

ABSTRACT

AL-IIA-138

MASON-DIXON LINE: MILESTONE NO. ---(159)
Flintstone, Maryland vicinity
Public/private

1766/1767 (area surveyed/marked)
1902 (new monument set at
additional site)

Milestone No. ---(159) marks an additional point on Mason and Dixon's West Line about 6200 feet from the preceding monument/mound, No. ---(158) on Tussey Mountain ridge, close to 149 miles west of the northeast corner of Maryland, the beginning of their 230.228-mile West Line, ^{the boundary later known as the Mason-Dixon Line.} It is a dressed magnesian limestone post with a low pyramidal top; quarried and carved at the Beaver Dam Quarry in Cockeysville, Maryland; measured about 10 inches square by about 4½ feet long, cut to stand about 1½ feet above ground with the remainder for setting into the ground. It is in excellent condition, unaltered, firmly set, and is embellished only with the capital letter P on the north side facing Pennsylvania, the year of the preliminary Mason and Dixon survey in this area (1766) on the east side, the capital letter M on the south side facing Maryland, and on the west side the year it was added to the Line (1902) during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary. On the national and state levels, this monument is significant primarily as one of the thematic group series of some 248 markers still visually defining the West Line. Locally, as one of 37 markers along the present Allegany/Fulton-Bedford-Somerset county boundary, No. ---(159) is also significant for its identifiable relationship to the colonial and Civil War heritage of these counties.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Milestone No. ---(159) was a new, dressed Cockeyville marble post in 1902 when set at an additional site on Mason and Dixon's West Line during the course of the 1900-03 Resurvey of the Maryland-Pennsylvania boundary. It measures 10 inches square by about 1½ feet above ground with a low pyramidal top; is in excellent condition, unaltered, firmly in place; and is embellished only by the capital letter P on the north side, M on the south side, and the year 1766 on the east side, 1902 on the west side.

The area here is the high eastern slope of Martin Mountain (elevation about 1336 feet at the site), with cleared lands along the east foothills, sparse settlement (mostly ^{new houses} strung along Street Road/T-303) and the steep densely forested mountain side west of the road. The site is within Election District 3 of Allegany County, MD, and Southampton Township of Bedford County, PA; about 2½ miles northwest of the village of Flintstone, MD; about 6200 feet from the preceding monument/mound, No. ---(158) on Tussey Mountain ridge; at a point about 500 feet east of Street Road/T-303 at the Line and about 28 feet south of the old pipeline; on a gentle ridge in a deciduous woods, about 75 feet west of a remnant of an old split rail fence corner. It cannot be seen from any road or the pipeline, any season.

The monument, identical to 65 other monuments of 1902 set west of Sideling Hill along the Maryland-Pennsylvania boundary, was quarried and carved at the Beaver Dam Quarries in Cockeyville, MD, originally cut about 4½ feet long, to stand about 1½ feet above ground, with the remaining 3 feet for setting into the ground. The letters and numbers are blocky, V-sunk, without serifs, and are horizontally-aligned as a band near the top, when set straddling the Line with the P to face Pennsylvania. The year 1766 is when this area was preliminarily surveyed by Mason and Dixon; and the M to face Maryland. and the 1902 when this new monument was added. These modest embellishments and the top planes and apex are all clear and intact. There are very small nicks along most edges, and a chip out of the northeast vertical edge.

(see Thematic Group National Register nomination form for full descriptions of the several kinds of new monuments set in 1902 by the 1900-03 Resurvey, and the method of setting them)

STATEMENT OF SIGNIFICANCE

Milestone No. ---(159) is significant on the national and state levels primarily as one of the thematic group series of some 248 markers still visually defining Mason and Dixon's West Line, the 230.228-mile boundary later known as the Mason-Dixon Line, famous for its historical impact and innovative survey methods. This part of the Line was preliminarily surveyed in 1766, cairns and additional wood posts erected in the following year, and the present Cockeysville marble monument added in the vicinity to the Line in 1902 to mark a survey point between Tussey Mountain and Martin Mountain during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary. Locally, as one of 37 markers along the present Allegany/Fulton-Bedford-Somerset county boundary, No. ---(159) is also significant for its identifiable relationship to the colonial and Civil War heritage of these counties.
