D	Insignificant/detrimental	good	fair	poor	bad

Notable features:

Small, serviceable houses, bow fronts, stone lintels and sills, basements and steps of stone, greenstone from Baltimore County. The rears are well kept. Housekeeping standards high despite the unfavorable context of the last years.

Environmental context:

Damaging traffic on Mulberry Street. Interstate 70 will be depressed and Mulberry will become a service street. Redesign of street, sidewalks, pavings, lighting, planting, etc., needs to be made in context of new situation. Should be improved living environment over current conditions.
