DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The building is five bays wide and three stories high. The roof is flat. Foundation and building walls are laid in common bond. The window apertures, now boarded over, are flat and accompanied by splayed brick lintels and stone sills. Fenestration is proportional and symmetrical. The story facades of each bay, except the center one, are punctuated by one aperture. The first story facade of the center bay is punctuated by flat, wood double doors and an accompanying flat single light transom. The doors surmount four concrete steps and a concrete stoop. The entrance is distinguished by two iron railings and a decorative wood surround surmounted by a flat, bracketed door hood. A painted wood cornice and frieze surmounts the building facade.
