DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL APPEARANCE	
<p>This commercial structure, located on the NW corner of Calvert and Pleasant Streets, is three stories high and three bays wide along Calvert St. (front), five bays wide along Pleasant St. (side). The building is flat-roofed and surfaced in running-bond brick, plate glass and cement.</p> <p>Beginning with the Calvert St. facade: The end bays are identical, and within these bays, each floor is identical. Each floor here contains a coupled pair of tripartite rectangular windows with horizontal mullions, a thicker vertical mullion separating each trio of the couple. The middle light of each trio opens out on a horizontal hinge. A brick panel similar in appearance to the remainder of the wall separates each coupled set, while a thin stone frame surrounds each set.</p> <p>The central Calvert St. bay is flanked on either side by slightly projecting three story panels of cement block resting on stone foundations. Between the panels is a six foot deep recessment, the sides of which are also surfaced in the cement block pattern. At the back of the recessment, approached by four stone steps, are rectangular double doors under a single flat transom. To the sides are fixed glass panels under transoms. A flat cement shelf projects from the back of the recessment to facade level just above the doors, separating the first and second floors. Above the shelf, spanning two floors, is a 3x3 array of fixed pane glass, topped by a cement block panel carried over from the panels flanking the bay.</p> <p>Along the Pleasant St. facade, the first, third and fifth bays are identical, as are the second and fourth. Among the former set, each bay features a coupled set of four light horizontally arrayed windows, with a thick vertical mullion dividing the couple. This pattern is repeated on each story. The second and fourth bays differ only in that each coupled window set is divided by a brick panel similar to those of the Calvert St. facade. replacing the thin mullion of their odd-bayed counterparts. In addition, single light cellar windows with brick sills underlie each bay, one under each odd bay, and two under even bays.</p> <p>A thin stone ridge, contiuing around the facade, tops the structure.</p>

STATEMENT OF SIGNIFICANCE

Only the buildings facing Calvert Street remain on this block. These represent either later nineteenth century vernacular rowhouse design, or late nineteenth/early twentieth century commercial-industrial architecture. In general, the buildings compliment one another despite varying amounts of alteration, and the block as a whole projects cohesion.
