7. Description

Survey No. AA-2143

Condition		Check one	Check one
<input type="checkbox"/> excellent	<input checked="" type="checkbox"/> deteriorated	<input type="checkbox"/> unaltered	<input checked="" type="checkbox"/> original site
<input type="checkbox"/> good	<input type="checkbox"/> ruins	<input checked="" type="checkbox"/> altered	<input type="checkbox"/> moved date of move _____
<input type="checkbox"/> fair	<input type="checkbox"/> unexposed		

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

Building No. 73 is a small wood-framed shed covered in what appears to be asbestos siding. A greenhouse has been attached to one entire side of the building and a small metal shed attached to another. The main structure has a low pitched gable roof while the attached metal shed's roof is virtually flat with a corrugated metal roof.

This former Range Finder House is located at the water's edge on the east side of Arundel Cove.

8. Significance

Level of Significance: <input type="checkbox"/> national <input checked="" type="checkbox"/> state <input checked="" type="checkbox"/> local		

Prepare both a summary paragraph of significance and a general statement of history and support.

This property is associated with the development of the Coast Guard Yard at Curtis Bay. The Yard was first established on this site in 1899 as a boat repair and construction facility for the Revenue Cutter Service, the forerunner of the present-day Coast Guard. At that time, the facility was known as the Revenue Cutter Service Depot, and generally served vessels stationed in the mid-Atlantic area.

The establishment of the Depot was related to the emphasis on Naval preparedness that took place following the Spanish American war. Prior to the establishment of the Depot, vessel repair and construction were handled by private concerns. Starting as a collection of a few frame buildings, the Depot, after 1940 known as the Yard, expanded as its mission and capabilities increased. The Yard was at its productive peak and greatest size during World War II, with most surviving historic structures dating to that time.

This building was constructed in 1942, near the mouth of Arundel Cove, as a Range Finder house. Badly altered from its original form, it is now a greenhouse.

This resource is not a contributing element to the proposed National Register Historic District.

Due to serious loss of physical integrity resulting from extensive alterations and deteriorated condition, this building is not included in the proposed historic district.

Criterion A—Historical Associations

The Range Finder House was constructed during World War II and is associated with the large-scale rebuild, expansion and modernization taking place at the Yard at that time.

Criterion C—Design Significance

Very little information was found in relation to this building. It is a simple utilitarian structure employing materials and methods of construction typical of the period.

Integrity

Extensive alterations and deterioration adversely undermine this buildings ability to communicate its historical associations.
