

AL-V-B-073
Plank Road Tavern
Old Plank Road, near Barrelville
Ca. 1810

The Plank Road Tavern was probably constructed during the first quarter of the 19th century and is built in typical "tavern-style" with a five bay front end porch which faced the main road. The building was originally constructed of logs, one of the cheapest and most functional materials in the area. The tavern would have served travelers on the Old Plank Road, which ran from Baltimore to Somerset, Pennsylvania.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The Plank Road Tavern is located on the east side of the Old Plank Road north of Barrelville, Allegany County, near the Pennsylvania line.

The house and former tavern basically consists of a two and one half story, five bay wide, rectangular shaped structure. The building is constructed of logs and has been covered with asbestos shingles. A one story wing abuts the main block on the rear east side, and the wing is also covered with asbestos shingles. The entire facade is supported by a high stone foundation with a plain water table. The roof of the entire building is gabled. The main block is covered with replaced asphalt shingles while the wing is covered with tin materials. The eaves of the roof exhibit replaced boxed cornices and frieze. Windows in the house include replaced, double hung wooden sash frames with one-over-one, two-over-two and three-over-one lights with plain trim. Other windows in the house include replaced single sash frames with six-light panels and single sash frames with side lights. The six light windows are placed in the gable ends and exhibit a wooden shelf on each. The main entrance is located on the front, west side and features a replaced paneled door with plain trim. A five bay end porch is placed on the front, west side of the house. The porch features a hipped roof and entablature supported by square columns and balustrade. A straight flight of stairs leads to the porch level and a picket fence and gate opens to the porch. One replaced, cement block chimney is located to the interior of the rear wing.

The house is structurally sound but has been drastically altered when renovated to serve as a house instead of a tavern.

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

The Plank Road Tavern was probably constructed during the first quarter of the 19th century to house travelers on the Old Plank Road. The style of the building is typical of taverns constructed during the early years of the 19th century. It is a long two story building with a five bay, front, end porch which is located right next to the main road. The building itself was originally constructed of logs, one of the cheapest and most functional materials in the area.

The Old Plank Road ran from Somerset, Pennsylvania to Baltimore and as the name implies was constructed of planks. The first plank road was not constructed until 1836 in Canada.¹ However, the idea soon caught on and the roads became popular in the United States as well. Wood seemed to provide a more desirable surface for horses hoofs than stone or gravel. In addition, the roads were relatively cheap and lasted anywhere from four to twelve years depending on the wood used.

"The average U.S. plank road had a road bed of thirty feet and a plank at least eight feet wide."² The planks themselves ranged from three to four inches thick to nine to sixteen inches wide. They were laid on top of sleepers or rails and covered with sand or sawdust.³
