Is the property located within a historic district? no yes Name of district: _____

Is district listed? no yes Determined eligible? no yes District Inventory Number: _____

Documentation on the property/district is presented in:

Description of Property and Eligibility Determination: *(Use continuation sheet if necessary and attach map and photo)*

The Shrout Property, constructed in 1936, is a 1-story, 3-bay Minimal Traditional house on the north side of Braddock Road, just east of MD 658. The house lacks architectural significance. This building is of wood-frame construction with a concrete block foundation, brick veneer and an asphalt shingle roof. The side-gable dwelling has a projecting front-gable on the principal elevation. The front and rear porches, as indicated by the flared roof, have been enclosed and covered with aluminum siding. The windows are aluminum 1/1 double-hung sash. The principal elevation faces north, away from Braddock Road. The entrance is located on the enclosed porch. To the west of the house is a detached garage. It is a small front gable building, covered with aluminum siding, with an attached porch.

The Shrout Property is not eligible for the National Register of Historic Places due to lack of architectural significance. This property does not represent a historic event or trend that made a significant contribution to the development of the nation, state, or local community, and therefore is not eligible under Criterion A. Historic research indicates that the property has no association with persons who have made specific contributions to history, and consequently, it does not meet Criterion B. The Shrout Property is an indistinctive example of a Minimal Traditional dwelling found throughout suburban communities and is therefore ineligible under Criterion C. Finally, investigations have not been conducted to determine whether the property has the potential to yield information in history or pre-history, therefore, National Register Criterion D cannot be evaluated at this time.
