Slabtown Survey District
Mount Savage
Private

early 20th century

The Slabtown Survey District is located approximately one mile south of Mount Savage on Slabtown Road. The mining village was constructed by the New York Mining Company early in the twentieth century.

The typical company house in Slabtown is a two story structure, three bays wide and one deep. The houses have gabled roofs with central chimneys. Four of six buildings within the district follow this pattern. The remaining two buildings, a square frame dwelling and an adjacent one and one-half story, shed roofed, brick storehouse were privately owned and built.
