Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

Buildings 1001 and 1003 are simple gable end warehouses constructed in circa. 1941. The buildings are standard, utilitarian World War II era mobilization facilities. The buildings are ten bays long and three bays wide and measure approximately 240'x60". They are constructed of concrete block on a poured concrete foundation. The roof is covered with corrugated metal. Three metal vent stacks penetrate each roof line. Windows and metal doors are located on alternating bays. The windows are twenty-four light fixed sash metal industrial windows. A small addition containing a furnace was added to the north end of building 1003. The addition is sympathetic in scale and design. A large brick chimney penetrates the roof. A metal shelter on the south end of the building was recently damaged by heavy winds and has been removed. The south wall was painted in a camouflage pattern during the Second World War. Minor alterations, such as sealing doors, have been done on building 1003. Building 1001 is currently used for storage. Building 1003 houses the 97th Armt Reserve Command's (ARCOM) Area Marine Support Activity (AMSA) #83. The tenant provides transportation support to the ARCOM.

8. Significance

Survey No. AA45

Period	Areas of Significance—Check and justify below			
<input type="checkbox"/> prehistoric	<input type="checkbox"/> archeology-prehistoric	<input type="checkbox"/> community planning	<input type="checkbox"/> landscape architecture	<input type="checkbox"/> religion
<input type="checkbox"/> 1400-1499	<input type="checkbox"/> archeology-historic	<input type="checkbox"/> conservation	<input type="checkbox"/> law	<input type="checkbox"/> science
<input type="checkbox"/> 1500-1599	<input type="checkbox"/> agriculture	<input type="checkbox"/> economics	<input type="checkbox"/> literature	<input type="checkbox"/> sculpture

Specific dates	Builder/Architect
check: Applicable Criteria: <input checked="" type="checkbox"/> A <input type="checkbox"/> B <input checked="" type="checkbox"/> C <input type="checkbox"/> D and/or	
Applicable Exception: <input type="checkbox"/> A <input type="checkbox"/> B <input type="checkbox"/> C <input type="checkbox"/> D <input type="checkbox"/> E <input type="checkbox"/> F <input type="checkbox"/> G	
Level of Significance: <input type="checkbox"/> national <input checked="" type="checkbox"/> state <input type="checkbox"/> local	

Prepare both a summary paragraph of significance and a general statement of history and support.

The Curtis Bay Ordnance Depot was established in 1918. Curtis Bay was one of six reserve ordnance depots maintained by the Ordnance Department between the First and Second World Wars. These reserve depots were primarily responsible for maintaining materials left over from the First World War. With the outbreak of the Second World War in 1939, the Ordnance Department considered the need to expand their facilities. By the end of 1942, the Ordnance Department developed an extensive system of 26 depots to support the war effort. The Ordnance Department was responsible for for the production, storage, maintenance and repair of ordnance items.

