<input checked="" type="checkbox"/> fair	<input type="checkbox"/> unexposed		date of move: _____

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The row of nineteen two-story, two-bay wide vernacular Queen Anne-style brick houses with shed roofs and decorative brick cornices were built c. 1895. Six of the houses retain their original brick facades, which were always painted; the rest of the row has been covered with formstone.

The houses are two stories in height. Those at 1801-1813 Vine St. are 11'3", 12', and 12'6" wide on lots 50' deep; those at 1815-1819 Vine St. are 13' wide on lots 54' deep; and those at 1821-1837 Vine St. are 13' wide on lots 78' deep. Each house is three small rooms deep and there is no backbuilding. The houses are constructed in running bond and were originally painted. Each house has a single hooded chimney located at the rear corner of the house. The shed roofs are capped by a sheet metal and brick cornice consisting of a sheet metal crown molding set above a row of brick dentils. The frieze area is unusual, being composed of vertically-set stretcher bricks, positioned at an angle to the façade, thus creating a ribbed effect.

The tall, narrow window and door openings have segmentally arched brick lintels and scroll-sawn tympanums. Several of the original 4/4 sash survive; other openings are filled with 6/6 or 1/1 replacement sash. The sills are wood. Doorways have double-light transoms and show a variety of replacement door types. The houses sit on fairly high basements, articulated with a brick water table composed of three rows of stretcher bricks, and lit by a tall sash. Each house is reached by three or four wooden or concrete steps.

8. Significance

Period	Area of significance	check one & justify			
<input type="checkbox"/> prehistoric	<input type="checkbox"/> archeology-prehistoric	<input checked="" type="checkbox"/> community planning	<input type="checkbox"/> landscape architecture	<input type="checkbox"/> religion

Specific dates c. 1895

Builder/Architect

Prepare both a summary paragraph of significance and a general statement of history and support.

This group of houses significant as representing the level of architectural stylishness builders were willing to give to small street houses in the late nineteenth century and is testament to the fact that their was no stigma attached to small street living. The houses were built according to a pattern that was quite common to the city's working class neighborhoods of the period c. 1870 to 1910. Recognizing that workers held different levels of jobs (and pay), builders created a hierarchy of house sizes (and prices) in the new neighborhoods going up to serve the expanding factory districts ringing the harbor and northeast and southwest of the central city. Builders acquired anywhere from an eighth to a half of a city block and built 14' to 15'-wide three-bay-wide, two-story houses on the main streets, and smaller, 11' to 13'-wide two-bay-wide, two-story houses on the narrower streets bisecting the blocks. Typically, in this period, main street houses might sell for \$1,200 - \$1,500; small street houses for \$700 - \$900.

Occasionally, the builder retained ownership of his small street houses to provide income for himself as rental properties. In this way people of varying means could afford to live in the same block. If they couldn't afford the approximately \$750 purchase price of the small street houses, then they *could* afford the \$8 or so a month it would cost to rent one, while they saved to be able to buy their own home later.

The houses are especially significant because of their proximity to the slaughterhouses of southwest Baltimore and their related industries, particularly the William Wilkens & Co. Curled Hair Manufactory, one of the largest employers in the area. A number of German-American owned breweries were also located in this section of the city. Moderately-priced housing was built to provide homes for the mainly German immigrants who came to southwest Baltimore to work in these rapidly expanding industries in the decades after the Civil War.

9. Major Bibliographic References

Mary Ellen Hayward and Charles Belfoure, *The Baltimore Rowhouse*
(New York: Princeton Architectural Press, 1999)

10. Geographic Data

Acreage of nominated property

Quadrangle name

Verbal boundary description and justification

11. Form Prepared by

name / title Dr. Mary Ellen Hayward

Organization The Alley House Project

street & number 1306 Carrollton Ave.

city, town Baltimore

date

telephone

state & zip code Maryland 21204

The Maryland Historic Sites Inventory was officially created by an Act of the Maryland Legislature to be found in the Annotated Maryland, Article 41, section 181 KA, 1974 supplement.

The survey and inventory are being prepared for information and record purposes only and do not constitute any infringement of rights.
