DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE

The Allegany County Library building stands in the north section of Prospect Square on the northerly side of Washington Street about two blocks west of Wills Creek in Cumberland, Maryland.

The building is a mid-nineteenth century structure in the Greek Revival design, temple form with a mid-seventeenth century wing attached to the west side. The main building is a two and a half story, brick structure with a cut stone foundation, a gable roof, and a portico on the south gable side which is the facade. The exterior walls are broken into sections or bays, each with a window or door openings. There are three bays across the front with a center door and five bays along the side. A brick cornice runs around the east, north, and west sides closing the gable end on the north. The bricks of the facade are laid in Stretcher Bond and those of the other walls in Common Bond (five rows of stretchers and one row of headers). Most of the west wall is covered by the wing. The building has four tie rods with five-point-star end pieces.

The portico is of the Greek Doric order and has a brick floor with cut stone steps stretching the length of the portico. There are six wooden, fluted columns which divide the area into five sections. Only the center section corresponds to the bays of the facade of the building. The second and fifth columns covered the outer front windows. The entablature has a wide architrave, a series of triglyphs and mutules with guttae. The pediment above the entablature is plain. The back of the portico rests on square, brick pilasters with capitals.

The major windows are double-hung wooden sashes with six-over-six lights. The lights measure approximately 11 3/4" x 18 3/4" and the mullions are about 3/4" broad. There is a double casement window with wooden sashes, each with six lights, in the gable on the north end. There are heavy wood entablatures above the major windows and the sills are wooden.

The front entrance has double wooden doors with several lights and a transom with three large lights. The doorway is outlined with a broad, flat trim with crossetts at the top. The trim tapers outward toward the bottom in a manner characteristic of the Egyptian style.

The internal arrangement of rooms varies on each floor. On the first floor there is a short center hall flanked by a stairhall on the west and a small room on the east. The hall opens onto a large room on the north. The large room has four windows on the east side and three along the north wall. The mail staircase is located in the southwest corner and winds up to the second floor with a curve at the bottom and a landing near the top.

STATEMENT OF SIGNIFICANCE

The Allegany County Library building on Prospect Square is significant for its role in the progress of education and for its architecture. The structure was erected about 1849-1850 by Allegany County as a school. Lowdermilk records that it was opened June 8, 1850 (History of Cumberland, Maryland, P.367). The first public school in Western Maryland was built on Fayette Street, however by 1848, this building was no longer adequate for educational needs. In 1848 the County Commissioners appropriated a lot on Washington Street adjoining the jail for the site of a new school. The second academy building was used as a school until 1929.

In 1934, the Cumberland Free Library obtained a lease in perpetuity from the county for the building to use it as a library. The library opened in the new location in June, 1934. The name of the library was changed to Allegany County Library in 1960 when the library system was reorganized.

About 1965 the old jail building to the west was razed to clear the way for construction of an addition to the library. The jail building was a circa 1797 masonry structure which also served as the first courthouse of Allegany County. For a few years prior to its demolition, this building was used by the library as an annex.

Architecturally, the library building is an example of the Greek Revival style that was popular in the United States from about 1820 to about 1860. In the buildings of Western Maryland and Western Pennsylvania, the Greek influence is generally found in the decorative detailing while the building is of an earlier period, usually Georgian. The library building, however, is a Greek temple form structure. The architectural historian Talbot Hamlin found that in the middle-Atlantic states, the Greek temple form was used most frequently for public buildings such as courthouses and schools. The Allegany County Library is a formidable structure on Prospect Square and offers a sharp contrast with the late nineteenth century, Romanesque style courthouse across the street.

#7 DESCRIPTION (Continued)

The balustrade has a round handrail and round balusters. There is narrow verticle board wainscoting along the stairway. The area under the steps is enclosed with a large flat paneling. The stairs to the basement are at the north end of the large room.

Most of the second floor rooms are used as administrative offices. These rooms are arranged around a center hall. The original arrangement of rooms on this floor probably was similar to that of the first floor. A large room in the south east corner is two bays deep and two bays wide and has a fireplace. This room, known as the "Maryland Room," is original to the building. Evidence indicates that this room was originally about the same size as the one below it. The walls and baseboard show signs of early partitions corresponding to those on the first floor. The fireplace is fake and the mantelpiece probably did not originate in this building. The mantel piece with its reeded columns and decoration are more characteristic of the Neo-classical period than of the Greek. It also is more sophisticated than the other trim found throughout the building.

The interior trim around the windows and doorways consists of broad, chamfined verticle and horizontal pieces with plain corner blocks (See sketch). The baseboard is low as are the plinth blocks at the doorways. The few original doors that remain have four flat panels, two large and two small, with trim on the panels on one side only. Most of the doors are recent installations.

The wing attached to the west side is one and a half stories high and of brick and stone construction. The major portion has a hip roof and the entranceway is flanked by plain columns with volute capitals. The corners of the building have stone pilusters and the windows are outlined with stone. The interior is mostly a large room used as stack and reading areas.

