Departing from the grid pattern characteristic of many American towns, the planners adopted a modified baroque plan, first applied by French baroque designers in garden layout, as at Versailles. This influence soon spread to England and was adapted by Christopher Wren and John Evelyn for the rebuilding of London after the 1666 fire. In the accepted planning practice of this style, the highest and most commanding locations were reserved for the State House and church.

The focal point was a large (528-foot diameter) public circle where the State House would stand dominating harbor and town. Nearby was a smaller (340-foot diameter) circle set aside for a publicly supported Anglican church. From the two circles a system of radial streets extended outwards toward the edges of town. Those leading into the statehouse circle have a pinwheel alignment so no one is directly on axis with the center of the circle. Because of this arrangement, the plan fails to achieve one of the major aims of baroque design which is the creation of terminal vistas by ending diagonal streets at some great public building, monument, or natural view. That the planner did not fully comprehend the problems of baroque layout is also seen in the awkward land shapes which result from the many lots bisected by diagonal streets.

An additional feature of the plan, never implemented, was a residential square inspired by and named for London's famous Bloomsbury Square. For the comfort and pleasure of town dwellers, the planners separated residential and official areas from necessary artisan, commercial, and port activities. In addition the Maryland Assembly ordered the construction of a handsome pair of gates with gate houses for the town "rangers" at the main overland (West Street) entrance and the ditching and planting of hedges (quick-sets) along both sides of the road outside the town from the gates to the top of the hill.

The State House on State Circle is a National Historic Landmark in its own right. Begun in 1772 and completed in 1784, it was the meeting place of the Continental Congress, 1783-84. It was here that George Washington resigned his commission as commander of the American armies, December 23, 1783, and Congress ratified the Treaty of Paris, formally ending the Revolutionary War on January 14, 1784. This noteworthy Georgian public building, capped by a 150-foot wooden dome which was completed in 1793 and is the prototype of many subsequent state house domes, is still in use as the State Capital. The old Senate Chamber where Congress met has been restored and is notable for its fine woodwork by William Buckland. Near the State House is the Old Treasury, the oldest public building in Annapolis. It was built in 1735-37, for the Commissioners for Emitting Bills of Credit and, with its exterior brickwork laid up in Flemish bond, survives virtually unaltered.

The Hammond-Harwood House, Maryland Avenue at Prince George Street, is also a National Historic Landmark. Generally regarded as William Buckland's masterpiece, this superb formal Georgian mansion in the Palladian manner is one of the finest examples of pre-Revolutionary
7. Description: (1) Colonial Annapolis Historic District

architecture in America. Across Maryland Avenue is the Chase-Lloyd House. Begun in 1769 for Samuel Chase, signer of the Declaration of Independence and Justice of the United States Supreme Court, it was completed by Edward Lloyd IV, in 1772. The house is the only three-storied pre-Revolutionary dwelling built in Annapolis and the interiors are particularly fine with elaborately carved trim in the dining room, drawing room, and large center hall by William Buckland. The Chase-Lloyd House, along with the Brice House and Paca House, are individually designated landmarks. Many other notable 18th-century structures are within the district. Among them are the William Reynolds Tavern at Church Circle, McDowell Hall and the Charles Carroll-Barrister Birthplace on the Saint John's College Campus, the John Ridout House on Duke of Gloucester Street, the Peggy Stewart House on Hanover Street, the Slicer-Shiplap House near the waterfront and the Upton Scott House on Shipwright Street. The damage to the over-all appearance of the city caused by the six-story Hilton Hotel is not as severe as was expected. The Hotel sets off to the side, south of the wharf, and is not as intrusive as the Naval Academy's Field House, built 15 years ago, immediately to the north of the wharf area. The area between Franklin, Northwest, Calvert, Larkin and Shaw Streets contain approximately 25 eighteenth-century buildings. Commercial fronts hide the antiquity of 16 early Annapolis buildings along West Street between Church Circle and the intersection of West, Calvert, and Cathedral Streets, which marks the site of the historic entrance to the original town of Annapolis. To the west of this is Acton, at Acton Place, a Palladian mansion completed in 1762 for Philip Hammond, slightly outside the original town limits. The house is noteworthy for its unusual design, the facade facing Acton Place being composed of two pavilion motifs flanking a slightly recessed single center bay, the reverse of the usual arrangement.

Boundaries of the Colonial Annapolis Historic District:

The present boundary roughly approximates that of the original town plan, with slight additions to the Northwest to include open land behind St. John's College to College Creek and to the West to include Acton Place and the quiet residential atmosphere which remains down to the waters of Spa Creek.

