carpeting over historic flooring
- Curtains, blinds, rugs or other interior décor
- Tool/equipment purchases
- Work that is primarily remodeling in nature
- Pest control, chimney cleaning, drain cleaning, etc.

Ineligible expenses must be subtracted from expenditure calculations for the estimated and final QRE. Insurance reimbursements, state/local grants and other state tax credits must be subtracted. Federal funding, such as federal energy tax credits and local historic property tax credits, do not need to be subtracted.

Opportunity Zones

All projects requesting Opportunity Zone funding must submit a map of the Qualified Opportunity Zone with the property location clearly marked. Additional information will be required for final verification and certification at the Part 3.

Detailed Description of Rehabilitation Work

Describe all work to be undertaken on the property, not just the work for which the tax credit will be sought. Describe site work, exterior work, any new construction, and proposed interior work.

Each feature for which work is proposed should be addressed in a separately numbered work item in the application, as provided. First, describe the current condition of the feature. Second, describe the proposed work and impact. Reference by number relevant photographs or drawings where applicable.

EXAMPLE OF REHABILITATION DESCRIPTION

Number 1 Architectural feature: façade brick Approximate date of feature: 1920

Describe existing feature and its condition:

Hard pressed red brick with butter joints in good condition. Mortar mostly sound, but deteriorated and missing around downspouts at east-end of façade.

Photo no. 3, 6 Drawing no. n/a

Describe work and impact on existing feature:

Will selectively hand clean deteriorated joints and repoint with mortar and joint width to match existing (see mortar specifications).

Attachments

Photographs

Interior and exterior photos must be submitted showing the entire property before rehabilitation, including those areas where no work is anticipated. (See Photographic Requirements on page 15 for instructions on preparing and labeling photographs.)

Drawings or sketches

Submit drawings or sketches to show all proposed alterations (such as moving a wall) and new construction. Drawings/sketches must show existing configurations and anticipated changes. Include floor plans and, where necessary, sections and elevations. All drawings and sketches submitted with the application should be numbered and correlated to the application narrative.

Specifications

In some cases, you may need to attach product manufacturer's cut sheets or specifications for items such as windows, doors or roofing materials.

Map

The map of the Qualified Opportunity Zone with the property location clearly marked.

Fees

The Part 2 application fee is \$10. Make personal checks payable to the Maryland Historical Trust. MHT's review of Part 2 application will not begin until the fee has been paid.

Mandatory Application Checklist

Complete, date and sign the Part 2 Small Commercial Application Checklist and submit it with the application. Applications submitted without a checklist will not be accepted.

Notice of MHT Determination

Notice of approval or denial of a Part 2 Application will be made in writing to the applicant by MHT. If the Part 2 application is certified, an initial credit certificate will also be issued. This will indicate the maximum credit that is being reserved for the project and can be claimed at the Part 3 application.

Amendments

If a change must be made to a scope of work approved by MHT under Part 2, the applicant may request approval for the change by submitting an Amendment form. The Amendment form is a separate form available for download on the MHT website. Photographs, drawings and specifications should be attached as needed, and any proposed changes must be reviewed and approved by MHT prior to commencing work.

Special Rehabilitation Concerns

Each historic structure is unique, and therefore rehabilitation projects often involve areas of special concern that MHT must review and evaluate in considering qualification for a tax credit. For technical assistance in preparing a rehabilitation project, see "Interpreting the Standards" at [nps.gov/history/hps/tps/tax/](https://www.nps.gov/history/hps/tps/tax/). Property owners should pay particular attention when undertaking work in any of the areas described below.

New HVAC Systems

Indicate the impact that new heating, ventilation and air conditioning (HVAC) equipment and ductwork will have on historic building materials. Installation of systems that cause damage to the historic materials or visible loss of character may not be certified.

Replacement Windows

Owners are strongly encouraged to retain and repair historic windows. Indicate the condition of existing windows (sash, glazing, muntins, etc.) and the reasons for considering replacement. Detailed photographs must be provided to document deterioration. Where replacement of existing windows appears justified by supporting documentation, the replacement sash should match the original in material, size, pane configuration, trim details, and planar and reflective qualities.

Interior Partition Alteration and Plaster Removal

Indicate the existing interior condition, document with photographs and identify walls that are to be altered or removed. Owners are strongly discouraged from changing floor plans unnecessarily, removing repairable historic plaster, or exposing masonry surfaces, unless the change is supported by historical evidence.

Exterior Masonry Repair

Indicate deteriorated areas that require repair and provide evidence that repointed mortar will match the original in composition (e.g., ratio of lime, cement, sand, and any additives), color, texture and tooling. Owners are encouraged to only repoint those portions of masonry that require repair.

