

AL-III-B-026

LOCK HOUSE #72

C & O Canal, northwest of Oldtown  
1845

Lock House #72 is a rectangular shaped dwelling built on a high stone foundation and a fairly steep hill. It's now covered with vertical boards and plain battens, although it was originally a log structure. Featured are two original corbeled brick chimneys on the flush ends of the house. During the period 1850 - 1924, the house was occupied by a locktender and his family, whose sole responsibility was to operate the lock for passing canal boats. With the house came also one acre of land for the locktender to use for gardening and the grazing of a few livestock.

**DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE**

Lift-Lock House 72 is located along Route 51 northwest of Oldtown. The house is of rectangular shape built upon a high stone foundation and is two stories tall and two bays wide. In all probability, the original wall construction was log, but the structure is presently covered with vertical boards and plain battens. Windows and doors displaying flat arches are boarded up, but the plain trim is still visible. The roof is gabled and is covered with replaced asphalt materials. A front porch two bays wide is attached to the main dwelling and has a shed roof which is supported by 5 square columns. The porch itself is supported by square beams because the whole structure is built on the side of a fairly steep hill. Two original corbeled brick chimneys lie on each side of the house, specifically described as flush end.

## STATEMENT OF SIGNIFICANCE

Lift Lock Houses along the C & O Canal were built to house the locktender and his family. The locktender was on call 24 hours a day and his job was to maintain and operate his respective lock. 74 locks were built along the 184 mile canal to ascend the 609 foot rise from Georgetown to Cumberland. The canal opened for navigation to Cumberland on October 10, 1850, so the lock houses in Allegany County were probably built in the late 1840's.<sup>1</sup>

The locktender's salary was only \$25.00 a month, but he was granted the lock house to live in and an acre of land for a garden. Many of them also had hogs, chickens, or a cow or two that would also graze on the land.

If a boat approached at night, it was necessary to arouse the locktender. When near the lock, the mule driver would loudly chant, "Lock ready -- Lock ready -- Hey -- ey -- ey, Lock!", and the steersman in the back of the back of the boat would sound off a bugle. The locktender would then signal with a lantern as to whether or not the lock was ready to enter. It took ten to fifteen minutes for a canal boat to clear the lock with help of the boat crew as well as the locktender. This same system was used for all of the 74 years the canal was in operation.<sup>2</sup>

The canal ceased operation in 1924, and many of the locktenders remained in the houses until they found other jobs. Construction materials of lift-lock houses in Allegany County include frame and log with stone foundations. Their use is now limited in this county to public viewing in the C & O Park areas, although specific entrance into them is restricted.

Use - No Longer used  
Significance -  
Date Constructed - 1830-1840  
Condition - Fair - Good

## Key points regarding interior architecture.

## 1. Floor plan

No through hall--How many rooms long and deep?  
Where is stairway? Straight or winding?

With through hall--Rooms on both sides? How many?

Rooms on one side only? How many?

Is stair in through hall?

Open or enclosed? Straight--one run. Straight--landing

How many? Curved.

If not in hall, where is stair?

