

Tichnell Saltbox
AL-VI-C-187
Temperance Row, Barton
ca. 1870

The mining town of Barton was "laid out" in 1853 by William Shaw, Jr. Unlike many of the growing communities of the George's Creek coal region, where miners usually occupied company owned housing, Barton was designed with 66 lots which apparently were available to miners.

This building is typical of many dwellings in the coal region. It is a small frame structure of three or four rooms. The gable flank roof was extended with an "outshut" or shed addition to form a saltbox house, which in Western Maryland is found only in the George's Creek area.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Tichnell saltbox is located on the northern side of Temperance Row in Barton.

The building originally consisted of a rectangular two story, two bays wide structure resting on a low stone foundation of random rubble with a plain watertable. A one and one-half story shed addition on the north rests on stone pillars at the corners making the building a "saltbox". Wall construction is frame with weatherboards except on the northern facade which is covered with german siding. The gable flank roof is covered with tar paper. Original eaves consist of a boxed cornice, soffit, and bedmould with returns. Returns of the southern flank have been removed to continue the eaves onto the addition which has a sloped soffit on the north. One brick chimney is located inside end.

A pedimented entrance, offset on the southern facade, includes a four panel door with original hardware. Wide windows are pegged six over six lights with wooden lugsills. A porch on the north has a shed roof supported by three decoratively lathed posts.

STATEMENT OF SIGNIFICANCE

The mining town of Barton is located near the center of the George's Creek Valley. The town was "laid out" in 1853 by William Shaw, Jr. on the 1,200 acre estate of his father, a Methodist minister who settled there in 1794 (1). The town grew rapidly- by 1880 the population was more than 1,100. (2) Unlike many of the growing communities of the region where miners occupied company owned housing, Barton included 66 lots which apparently were available to miners. (3) This house was probably built by a miner during the 1870's. The assessed value of the building during that period was \$500.00; the lot was assessed at \$50.00. (4)

The building, on lot #34, is typical of many dwellings in the coal region. It is a small frame structure of three or four rooms. The gable flank roof was extended with an "outshut" or shed addition to form a saltbox house, a style which in Western Maryland is found only in the George's Creek area. The two bay width and the blank eastern facade indicates that the building may be the first half of an uncompleted double house. Many miners who built their own homes "built double houses..., living in one and renting the other." (5)