New Additions and New Construction

New exterior additions may alter the appearance and form of historic structures and may not be certified. Similarly, new construction, including site work, may change the relationship of a structure to its site, alter the historic landscape, or otherwise damage the historic character of the property or the district. Applicants are strongly encouraged to plan additions that are compatible with the historic materials, features, size, scale and massing of the property and its environment.

Remodeling Only

Projects that involve exclusively cosmetic repairs to otherwise functional or non-historic spaces like kitchens and bathrooms may not be eligible.

Part 3 – Certification of Completed Work

A rehabilitation project is not eligible for the Historic Revitalization tax credit until it is certified by MHT. Upon completion of the rehabilitation, the owner must submit a Part 3 Application with required documentation. Completed projects may be inspected by an MHT representative to determine if the completed work meets the Secretary of the Interior's Standards for Rehabilitation.

Application Form

This page must be completely filled out and bear the original signatures and social security numbers of all owners. Use additional space on page 2, if necessary. Incomplete applications or those missing original signatures will be held for 30 days until completed. After that, the application, if not completed, will be returned to the applicant without review or denied.

Pending Listing

If the Part 1 certification request was for a pending National Register listing or local designation, provide verification of the final listing or designation. Verification may include a copy of the letter from the National Register of Historic Places or the local government confirming that the property, or the district within which the property is located, has been listed/designated.

Project Timeline

Provide the dates (MM/DD/YY) when the project started and was completed. Only expenditures incurred within a 24 month period may qualify for the tax credit. The start of the 24 month period is typically the project start date or the date of payment for pre-rehabilitation "soft" costs (e.g. consultant fees, architectural fees, deposits, etc.).

Accounting of Itemized Expenses

A written accounting of all project expenses, organized chronologically and with supporting documentation, must be submitted with your Part 3 application. MHT strongly recommends that, to facilitate our review of your application, you should use the Part 3 Itemized Expense Sheet provided on our website. This spreadsheet must be filled out according to the Part 3 Itemized Expense Sheet Instructions, with eligible and ineligible expenses clearly delineated. For each item on the spreadsheet, you must include (1) a copy of the invoice or receipt, showing which goods or services were purchased, and (2) certifiable proof of payment, which may consist of one of the following:

1. A dated credit card receipt
2. A cancelled check
3. A bank statement showing the check number, date, payee name, and amount
4. A signed statement from the contractor or vendor stating: (1) the amount paid, (2) services rendered / materials purchased, and (3) date of payment. An invoice simply marked "PAID" is not sufficient. This will only be accepted for payments made in cash.

Please submit copies of the proof of payment with sensitive information and account numbers redacted or blacked out for security purposes.

The Part 3 Itemized Expense Sheet Instructions contain an example spreadsheet that shows how your expenses must be broken down and itemized for the purposes of calculating your qualified rehabilitation expenditures for the tax credit program. The instructions and a blank spreadsheet for you to fill out can be downloaded from MHT's website.

Please note that separate blank spreadsheet templates, and separate instructions, are provided for buildings which are strictly homeowner-occupied and for buildings which are mixed-use, i.e. have an income-producing component.

Calculation of Qualified Rehabilitation Expenditures (QRE)

The Part 3 Itemized Expense Sheet Instructions will guide you in filling out the spreadsheet and calculating your Qualified Rehabilitation Expenditures. The spreadsheet allows you to break down all expenditures into eligible costs, ineligible costs, and (in the case of mixed-use properties) calculate eligible shared costs. Ineligible funding sources such as insurance reimbursement funds are then subtracted from the total eligible costs to arrive at the QRE for the project, 20 percent of which, up to a maximum of \$50,000, is the tax credit for the project.

Opportunity Zone Tax Credits

A Level 1 Opportunity Zone project must be completed by a Qualified Opportunity Zone Business that must provide the following information:

- The date of the Qualified Opportunity Fund's investment in the Opportunity Zone Project and the amount of the investment;
- The total project or business investment including any leverage;
- The address and census tract of the Qualified Opportunity Zone Business and the Qualified Opportunity Fund;
- The North American Industrial Classification System Code for the Qualified Opportunity Zone Business;
- An impact report, including both qualitative and quantitative data on the Qualified Opportunity Fund's investment in the Opportunity Zone Project and its progress; and
- Any other information requested by the Director.

A Level 2 Opportunity Zone project must be completed by a Qualified Opportunity Zone Business that must provide the following information:

- All requirements for the Level 1 Opportunity Zone project (listed above);
- Accountability to residents of the communities in the Qualified Opportunity Zone is maintained through their representation on any governing board or any advisory board of the Qualified Opportunity Zone Business; or
- A Community Benefits Agreement is negotiated and agreed to by community groups or strategic industry partnerships, as defined under §11-701 of the Labor and Employment Article, in the Opportunity Zone and the Qualified Opportunity Zone Business that specifies a range of community benefits that the business agrees to provide as part of the development project; and
- For an Opportunity Zone Project located entirely within a municipal corporation, the municipal corporation, by resolution or by letter, delivered to the Director by the municipal corporation's authorized designee, approves the provision within the municipal corporation of the enhanced tax credits under this section; or
- For an Opportunity Zone Project that is not located entirely within a municipal corporation, the County, by resolution or by letter, delivered to the Director by the County's authorized designee, approves the provision within the County of the enhanced tax credits under this section.

