

Queen's Point Kiln
A1-V-1-E-225

This lime Kiln probably dates from the mid-nineteenth century. It is small in size, suggesting that the lime produced from it was used locally for agricultural purposes. The Kiln is a rectangular stone structure and was built into a bank.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Queen's Point Kiln is located on the Potomac River, near McCoolle.

This Kiln is a rectangular stone structure of mostly coursed ashlar with some random rubble. In the center of the base of the Kiln above the opening, the portion of the Kiln above the opening is supported by an iron rail. The structure was built into a bank and has a moderately large opening on its flat top.

STATEMENT OF SIGNIFICANCE

This Kiln was most likely built in the middle of the nineteenth century. In a deed dated December 5, 1901 it is referred to as "the old lime kiln." (1) There were good sources of limestone in various areas of the county that could be used for agricultural and building purposes. (2) While Allegany County had many large Kilns that produced lime for local demand and shipping to other counties, this Kiln was small. It's size suggests that the lime produced from it was probably restricted to local use for fertilizing purposes. (3)

(1) Allegany County Deed, Liber 90, Folio 130

(2) Maryland Geological Survey, Allegany County, 1900, p. 165

(3) Ibid, p. 186
