Documentation on the property/district is presented in:

Description of Property and Eligibility Determination: *(Use continuation sheet if necessary and attach map and photo)*

SHA Bridge No. 0204900 is located on MD 103 spanning a Branch of Deep Run in Anne Arundel County. The bridge is a concrete slab with original concrete abutments in place and a span length of 22 feet. Rehabilitated in 1949, the original concrete slab was widened with concrete girders and steel beams. The balustrade is a metal rail.

Due to the 1949 rehabilitation work, the bridge has lost integrity of original building materials. Additionally, there are numerous, better examples of intact of concrete slab bridges as identified in the Bridge Inventory.

This property is considered not eligible for the National Register of Historic Places.

- It is not considered eligible under Criterion A as there is no known significant historical event associated with this property.
- It is not considered eligible under Criterion B as there is no known person of significance associated with this house.
- It is not considered eligible under Criterion C as an outstanding example of an architectural style or the work of a master craftsman.
- It is not considered eligible under Criterion D as it is unlikely to contain information that is currently unknown.
