DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE

Otterbein Church is a two-story brick Georgian structure, built in 1785-86 by Jacob Small, Sr., a local carpenter. The design for the building is also attributed to Small.

The peaked roof is topped on the west gable by a square tower with octagonal cupola-on-cupola, reminiscent of the style of Christopher Wren.

The entrance, in the second (w) of five bays, is covered by a pedimented vestibule. A double door, panelled, has leaded stained glass sidelights and an arched transom.

The windows on each floor have semi-circular arches with radiating muntins and twenty-two over fifteen sash. Much of the original glass still remains. Between floor levels there is a white limestone belt course. A wooden cornice with modillions encircles the building forming pediments on the gables.

A major remodeling in 1839 created a projection with hipped roof in the east wall which houses the pulpit and marks the aspe. These renovations also resulted in the removal of the interior balconies.

The nails throughout the building were hand-made. The bells, cast in Germany, and installed in 1789, are still used.

The Otterbein Church is located within a large Urban Renewal area which surrounds the Baltimore harbor. This will result in the removal of the commercial structures which now surround it and the creation of parks and new dwelling places. Accordingly, the church has long-range plans for restoring the building and grounds to their former beauty.

STATEMENT OF SIGNIFICANCE

The Otterbein Church is the only eighteenth-century church building of any denomination in continuous use which remains in Baltimore. It was built in 1785-1786 by Jacob Small, Sr., for a congregation of Germans who, under the leadership of Pastor Phillip Wilhelm Otterbein, had separated from the Lutheran Church.

Here, in 1789, the first Conference of United Brethren preachers was held, resulting in the official organization of the Church of the United Brethren in Christ, and in the election of Pastor Otterbein as a bishop of the new church.

Otterbein's grave, in the churchyard, is marked by a monument, erected in 1913, one hundred years following his death.

Archbishop Carroll

The Roman Catholic Cathedral as Benjamin Latrobe designed it, completed in 1821. The present onion towers were added later

The Seed that Fell into Good Ground

BALTIMORE holds a unique place in the religious history of the nation, appropriate to the chief city of Maryland, where religious freedom in America had its beginning.

Following the Revolution, the Pope appointed Father John Carroll, a Marylander, Vicar General of the Roman Catholic Church in the United States. In 1789 Father Carroll became the first Roman Catholic Bishop in this country. In 1808 the Baltimore Cathedral, which he had planned, was elevated to the rank of a metropolitan church and Dr. Carroll was invested with the dignity of Archbishop. Thus Baltimore became the birthplace of the Roman Catholic hierarchy in this country.

Baltimore may claim also the country's first Methodist Bishop. December 27, 1784, Francis Asbury was ordained in Lovely Lane Meeting House. At the same conference the Methodist Church in the United States was born.

Otterbein Church, on Conway Street near Sharp, erected in 1784 and the oldest church edifice still standing in the city, was named for Bishop Philip William Otterbein, on whose teaching the Church of the United Brethren in Christ was based.

In 1842, Baltimore saw the organization of Har Sinai Congregation, first Jewish congregation founded on Reform principles in the United States. This group held its first regular services in 1843 in a second-floor front room in the home of Moses Hutzler, Exeter Street and Eastern Avenue (right).

OTTERBEIN CHURCH

112 W. Conway Street

1785-86

Architect: Jacob Small, Sr.

Designed by Jacob Small, Sr., this is Baltimore's only 18th century Georgian style church building still in use today. It was built between 1785-86 for a congregation of Germans who, under the leadership of Pastor Phillip Wilhelm Otterbein, had separated from the Lutheran church. In 1789, in this building, the Church of the United Brethren was organized and Pastor Otterbein was elected bishop. Now the church is part of the United Methodist denomination, following a merger in the 1960's.

The building is unique architecturally. Its octagonal cupola is reminiscent of the work of the English architect, Christopher Wren. Much of the original glass remains in the arched windows. The nails throughout the building were handmade and the bells, cast in Germany and installed in 1789, are still in use.

Pastor Otterbein's grave is in the churchyard, marked by a monument erected 100 years after his death.
