DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This two story, two bay brick house with sloping shed roof is actually only the rear addition of the gable roofed house that once occupied the site in front of it on William St. The current structure sits well back from the street and a front door and windows have been added. The facade is covered with formstone.

The house is two stories in height, about 12' wide, and occupies a lot 82' deep. The house is five bays deep and there are no rear additions. The house is probably constructed in common bond but the facade has been covered with formstone. The shed roof slopes down from north to south for the entire length of the house. A single hooded chimney is located along the north side of the house.

Although the original treatment of the door and window lintels and sills has been hidden by the formstone covering, it is apparent that the openings have flat lintels. All of the window openings are filled with 1/1 double hung sash. A panel door with an upper, multi-light section, is set beneath a single light transom. The house sits on a fairly low basement, the entrance being reached by three stone steps. A rectangular basement opening is located beneath the first floor window.
