<b>Architectural/Landscape feature: 2<sup>nd</sup> Floor Bathroom</b>	<b>Describe, in detail, the proposed work and impact on existing feature:</b>	
<b>Approximate date of feature: 1917/Early 2000's</b>	<b>Be sure to include details and specifications on proposed products</b>	
<b>Describe existing feature and its condition:</b>	<b>Photo no. 1-9</b>	<b>Drawing no. 1 &amp; 2</b>
Original second floor bathroom is outdated and in need of renovation. The bathroom was last renovated in the early 2000's. At that time, the south wall between the middle bedroom and the bathroom was moved to accommodate a larger shower. Walls are a mixture of mostly drywall and some lath and plaster in poor condition. The original flooring was removed and replaced with tile on a plywood subfloor. No original fixtures remain. The bathroom does retain its original trim, door, and built-in medicine cabinet.	All fixtures will be removed. The radiator will remain. All drywall and deteriorated plaster will be removed to expose framing. The south wall will be demolished and returned to its original location. The modern tile flooring will be removed. A new hex tile floor will be installed. Moisture resistant drywall will be installed on the walls and ceiling. The original door, trim, and medicine cabinet will be stripped and stained to match its original appearance. An embossed wallpaper dado will be installed around the room and will be painted white. Walls will be painted light grey. Period appropriate fixtures will be installed in the same locations as the existing. Please see attached documentation.
