AL-VI-C-196  
Morrison Road  
Barton Quad  
Allegany County

Shaffer Saltbox  
AL-V1-C-197

The village of Franklin was developed between 1852 and 1857. It was one of several villages created by coal companies near mine sites in the lower George's Creek Valley during the 1850's. This double saltbox was most likely a company house built between 1852 and 1857. In later years it was the property of the Gannon Family which apparently was involved in mining and owned rental properties in the area. Double or "block" houses of this type were the standard style of the mining region. Most are like this building, a two story frame structure on a rubble stone roundation and a shed or "outshut" addition on the rear which makes a saltbox.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Shaffer Saltbox is located on the western side of Route 36 in Franklin.

The double house is two stories tall and six bays wide. It originally was a gable roofed rectangular structure. A shed or "outshut" addition on the west makes the building a saltbox. Wall construction is frame covered with insul siding. The building rests on a low foundation of random rubble with a plain water table. The gable flank roof is covered with tar paper. Eaves consist of a cornice and bed mould on the gabled ends and of a boxed cornice and soffit on the flanks. One large brich chimney located in the center of the original building serves both sides. A smaller chimney is located in the center of the "outshut" addition.

Entrances are in the center of each three bay half of the building. Doors of both are of four panel with original hardware. Windows are pegged six over six light sashes. A wide hip roofed porch on the east has chamfered wooden posts. Separate shed roofed porches on the west have been enclosed.

## STATEMENT OF SIGNIFICANCE

The village of Franklin was developed between 1852 and 1857. It was one of several villages created by coal companies near mine sites in the lower George's Creek Valley during the 1850's. (1) The initial growth of these towns was predicated by the establishment of the George's Creek Coal and Iron Company Railroad through the lower part of the valley in 1852 which provided an essential outlet for mined coal. (2) Another factor in the growth of the towns was the completion of the C & O Canal in 1850. As the canal neared completion many mining companies "announced plans for housing the additional miners" necessary for the anticipated increase in mining activity. (3)

This double saltbox was most likely a company house built between 1852 and 1857. In later years it was the property of the Gannon family which apparently was involved in mining and owned rental properties in the area. (4) Double or "block" houses of this type were the standard style of the mining region. Most are like this building, a two story frame structure on a rubble stone foundation and a shed or "outshut" addition on the rear which makes a saltbox.