2. Wall finish: plaster, paneled, board partition  
Note presence of chair rail, cornice, etc.

3. Fireplaces: How many? Parallel to walls or diagonal in corner?

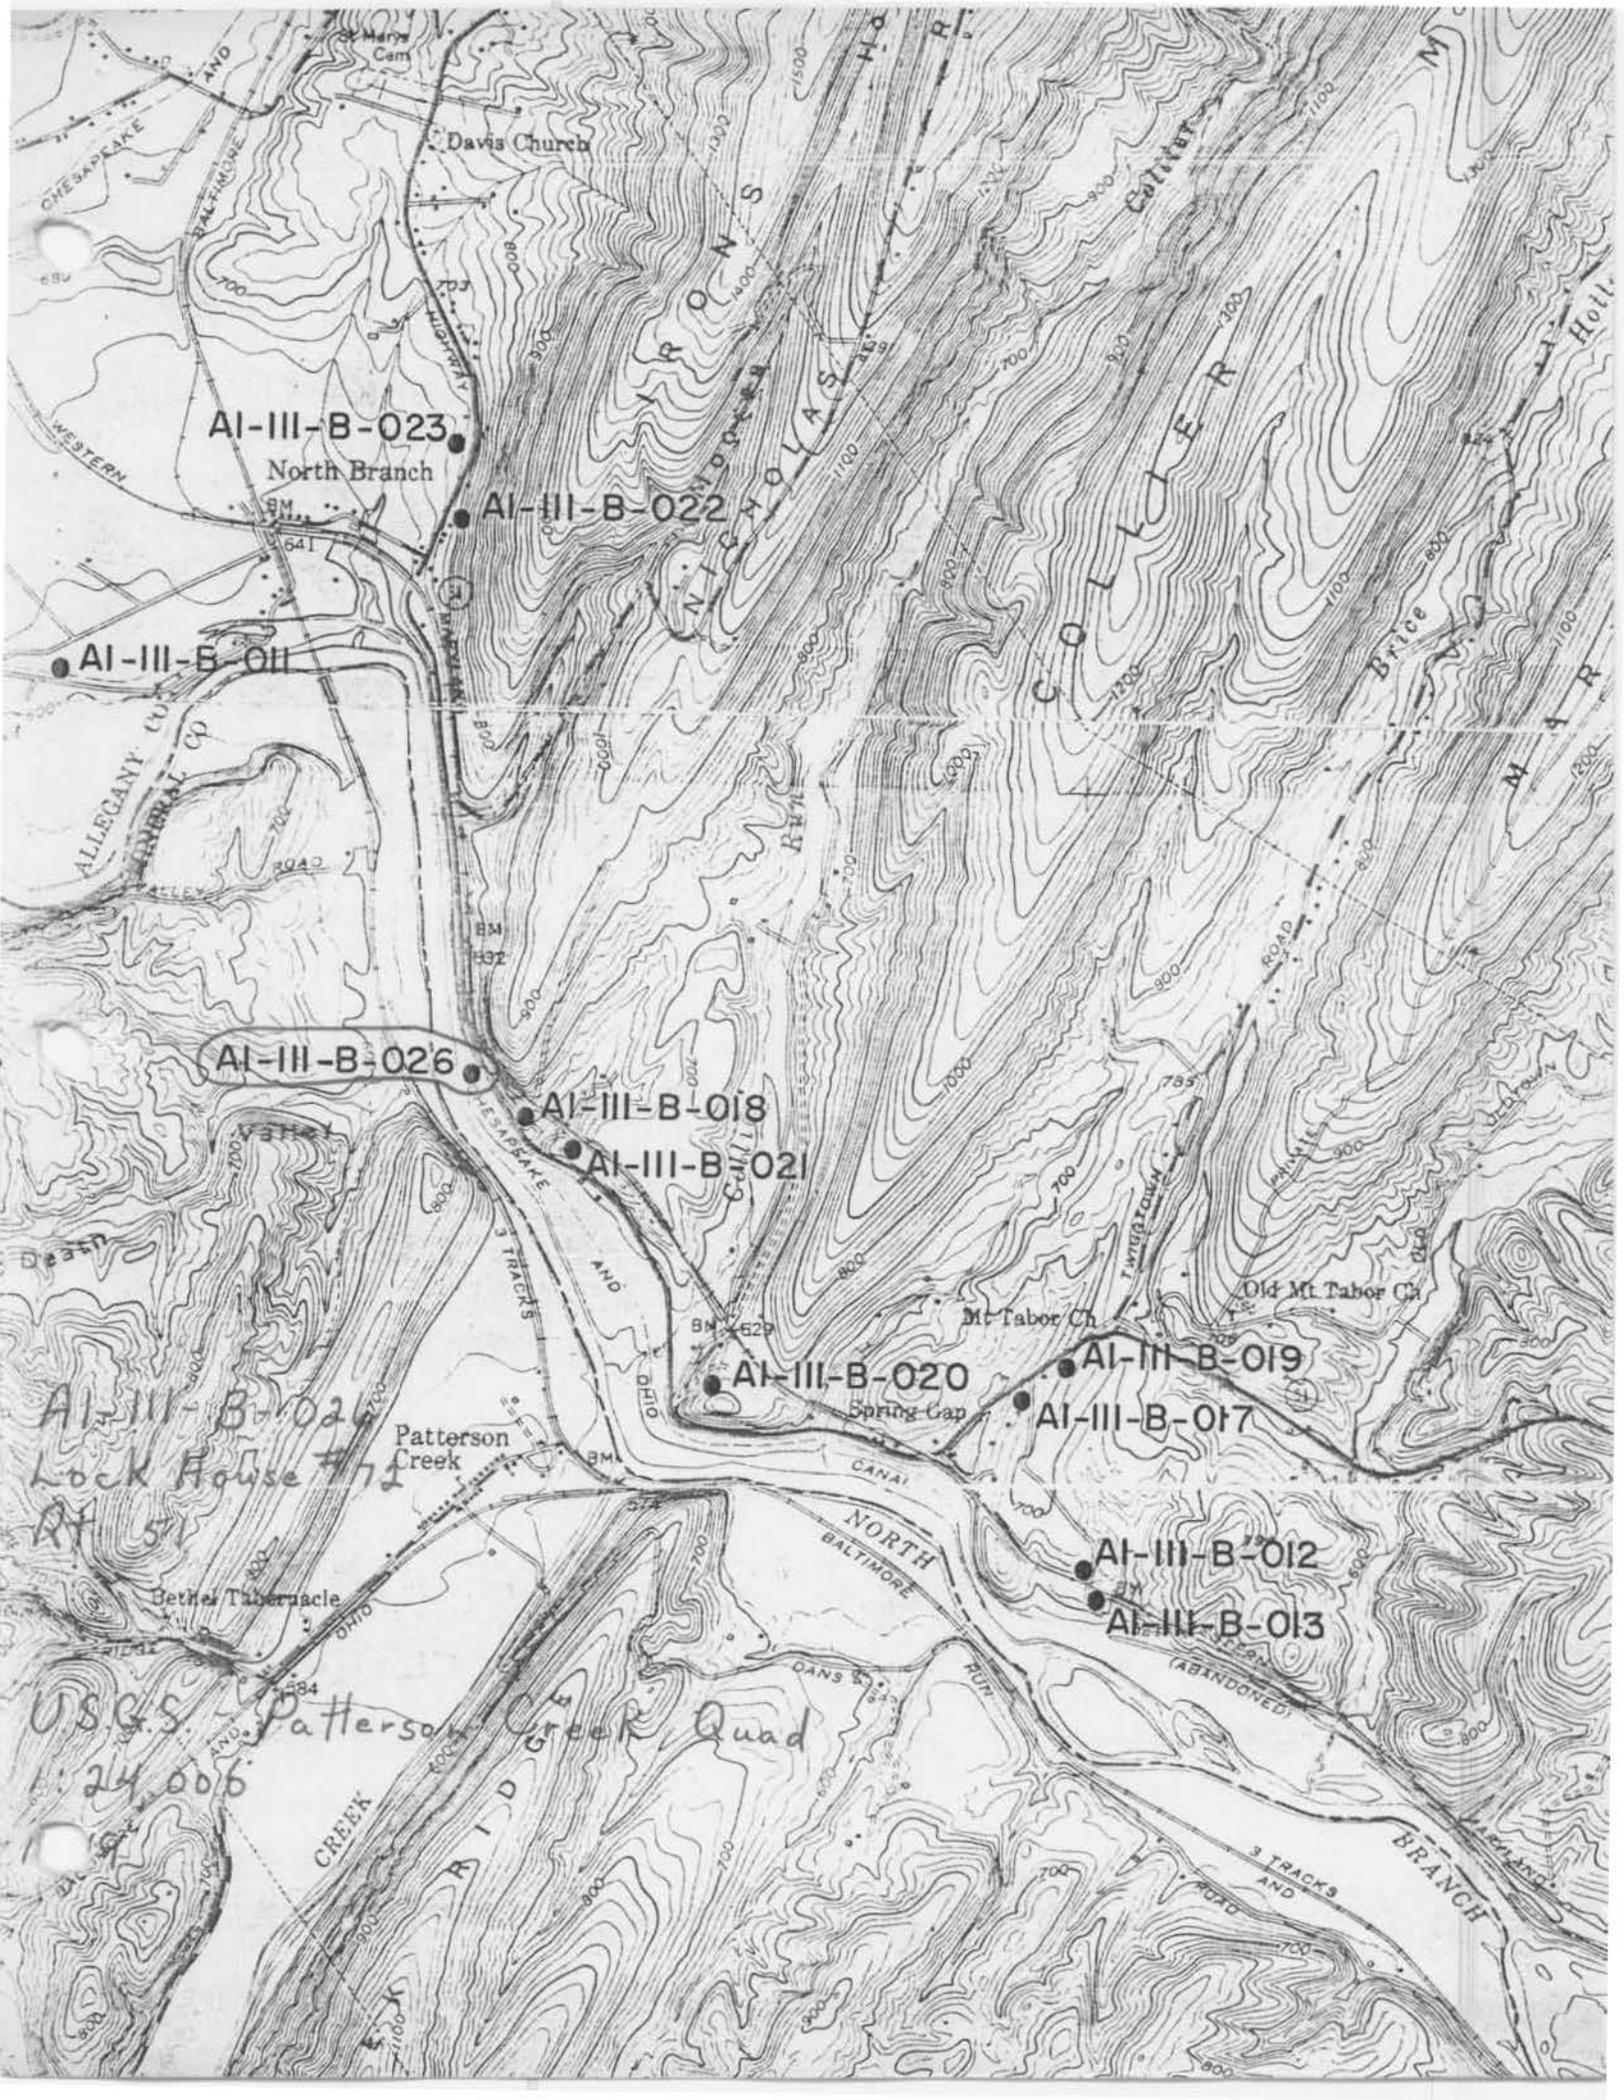

Mantels: wood--mouldings, pilasters, columns  
masonry--marble(what color? ), brick

3. Doors: on the inside of exterior doors, note the presence of applied flush boards and their direction (diagonal, vertical, horizontal). In general are doors paneled or ledge or other?

4. Door and window trim: plain, architrave; fluted, reeded; pilasters

5. Kitchen: Where is original if extant or known (marked by very large fireplace)? Separate building; wing to principal dwelling; within principal dwelling? On which floor of any of the above?

6. Note presence or absence (if any) of any wooden members described