The Boundary as shown by the green line on the accompanying Map #1 runs counterclockwise from the Annapolis City Dock area along the property line of the U.S. Naval Academy on the east to College Creek; thence in a westerly direction along the creek to the western curb of Roscoe Rowe Boulevard and Calvert Street; thence in a northwesterly direction on West Street at the south curb to Larkin Street; thence south on Larkin at the west curb line to Shaw; thence south on Shaw at the west curb line to the rear of the properties facing Franklin Street; thence along the rear property line of the buildings on Franklin Street in a westerly direction to the west boundary of the property on the northwest corner of (continued)
7. Description: (2) Colonial Annapolis Historic District

Franklin and Southgate Streets; thence south along the rear property lines of the houses on the west side of Southgate Street to Spa Creek; thence along Spa Creek in an easterly direction to the point of beginning at the Annapolis City Dock area.
Annapolis, capital of the colony and subsequently of the State of Maryland, is a rare example of an attempt to create a European urban environment in a North American setting by the use of a modified baroque plan. With few changes, Annapolis developed in harmony with the original plan of 1695 to emerge in the mid-eighteenth century as the focal point of Maryland government, politics, and commercial activity and as a center of provincial wealth, culture, and taste. In 1783-84, the town was host to the Continental Congress and in 1786 to the Annapolis Convention, forerunner of the Constitutional Convention of 1787. The basic features of that city have survived to the present and provide the boundaries for the historic district. Some streets within Old Town have been widened and a few street names have been altered, but the original plan is little changed. In addition to the many outstanding individual examples of high Georgian design, scores of two and three story buildings, some trim and well maintained, others rundown, line streets such as Cornhill, Market, and Conduit. None are distinguished in design or detail, but all are harmonious in scale and materials. In mass, scale, and texture, the physical evidence of Annapolis places it as near to the 18th century as to our own.

**History**

In 1695, under the direction of Royal Governor Sir Francis Nicholson, the capital of the colony of Maryland was transferred from its original location, St. Mary's, to a more central and accessible spot on a peninsula between the present Spa and College Creeks at the mouth of the Severn River. The site of the new capital, then denominated Anne Arundel Town, had been sparsely settled since the mid-seventeenth century. Befitting the seat of royal power in absentia the colonial government determined to plan and survey a new town of about 100 acres, which was soon enlarged to over 140 acres. The town, renamed Annapolis in honor of Princess (the future Queen) Anne, was incorporated in 1696.

The origins of the Annapolis town plan are obscure. In 1695, Richard Beard, Gentleman and Surveyor of Anne Arundel County, drew up and surveyed the original plat, which was unfortunately destroyed by fire in 1704. The earliest extant rendering of the plan was made by James Stoddart in 1748 from notes taken in 1718. The Old World influences on the plan are

Strong and perhaps their source was Sir Francis Nicholson. Nicholson, a strong-willed man who was governor or lieutenant-governor of five different American colonies, had traveled widely in Europe and must have known Christopher Wren's baroque plan for rebuilding London after the Great Fire, 1666. Before coming to Maryland he helped found William and Mary College and later participated in planning Virginia's new capital, Williamsburg.

For several decades after its founding Annapolis developed slowly. Limited harbor facilities and the small inland extension of the Severn River made it a mediocre site for the growth of commerce. But as the century progressed and tobacco-based prosperity came to the Chesapeake Bay region, Annapolis grew. As Colonial wealth accumulated, planters, lawyers and government officials moved to the city. By the eve of the American Revolution the town had reached its zenith as an important American center of taste, culture, and politics. In 1776, it had an estimated 3,000 residents and not only were most of its approximately 450 houses made of brick, but several were of major architectural significance.

In 1789, Baltimore became Maryland's official Port of Entry, foreshadowing the eclipse of Annapolis as the State's first city. However, Annapolis remained the State Capital through the 19th and 20th centuries and in 1845 received an infusion of new life from the founding of the United States Naval Academy. Since World War II, the town's population, prospects, and land values have increased markedly. The relatively placid history of Annapolis since 1800 has fostered the survival of much of the atmosphere, many of the structures, and the basic street plan of the colonial era.

State Liaison Officer Certification

As the designated State Liaison Officer for the National Historic Preservation Act of 1966 (Public Law 86-665), I hereby nominate this property for inclusion in the National Register and certify that it has been evaluated according to the criteria and procedures set forth by the National Park Service. The recommended level of significance of this nomination is:

- National [ ]
- State [ ]
- Local [ ]

I hereby certify that this property is included in the National Register.
