Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

This small building, situated at the Yard's main entrance along the northern boundary, measures approximately 10 x 6 feet (3 x 2 meters). It is constructed of American Bond brick and has a hipped roof covered in asphalt shingles. It sits on a poured concrete slab. A modern sliding metal and glass door is present in the building's east and west sides. A single plate glass window is present in the building's north and south walls.

Prepare both a summary paragraph of significance and a general statement of history and support.

This property is associated with the development of the Coast Guard Yard at Curtis Bay. The Yard was first established on this site in 1899 as a boat repair and construction facility for the Revenue Cutter Service, the forerunner of the present-day Coast Guard. At that time, the facility was known as the Revenue Cutter Service Depot, and generally served vessels stationed in the mid-Atlantic area.

The establishment of the Depot was related to the emphasis on Naval preparedness that took place following the Spanish American war. Prior to the establishment of the Depot, vessel repair and construction were handled by private concerns. Starting as a collection of a few frame buildings, the Depot, after 1940 known as the Yard, expanded as its mission and capabilities increased. The Yard was at its productive peak and greatest size during World War II, with most surviving historic structures dating to that time.

This building was constructed in 1966 and is not historic. It replaced a World War II-era structure that was located in this same area.

This resource is not included in the proposed National Register Historic District. This building was constructed in 1966. As it does not meet any of the criteria for early inclusion on the National Register, either individually or as a contributing element, it is not included in the proposed historic district.

### Criterion A—Historical Associations

This small structure replaced an earlier gate house and is associated with the post-World War II development at the Yard.

### Criterion C—Design Significance

The Gate House employs materials and construction techniques typical of the 1960s. The brick construction of the Gate House allows this modern building to blend with existing architecture.

### Integrity

Gate House is a relatively new building and in very good condition, however, it lacks historical association or architectural significance.