Final Review Fee

A Part 3 Application fee is required for application review. The fee is 3% of the tax credit amount based on the Estimated or Final Qualified Rehabilitation Expenditures, whichever is greater, minus the \$10 Part 2 Application Fee. Make personal checks payable to the Maryland Historical Trust.

- **If Part 3 final QRE matches the estimated Part 2 QRE: $((\text{Part 3 QRE} \times .20) \times .03)$ - \$10 = final review fee**

- **If Part 3 final QRE is lower than the estimated Part 2 QRE: $((\text{Part 2 QRE} \times .20) \times .03)$ - \$10 = final review fee**

- **If Part 3 final QRE includes additional Opportunity Zone credits:**

- **Level 1: $((\text{Part 2 QRE} \times .25) \times .03)$ - \$10 = final review fee
(maximum eligible QREs of \$220,000; maximum credit of \$55,000)**
- **Level 2: $((\text{Part 2 QRE} \times .275) \times .03)$ - \$10 = final review fee
(maximum eligible QREs of \$218,181.82; maximum credit of \$60,000)**

Photographs

Interior and exterior photographs must be submitted showing the entire property after completion of the rehabilitation, including those areas where no work was undertaken. Photographs must be current to when the application is being submitted. MHT will not accept photographs older than 90 days of when the application was received. (See Photographic Requirements on page 15 for instructions on preparing and labeling photographs.)

Mandatory Application Checklist

Complete, date and sign the Part 3 Tax Credit Application Checklist and submit with the application.

Claiming the Credit

Applicants must claim the credit for the taxable year in which the rehabilitation project was completed. Maryland tax form 502S must be completed and submitted with your state income tax return along with the approved MHT Certification Application (Part 3). The 502S form is available at taxes.marylandtaxes.com

Credit Recapture

If disqualifying work is undertaken on the property within five years of claiming the credit, a portion of the credit must be recaptured as follows.

YEAR SINCE CREDIT CLAIMED	CREDIT RECAPTURE
1	100%
2	80%
3	60%
4	40%
5	20%
	0%

Photographic Requirements

The following photographic requirements must be followed.

Part 1

Include photographs of the building site and immediate surroundings (i.e. landscaping, etc.), all sides of the building, all major interior spaces and features, and representative secondary spaces, e.g. basements or bathrooms. Sides that are partially blocked by adjacent structures or trees may require photographs taken from several different angles or locations for complete documentation. Photographs of interior spaces should be taken with a wide angle from diagonally opposite corners of the room, capturing as much of the floors, walls, and ceiling as possible.

This baseline photo documentation is necessary for MHT to evaluate the historic and/or architectural significance of a structure and the effect of proposed changes on the structure's significance. It also enables MHT to verify that no additional work is completed without prior review and approval. MHT must approve all work on the property. Insufficient photo documentation of exterior or interior features may delay assessment or result in a denial. MHT will not accept photographs more than 90 days old at the time the application is received.

Part 2

If submitting Parts 1 and 2 together, only one set of baseline photographs is necessary. In addition to the Part 1 baseline photographs, Part 2 applications must include photographs of areas of proposed work. Detailed close-up photographs of architectural features affected by the proposed rehabilitation, such as windows, doors, balustrades, trim, etc., may be needed. In some cases, it may be helpful to mark directly on the photographs the areas of proposed work. Submitting representative photographs of multiple features, such as windows, is acceptable, provided that the photographs adequately capture conditions throughout the structure.

Part 3

Photographs taken of the completed rehabilitation should depict the same views as the pre-rehabilitation photographs submitted with Parts 1 and 2, including for those areas where no work was undertaken. A side-by-side comparison of pre-rehabilitation and post-rehabilitation photographs is part of MHT's certification assessment.

Labeling of Photographs

On the back of all submitted photographs include the sequential photograph number (that should be used for reference in the application narrative), the photo date, the property address, the view (e.g., east elevation), and a brief description of what is shown, as follows:

Photo# 5

5/1/2019

**311 Maple Street
Annapolis, 21401**

East façade- deteriorated brick and windows before rehabilitation

Color photographs must be printed on 4" x 6" photo paper. Photocopies of photographs will not be accepted. Stack all photos in order and secure with a rubber band or clip. Please do not mount, tape, glue or otherwise secure photographs to the application, as these photographs will be returned.

Questions?

**Still not sure how to submit? Contact Bonnie Baden:
bonnie.baden@maryland.gov or (410) 697-9535**
