DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This two story, two bay brick house with gable roof represents a late version of the gable roof style, having been built c. 1870. The house has been covered with formstone.

The house is two stories in height, 14' wide, and occupies a lot 82' deep. A two story high, one bay wide and deep stair hall extension connects the main house to a two story high, four bay deep rear addition. The house is constructed in running bond but the facade has been covered with formstone. The low-pitched gable roof has a two-tier brick cornice which has also been hidden by the formstone. There are no extant roof chimneys.

Although the original treatment of the door and window lintels and sills has been hidden by the formstone covering, it is apparent that all of the openings had segmentally arched brick lintels with solid wood tympanums. All of the window openings are filled with 1/1 double hung sash. There is a modern flush door set beneath a single light transom. The house sits on a high basement, the entrance being reached by four brick steps each. There is a rectangular basement opening located to the right of the steps.
