Criteria: \_\_\_A \_\_\_B \_\_\_C \_\_\_D Considerations: \_\_\_A \_\_\_B \_\_\_C \_\_\_D \_\_\_E \_\_\_F \_\_\_G \_\_\_None

Is the property located within a historic district? \_\_\_no Xyes Name of district: Westport Historic District

Is district listed? Xno \_\_\_yes Determined eligible? Xno \_\_\_yes District Inventory Number: B-1342

Documentation on the property/district is presented in:

**Description of Property and Eligibility Determination:** *(Use continuation sheet if necessary and attach map and photo)*

The Waterview Avenue Bridge, constructed in 1950, crosses over Russell Street (Maryland 295) in the City of Baltimore. The two span bridge is constructed with steel girders and beams reinforced with concrete piers and abutments. The walls are faced with uncoursed stone. The ramps connecting to MD 295 are clad with a similar stone facing. The deck is a three lane, concrete passageway with steel barriers on either end.

The Waterview Avenue Bridge was constructed circa 1950 in conjunction with the construction of MD 295/Russell Street to meet the Baltimore-Washington Parkway. While not part of the Parkway, the bridge mimics the design of the bridges found on the Baltimore-Washington Parkway. Its form is commonly found on the Baltimore-Washington Parkway in better condition than seen at Waterview Avenue

The Waterview Avenue Bridge is not associated with " an event, a series of events or activities or patterns of an area's development," nor is it associated "with the life of an important person." Furthermore, the bridge is not "an engineering technique that shaped the historic identity of an area," nor does it "possess any information that would communicate further knowledge" (National Register 1995:7). . In conclusion the Waterview Avenue Bridge is recommended not eligible for listing on the National Register.