PAST:

In Lowdermilk's History of Cumberland, Maryland (1878), the interior of the building is described as having a large room

DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL APPEARANCE

The Allegany County Library is a Greek Temple form building with a hexastyle portico of the Doric order on the front. Although lacking a peripteral colonade (few American Greek Revival buildings are peripteral), the brick side and end walls carry on the entablature and the 6/6 windows (with Greek Revival caps) are set within recesses, the flanking pilasters echoing the columns. Between the second and third storey on these pilasters are four star-shaped tie rod ends. The portico is correct Doric, having full entablature (with metopes, gutae, mutules, etc.) and frieze, fluted columns without bases, and a three step stone stylobate.

A more recent one storey wing is attached to the west side. This has simplified Greek details and is, on the whole, a rather sympathetic addition which does not detract from the older building.

STATEMENT OF SIGNIFICANCE (Include Personages, Dates, Events, Etc.)

The Allegheny County Library is a very fine example of a Greek Revival public building. The inspiration for the Doric portico is the Theseum in Athens [the Theseum was a peripteral building of approximately 46 x 105 feet and had a total of 36 columns, however, the front dimension of the Library must be close to its source and was perhaps taken directly from a book. Asher Benjamin in the 1827 edition of The American Builder's Companion illustrates the Doric order, although his specific example is the Parthenon.] and is identical [all correct uses of the orders are, for all intents and purposes, identical] to the portico which Thomas U. Walter applied to Nicholas Biddle's house, Andalusia, in 1836. The rest of the building is handled well in relation to the front portico.

The Allegheny Library is the key building in the predominantly Greek Revival north side of Prospect Square, and is also a part of a Greek group starting west of the Courthouse. Besides being an excellent example of its style, this most 'civic' building is most suitable to the government square around it.

[Probably built at the same time as the second courthouse, which was 1839-41.]

[Weakly copied by the Christian Science Church across the street.]

(5B.) First Court House and Jail

The first Court House in Allegany County was built in 1799, and also housed the County's first jail. First court was held on April 25, 1791, at the home of John Graham on North Mechanic Street with the Honorable Andrew Bruce presiding. The second meeting of this body was in Faws' Tavern on Greene Street. The court's proceedings were handled in this manner until the first County Court House was constructed in 1799 at its present location next to the library on Prospect Square. The old building, which has recently housed the County Library Annex, is to be razed to make way for an addition to the library. It is a three-story brick affair quite significantly related to the era in which it was built, and its memory should be preserved by a suitable marker.

4. NOTABLE FEATURES, HISTORICAL SIGNIFICANCE AND DESCRIPTION OPEN TO PUBLIC

First County Courthouse and jail was built in 1797 on north-west corner of Prospect Square and Washington Street.

When the County outgrew the building and a larger courthouse was built, the building was used as a private home for years. After the Public Library moved into the Academy building (next-door)--then the building was used as an annex to the Library, with offices and storage rooms.

This building was torn down in 1966 to make an addition to the renovated library, even though the building was structurally very sound. It proved to be quite a chore to tear up the old stone foundation(used for the old jail)-but the wreckers of 1966 accomplished the destruction of another landmark.

.....

SECOND AND THIRD COURTHOUSES---

In 1833 work was begun on the brick building south of the present building. It was enlarged in 1872 and destroyed by fire in 1893. The present brick and stone building was begun the following year. Annexes have been added on both the North and South sides.

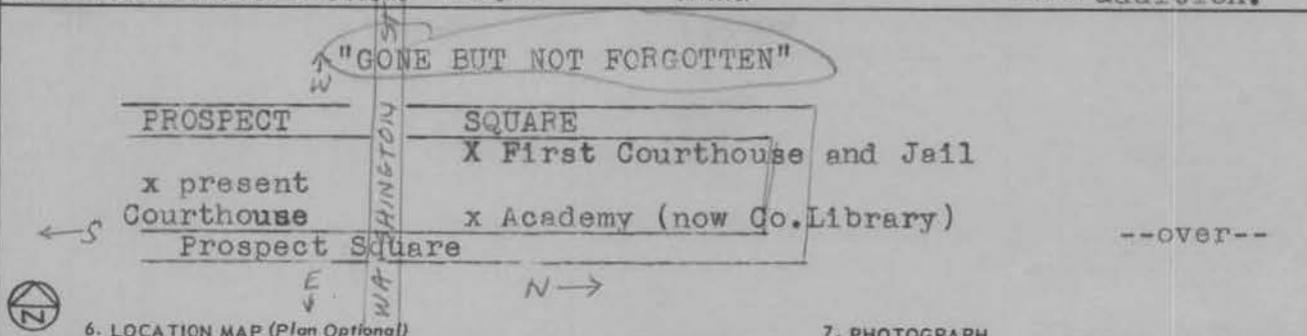

.....

