DESCRIBE THE PRESENT AND ORIGINAL (if known) PHYSICAL APPEARANCE	
<p>This 10-story brick and exposed concrete apartment building is 8 bays wide on its St. Paul Street front. Constructed in the 1950's, the building is an example of Internation Style survival architecture.</p> <p>Completely lacking ornamentation, except for the large aluminum numerals "1010" for identification, the building has flat surfaces. The casement windows are banded together in groups with outlining ribbons of concrete, which turn the corners of the building to include the deeply recessed cantilevered balconies within their borders. The top stories rise above the first floor walls, one of which is of recessed, polished black granite and the other of exposed concrete, which are separated by a recessed plnated entranceway which leads to an aluminum and glass glazed lobby wall. Concrete piers resting on granite pedestals (perhaps granite sheatheed concrete) frame the low granite wall which partially screens the entrance. The piers give support to a band of exposed concrete, a half-story in ehight, which divides the entrance from the apartments above, and visually unifies the disparate ground level architectural elments.</p>
