

INDIVIDUAL PROPERTY/DISTRICT  
MARYLAND HISTORICAL TRUST  
INTERNAL NR-ELIGIBILITY REVIEW FORM

Property/District Name: Glen Burnie Ice Manufacturing Company Survey Number: AA-2169

Project: Glen Burnie Light Rail Extension Agency: FTA/MTA

Site visit by MHT Staff:  no  yes Name E. Hannold, P. Kurtze Date June 20, 1996

Eligibility recommended  Eligibility **not** recommended

Criteria:  A  B  C  D Considerations:  A  B  C  D  E  F  G  None

Justification for decision: (Use continuation sheet if necessary and attach map)

Based on the available information, the Glen Burnie Ice Manufacturing Company does not appear to meet the National Register Criteria for individual listing. The long, concrete block building is clearly utilitarian in character, distinguished only by a stepped gable facade and elevated front loading dock sheltered by a shed roofed canopy. The building has had a number of minor additions to the sides and rear. The Glen Burnie Ice Manufacturing Company was established in 1922 and continues to operate as an ice manufacturay. Despite the relatively high degree of integrity of the building, there is insufficient context for operations of this sort to serve as a basis for an eligibility evaluation under any of the Criteria. The design and type of the building and function of the establishment were undoubtedly extremely common at the time of construction. The property is located outside the National Register eligible section of Glen Burnie.

Documentation on the property/district is presented in: Project File, Maryland Inventory  
Form AA-2169

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

Contributing Resource Count: 1 building.

This concrete-block building consists of a long gable-roofed core with a number of shed- and gable-roofed additions on the sides and rear. The main elevation is formed by the building's gabled end, topped by a stepped parapet. A lower stepped parapet to the left forms the end of another gable-roofed section running parallel to the main core. A door is centered under the main parapet roof. Extending across most of the front elevation is an elevated loading dock covered by a shed-roofed canopy supported on brackets.

# 8. Significance

check: Applicable Criteria:  A  B  C  D  
 and/or  
 Applicable Exception:  A  B  C  D  E  F  G  
 Level of Significance:  national  state  local

Prepare both a summary paragraph of significance and a general statement of history and support.

The Glen Burnie Ice Manufacturing Company was established in 1922 by Glen Burnie resident Elisha Dunker. This small local industry remains in the Dunker family and continues to produce and sell crushed and block ice. Although additions have been made to its rear and side, the building possesses historic integrity. It does not, however, appear to meet any of the criteria for significance since it is a common example of an early twentieth century commercial and industrial building. It is therefore recommended not eligible.