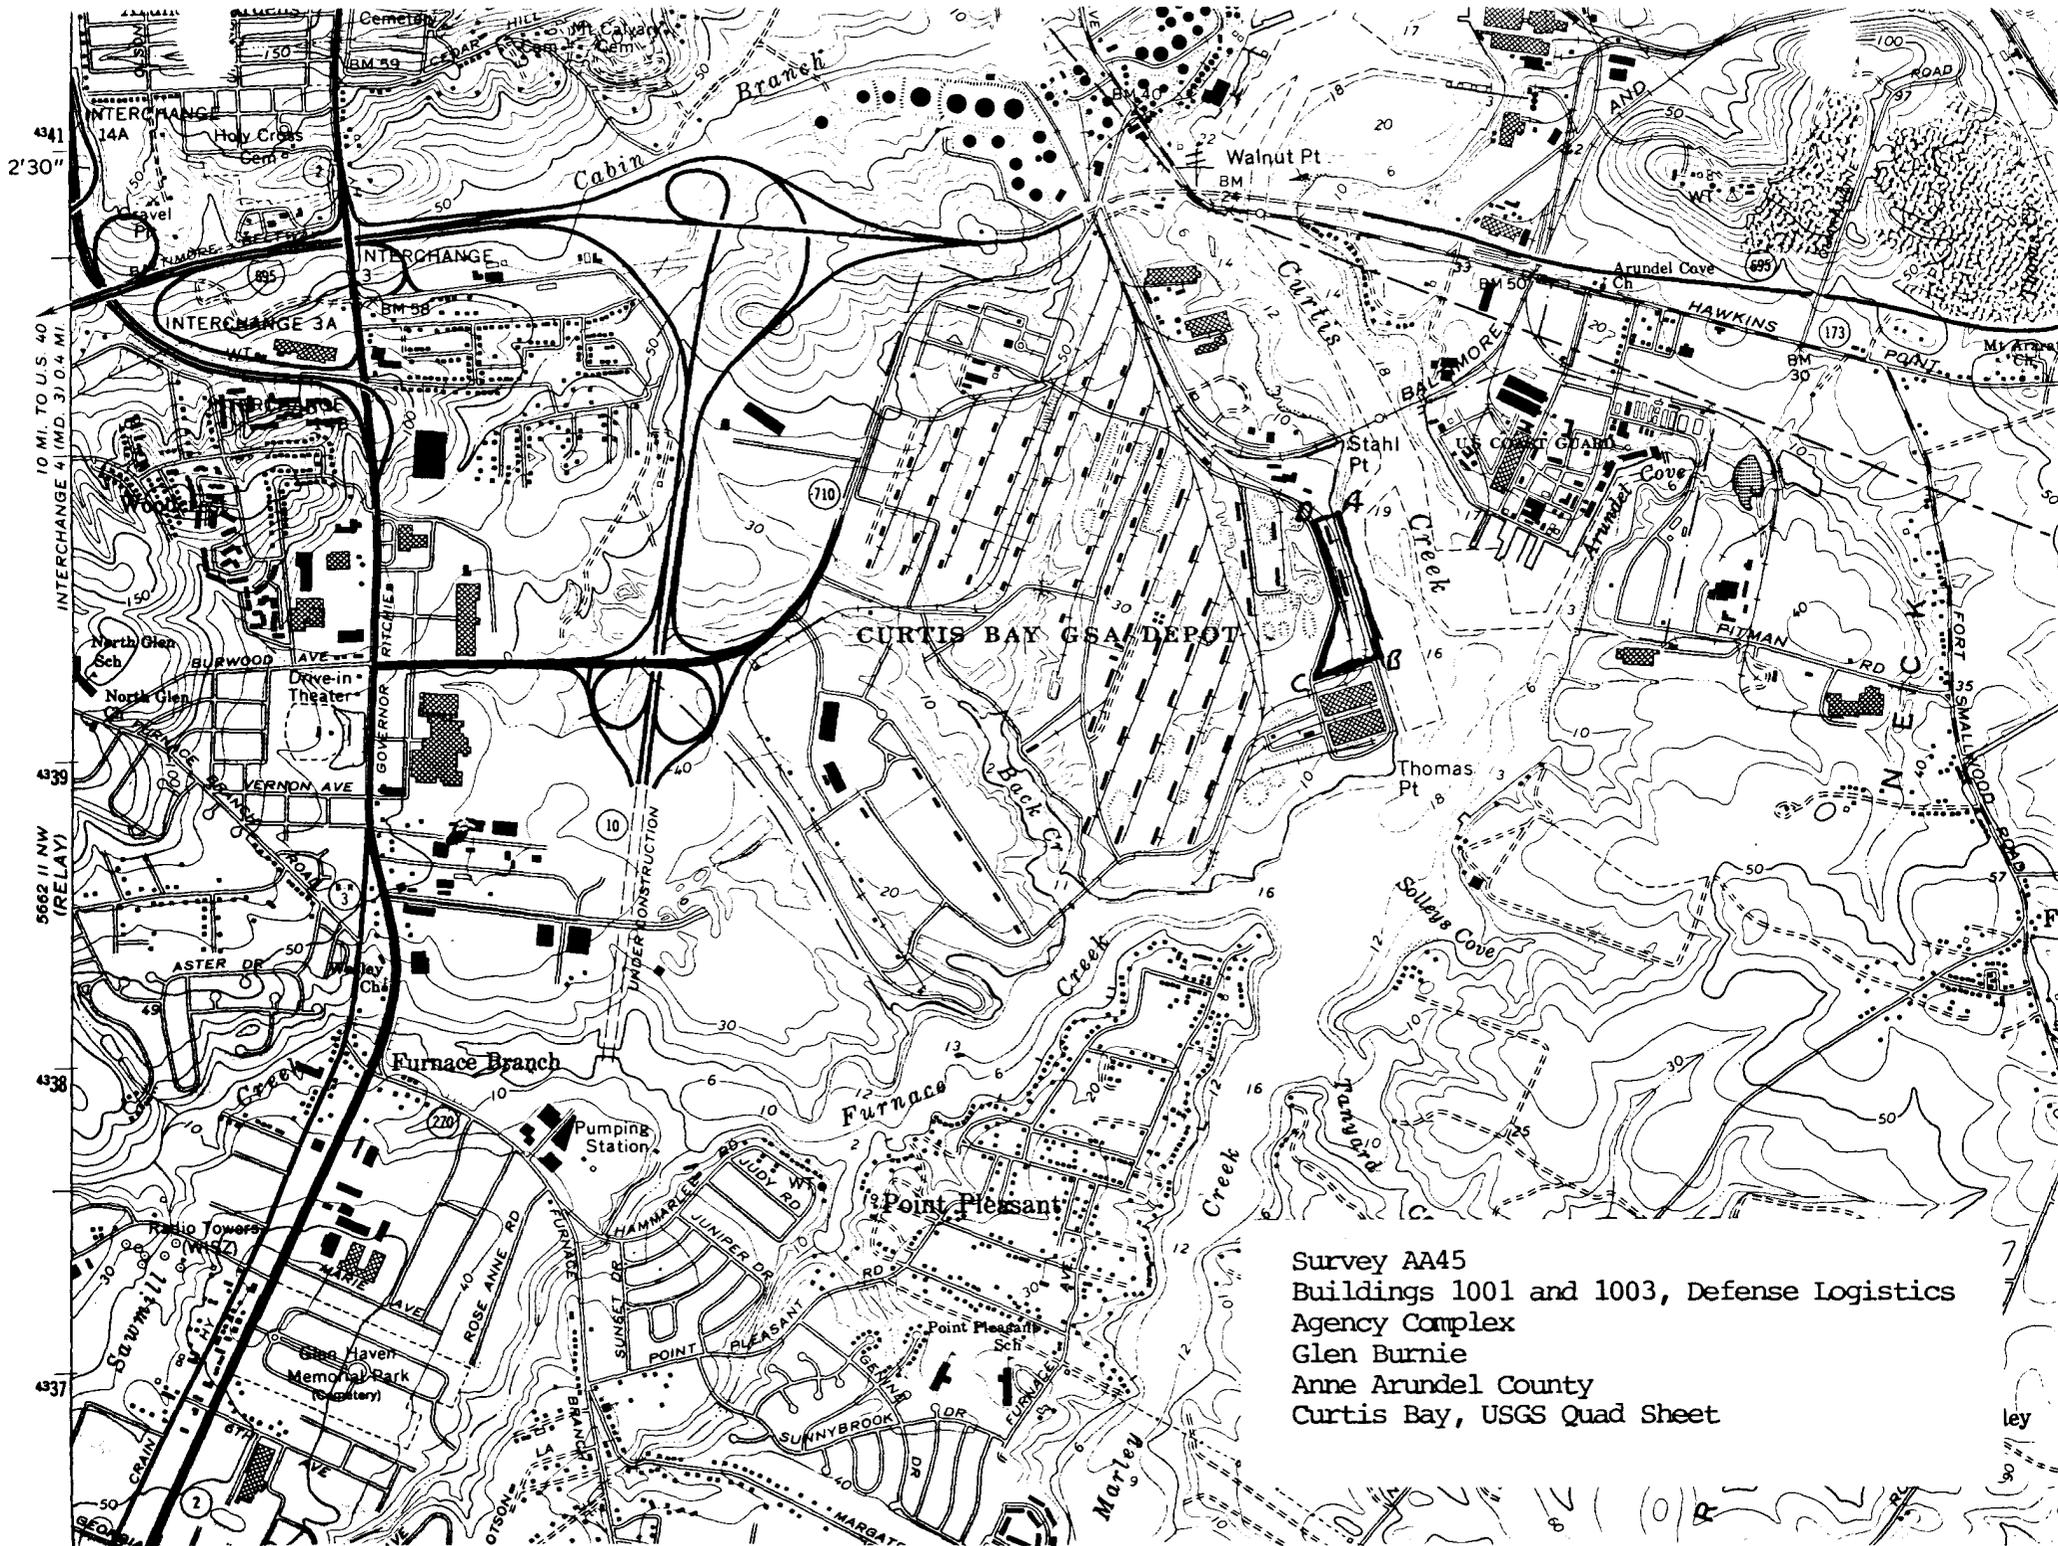

Building 1001 and 1003 were constructed as part of the depot system that was created during World War II. Several storage buildings and a dock were constructed on the east edge of the facility. The buildings were used as storage facilities for shipping small arms ammunition. After the war building 1003 was apparently used to disassemble small arms ammunition. Personnel at the facility indicated the building was once used as a "small round popping house."

During the early 1940s thousands of storage buildings and ammunition magazines were constructed for Ordnance Department usage. The buildings at Curtis Bay are not representative property types of the large scale depot construction program. The construction of the dock and buildings 1001 and 1003 represent a small scale upgrade to a pre-existing World War I era depot.

— Buildings 1001 and 1003, Defense Logistics Agency Complex
Curtis Bay, Anne Arundel Co., MD

Section 9. Verbal Boundary Description

Beginning at a point northeast of Building 1001 the boundary runs 1,500 feet south along the west edge of Curtis Creek. The boundary turns west at the first road that is encountered and runs 750 feet west to the first intersection. At this intersection the boundary turns north along the east edge of this road and runs north to a point 100 feet northwest of Building 1001. The boundary then turns east and runs 250 feet to the original starting point.
