Hill Street School
Frostburg

late 19th century

The Hill Street School is the oldest school building found in Frostburg. It was erected in the late 19th century to provide additional elementary school classrooms and was eventually enlarged to accommodate a secondary school as well. The building is an irregular rectangular block of brick laid in American Common Bond. It has a hipped roof and three corbeled brick chimneys.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Hill Street School is located at 65 Hill Street in Frostburg, Allegany County on the northwest side of the street at the intersection of Oak Street.

The school basically consists of a two story, fourteen bays wide, irregular rectangular shaped block. Several small wings abut the main block of the facade on all sides and they all are covered with hip roofs. The building is laid in American Common Bond brick construction with a brick belt course surrounding the entire facade at the top of the first story level. The foundation features high stone construction, including double hung wooden sash windows plus pediments and one-over-one lights on all sides, with a plain water table. The hip roof of the principal facade is covered with asphalt, or tar paper materials and has plain soffit eaves. Windows in the school feature double hung wooden sash frames with one-over-one lights, or in some sections, simple square one light frames and all have inscribed brick pediments over the frames. The main entrance is located on the southwest face of the principal facade and features double doors with transom and transom lights. Several other entrances are placed around the sides of the school with an entrance similar to that of the front, located on a rear northeast wing. Three large corbeled brick chimneys, that appear to be original, are located on the interior of the structure.

The school is structurally sound and is still being used for elementary classrooms

BUILDER/ARCHITECT

STATEMENT OF SIGNIFICANCE

The Hill Street School was erected in the late nineteenth century for the purpose of additional elementary classrooms. The school was built approximately the same time in which the Beall School, now demolished, was enlarged to accommodate a secondary school. The structure itself, is in good condition and is currently still being used for elementary classrooms, however, through years of use the structure is in need of repair. The facade is the oldest school building found in Frostburg and is a good example of the practical and utilitarian style of architecture that was formerly used for educational structures.

Date Constructed - late 19th Century
Condition - Good

Foundation

Key points regarding interior architecture.

1. Floor plan

No through hall--How many rooms long and deep?
Where is stairway? Straight or winding?

With through hall--Rooms on both sides? How many?
Rooms on one side only? How many?
Is stair in through hall?
Open or enclosed? Straight--one run. Straight--landing
How many? Curved.
If not in hall, where is stair?

2. Wall finish: plaster, paneled, board partition
Note presence of chair rail, cornice, etc.

3. Fireplaces: How many? Parallel to walls or diagonal in
corner?
Mantels: wood--mouldings, pilasters, columns
masonry--marble(what color?), brick

3. Doors: on the inside of exterior doors, note the presence of
applied flush boards and their direction (diagonal, vertical,
horizontal). In general are doors paneled or ledge or other?

4. Door and window trim: plain, architrave; fluted, reeded;
pilasters

5. Kitchen: Where is original if extant or known (marked by very
large fireplace)? Separate building; wing to principal
dwelling; within principal dwelling? On which floor of any
of the above?

6. Note presence of head (if any) on any wooden member present
