DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE

The building stands on the south side of Baltimore Street near the middle of the block formed by Mechanic and Liberty Streets. It is located in the second block east of Wills Creek in Cumberland, Allegany County, Maryland. The property is known as 49-53 Baltimore Street.

The building is a modernistic style structure approximately three stories high and of masonry construction. It is the full width of the property, approximately thirty-three feet, with only the facade (north side) and back visible. All of the aesthetic treatment is on the facade with the back being a plain brick wall with a few openings. The building was erected about 1933 as a movie theater and is presently used as a department store.

The facade of the first floor is faced with large black ceramic tiles and has large show windows of recent vintage. The upper levels of the facade are covered with flat, cut stone and have a feeling of verticality to them. There are six pilasters of which the center two are fluted and topped with an arch with a radiating motif in low relief. Between the fluted pilasters and three openings with black marble panels above and below them. Flanking the center pilasters are two sets of plain pilasters that extend to the top of the building. Between each set of these piers are narrow windows with black marble panels from the top of the bottom windows to the bottom of the top windows. Three metal, cage-like finials top the facade.

The interior has been altered from the movie theater to large show rooms. The general condition of the building is good.

STATEMENT OF SIGNIFICANCE

The building that stands at 49-53 Baltimore Street in Cumberland is significant for its architectural merit and its preservation through an adaptive use.

The building is an example of the ^{Art Deco} ~~Modernistic~~ style of architecture. Popular in the era between the 1920's and the early 1940's, the style stressed verticality with rectilinear ornament. A common motif is fluting and geometrical curves usually play a secondary role. Normally the ornament is in low relief.

Presently, the building is being used as a shop by the Cumberland Cloak and Suit Store which has its main store across the street at 52 Baltimore Street. The building was erected about 1932-1933 as a movie theater. For several years, the Embassy theater was located here. The theater is first listed in the city directory in 1933. At the end of the 1950s the theater was out of business and the building was taken over by the Cumberland Cloak and Suit Store. The store is first listed in the city directory for this location in 1959.
