DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE

Architecturally, the State House is a severe brick structure topped by a tall octagonal dome and cupola. The main entrance facing the east, is protected by a one story pedimented Corinthian portico with marble floor, wooden columns, iron capitals, and cast iron railing; it is obviously a later addition. The portal opens into a wide arcaded hall of similar classic order under the central dome, which has arched and oval windows and delicate plaster interior ornament in the Adam style, completed in 1793.

Over the entrance to the Old Senate Chamber is a curved balustraded spectators gallery, supported by fluted Ionic columns. Facing the entrance is the circular speaker's platform. Typical of late Georgian Colonial design are the twenty-four-paned sash windows with deep paneled reveals, window seats and inner shutters, and the classically trimmed fireplace. Opposite the Senate Chamber is the Old Hall of Delegates, next to which is the present Historic and Flag Room, used for exhibit purposes.

Throughout the years, following its nationally significant role in the first years of independence, the State House has continued to serve as the center of State government. In 1902-05, expansion of the State governmental functions necessitated the addition of an annex slightly larger than the original building. Unfortunately, the annex has obscured the original plan and symmetry of the State House.

Begun in 1772, and finished about 1779, the present structure has seen many alterations and additions. Between 1785 and 1789 the original dome was demolished and replaced with the present larger one. In 1858, due to expanding needs, the quasi-octagonal bay was removed from the western side and replaced with a larger octagonal annex, increasing the size of the Delegates Chambers by some seventy percent. Other alterations included: the addition of a cellar designed by George A. Federick, in 1876; "an annex with special reference to the needs of the State Library," 1886; architect and historian J. Appleton's restoration of the old Senate Chambers, 1894; demolition of the annexes of 1858 and 1886 and replacement with the present annex, 1902; interior redecoration by the Maryland Historical Society, 1937; and finally, "Extensive renovation of the interior under the direction of the Department of Public Works."¹

Boundary Information and Justification

The Maryland State House sits within State Circle in Annapolis. The Circle provides a very natural boundary for this property.

STATEMENT OF SIGNIFICANCE

The Maryland State House is the oldest building in the nation which remains in active use as a seat for State government. Moreover, between November 26, 1783 and August 13, 1784, the State House served as the Nation's Capital. "The State House itself was largely responsible for the Congress' presence in Annapolis."¹ Having moved the Capital from Princeton, New Jersey, the Maryland State House accorded the Congress adequate space and atmosphere which would accommodate a national legislature rightful prestige."²

Several historically important events occurred in the Maryland State House, which now houses the offices of the Governor, Secretary of State, Attorney General of Maryland, as well as the State Legislature. It was here that the Continental Congress ratified the Treaty of Paris on January 14, 1784, thus giving formal end to the Revolutionary War. A few weeks earlier General George Washington appeared before Congress at the State House to resign his post as Commander in Chief of the American Military, establishing the precedent of civilian leadership of the military. In August, 1784, the building was returned to the State, but it was destined to figure again prominently in national affairs for on May 7th, 1784, Thomas Jefferson was appointed Minister Plenipotentiary to countries abroad. In September, 1786, the Annapolis Convention, with representatives from six states, entertained a resolution from which grew the convention which drew up the constitution.

ADDITIONAL ARCHITECTURAL OR STRUCTURAL DESCRIPTION:

AA-685

Original section has exceptional dome on tower (later) with oval windows in upper section; balustrade at base of tower; excellent wood cornice with dentils and flat modillions; gauged splayed brick arches at all windows; brick belt courses, molded weathering at watertable; stone foundation with galleting; pedimented entrance facade with projecting porch enriched by pediment at center bay; modillion and dentil cornice and rakes; Corinthian columns and engaged pilasters; round arched windows inside porch and round arched entrance framed with engaged Corinthian pilasters, paneled archivolt with key and excellent fan transom; paired raised panel doors; later section (north) repeats detailing of first part but in limestone at the cornice, and is set on a tall granite faced base; exceptional colossal limestone portico at north elevation with full pediment (coat of arms of State of Maryland) modillioned and dentil cornice, Corinthian columns and pilasters long granite staircase with cheek walls to three entrance bays.

RELATED STRUCTURES: (Describe)

STATEMENT OF SIGNIFICANCE:

For nine months the Statehouse was the seat of the Continental Congress while it acted as the Revolutionary government. Here the Continental Congress ratified the Treaty of Paris on January 14, 1784, formally ending the Revolutionary War. Here Washington officially resigned as Commander-in-Chief. In September, 1786, the Annapolis Convention entertained a resolution from which grew the convention that drew up the Constitution. This is the oldest State House in the United States still in use. (Quoted from NR nomination.)

Excellent example of its style, with extremely well designed addition and cupola. Visually dominates entire historic district as focal point of numerous vistas. Critical, most important structure in city if not state.

4. NOTABLE FEATURES, HISTORICAL SIGNIFICANCE AND DESCRIPTION OPEN TO PUBLIC Yes

The Maryland State House is the most important building in Maryland, and as the oldest state house in continuous use in America, it is a building of national importance. The State House is, in addition to its very important historical associations, an outstanding architectural monument. The front, and oldest part, is a Georgian block with projecting, central pedimented pavillion with a one storey portico. The interior is incredibly rich for the period, the classical detailing and plasterwork are as good as contemporaneous work in England. The dome is an architectural rarity being neither a dome nor a cupola but having elements of both; the inspiration is most probably Chinese, as this was the period of the "Chinoiserie" rage in England (Sir Wm. Chambers' book on Chinese designs appeared in 1762). A neo-classic addition by Baldwin and Pennington was added 1902-05. A good, non-competitive, piece of architecture in the John Russell Pope style, the addition faces the Court of Appeals Building of the same period.