April 25, 1791--first session of Allegany County Circuit Court was held in the home of John Graham. While funds were being raised to build a Courthouse, court was held in Faw's Tavern.

.....

1970 RUMOR has it that the plan is eventually tear down the old Academy building (library) and make an addition to the new

SUPPLEMENTAL INFORMATION AND PHOTOGRAPHS MAY BE ADDED ON SHEET OF SAME SIZE

Data from paper written by Michael C. Sprigg (1791-1845) and used in Daily Times New York, Aug. 15, 1887.

" Around 1817-- "

Quote: "Each morning at precisely 8:30 A.M. as the sun's rays played hide and seek through the doorless and windowless shell of the unfinished Episcopal Church an old man came from the brow of the hill, tapped his drum with the rat-tat-tat and with a loud voice proclaimed "ayez, ayez, gentlemen of the jury, attend court--gentlemen of the jury attend court ! The County Court was in session and for years the honorable bench and jurors were notified in this manner.

In 1827, the County Commissioners bought a bell which was placed in a steeple made in the shape of a lantern and built into the cone of the roof of the Courthouse. A rope was fastened to the bell, and then extended into the room below. Now, that Sheriff Beall had this convenience, it was no longer necessary to use the service of the old drummer. THIS JAIL WAS TORN DOWN TO MAKE WAY FOR A "MODERN" JAIL.

.....further, on the right side (of Washington Street) stood a one-story brick, with two rooms paved with brick--one the County Clerk (Aza Beall)'s office and the other the Register of Wills (Charles Heck) office, on the site of the present Academy.... There in an open space stood the Court house and Jail under one roof..... and today, with few alterations as it did 70 years ago (1817)" (unquote).

as typed Oct. 1970 by Hazel Groves Hansrote.

OLD COURTHOUSE & JAIL, by Michael C. Sprigg (1791-1845)

"This building stood in an open space opposite the present courthouse. The lower part--the jail, was stone. The upper part--the Courthouse was brick. The Jail consisted of four rooms, one for the criminals, one for debtors and two for the jailer. The criminal's and debtor's rooms were guarded by iron-barred windows. The doors were of heavy oak and studded with large nails. The locks and keys were so large, they would be a curiosity today. Two rooms were added for the ever increasing family of the jailer, who received \$150 a year salary. Following the escape of several prisoners, a 16 foot high fence was built around the yard. The courthouse was plain and primitive usually wide boards for desks and seats no paint...."

4. NOTABLE FEATURES, HISTORICAL SIGNIFICANCE AND DESCRIPTION OPEN TO PUBLIC **YES**

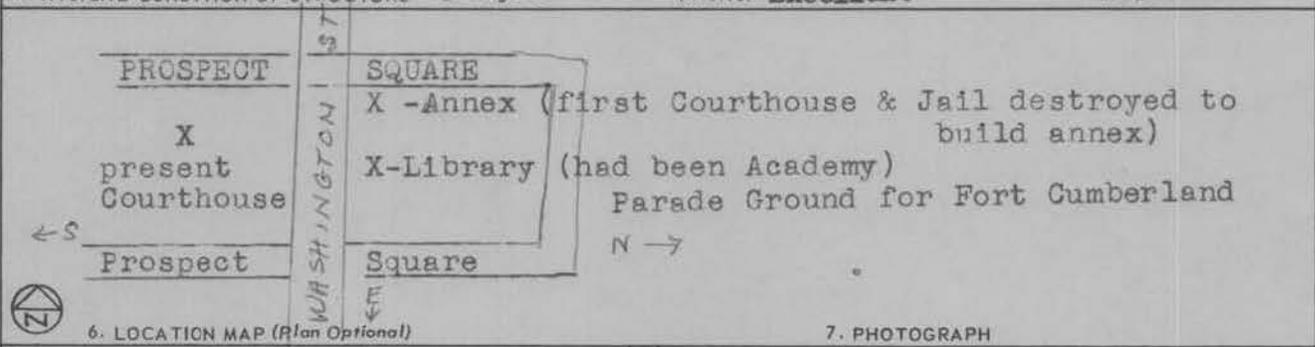

On June 5, 1934, the Cumberland Free Public Library(now called County Library) moved into the Academy building. Since then it has been officially known as the County Library.

The Maryland Legislature on Jan. 15, 1798 passed an act entitled--"An Act to Incorporate a School in Allgany County". This first public school in Western Maryland was built on Lot 145 at the Northwest corner of Fayette Street, Cumberland grew and by 1848 the original building was found inadequate. The heirs of Thomas Beall of Samuel, founder of Cumberland, donated land on Washington Street and Prospect Square "to the County for Educational Purposes"--on lots 31-35 Washington Street. The Academy Trustees constructed the new Academy which was completed on June 8, 1850. Except for a short period during the Civil War this (second) Academy building was used as a school until June 1929 when this famous old institution ended it's scholastic career.

An addition was added to the County Library in 1966. The first County Courthouse and Jail built in 1797 (in good sound condition) was destroyed to add this addition.
