

CAPSULE SUMMARY

BA-136

Spamer Homestead

9811 Oak Park Drive

Baltimore, Baltimore County

Circa 1820

Private

Constructed circa 1820, the Spamer Homestead is located in the Eleventh District of Baltimore County near the village of Germantown and Perry Hall. In 1775, Henry Dorsey Gough purchased a mid-18th century estate, located in the vicinity of the current intersection of Belair and Joppa Roads, and renamed it Perry Hall. By the mid-19th century the Perry Hall lands had been subdivided and other landholders began to construct residential buildings. The 1850 Sidney map denotes the Spamer Homestead as belonging to John Fox. Between 1867 and 1886, the Baltimore and Jerusalem Turnpike Company Inc. completed a turnpike following the path of Belair Road to the existing bridge over Little Gunpowder Falls. During the early-20th century Perry Hall expanded and absorbed the small farming community of Germantown. The suburbanization of Perry Hall occurred after the Great Depression when many Baltimore residents relocated to the suburbs. The Spamer family has been residing at 9811 Oak Park Drive since 1881.

Facing Northeast and sited on a wooded lot next to a 1990s development, the random-rubble stone house, constructed circa 1820, is three bays wide and two-and-a-half stories high. It has a center entry containing a single-leaf wood door and a 1-light transom. The 6/6 windows are supported with thin slate sills. The roof has been replaced with a half-gambrel clad with asphalt shingles. The façade features three gable dormers, not original to the house. Several additions have been made to the dwelling. One addition is a two-and-a-half story random-rubble stone section capped with a mansard roof clad with variegated wood shingles. A shed roof dormer with paired 2/2 double-hung sash windows was later added to the house.

Associated with this property are four historic and three non-historic secondary buildings.

Prepare both a one paragraph summary and a comprehensive description of the resource and its various elements as it exists today.

The original house of the Spamer Homestead was constructed circa 1820 and is nestled in a suburban development. Mature trees and shrubs screens Gunpowder Falls from view. The property has a gravel driveway and is surrounded by overgrown vegetation. The random-rubble stone house, original to the property, is three bays wide and two-and-a-half stories high. It has a center entry containing a single-leaf wood door with a 1-light transom. The 6/6 windows are supported with thin slate sills. The roof has been replaced with a half-gambrel clad with asphalt shingles. The façade features three gable dormers, not original to the house. Several additions have been made to the dwelling. One addition is a two-and-a-half story random-rubble stone section capped with a mansard roof. The roof is clad with variegated wood shingles. The windows in this section are 2/2 double-hung wood sash with square-edged wood sills and lug wood lintels. A shed roof dormer with paired 2/2 double-hung sash windows was later added to the house.

Associated with this property are four historic and three non-historic secondary buildings. Close to the main dwelling is a two-and-a-half-story dwelling of wood frame construction clad with weatherboards. Dating circa 1890, the first story contains a double-leaf diagonal-board doors and is covered with a pent roof. The upper stories feature 6/6 double-hung wood sash windows. The upper half story is clad with square-butt and diamond-shaped slate tiles. The building is capped with a front gambrel roof featuring overhanging eaves, a boxed wood cornice, and a wood soffit. Next, is a circa 1900 barn. It is wood frame construction and is clad with vertical-board siding. It features a 4-light wood casement window and one single-leaf vertical-board door. It is covered with a side gambrel roof sheathed with corrugated-sheet metal. A central cupola is clad with corrugated-sheet metal. Next to the second dwelling is a wood-frame shed, dating 1940, standing one-and-a-half stories with a front-gable roof clad with corrugated sheet metal. The building is covered with asphalt roll and features overhanging eaves and a boxed wood cornice. One window is missing in the upper-half story. Next to this shed is a non-historic shed dating from the 1960s. It is constructed of cinderblock with a gambrel roof clad with asphalt shingles. A rebuilt machine shop, dating circa 1960, is constructed of cinderblocks. It stands one-and-a-half stories high and is three bays wide. It has one single-leaf wood door, a multi-light wood window, and a sliding corrugated-sheet metal door. The shop is capped with a side gambrel roof and features two shed-roof dormers. The third non-historic building is a wood-frame tractor shed, dating circa 1980. It is capped with a shed roof with corrugated-sheet metal.

Evaluation for:

National Register Maryland Register not evaluated

Prepare a one-paragraph summary statement of significance addressing applicable criteria, followed by a narrative discussion of the history of the resource and its context. (For compliance reports, complete evaluation on a DOE Form - see manual.)

Facing northeast, this dwelling known as the Spamer Homestead, was constructed circa 1820. The property is located near the historic village of Germantown and Perry Hall in the Eleventh District of Baltimore County. In 1775, Henry Dorsey Gough purchased a mid-18th century Georgian estate from Corbin Lee and renamed it Perry Hall. This property was located in the vicinity of the current intersection of Belair and Joppa Roads. Belair Road connected Baltimore to the town of Bel Air as early as the mid-1700s. Dating to the 1730s, Joppa Road connected settlements along the Patapsco River with Joppa, the original Baltimore County seat located on the Big Gunpowder River. The Perry Hall estate was located a short distance to the north of the intersection of these two important Colonial period roads. This arrangement set the area on a course for development as a crossroads community.(1)

By the mid-19th century, the lands associated with Perry Hall had been greatly subdivided, and several other landholders in the area began to construct residential buildings along either side of Belair Road. The 1850 county atlas shows at least nine residential structures located between the two rivers. In addition to these, three taverns were clustered around the center of the community near the intersection of Joppa and Belair Roads. The name Germantown came to this settlement in the 1860s, when a significant number of German farmers began to settle in and around the area.(2)

Between 1850 and the mid-1870s, the Germantown community grew considerably. From the nine residential structures in 1850, the town grew to at least thirty-seven in 1877. This number continued to increase, for the county history published shortly thereafter records the population as fifty inhabitants. At that time, a general store, two blacksmith shops, a schoolhouse, three churches, and tavern, and sawmill were located in the small settlement.(3)

In 1867, the Baltimore and Jerusalem Turnpike Company incorporated with the intent of creating a better road from Baltimore to the town of Jerusalem. The turnpike was slated to follow the path of Belair Road until it reached the Little Gunpowder Falls, at which point it would veer off and follow Jerusalem Road for the remainder of the distance. The Turnpike Company completed the first eight miles of the road to just south of Perry Hall with the remainder of the road left unimproved. Due to complaints by local citizens and administrative changes in the company, the road was completed for an additional four miles to the existing bridge over Little Gunpowder Falls in 1886.

Since the mid-20th century, the landscape of Germantown has greatly changed. To begin, the community was absorbed by the town of Perry Hall to the immediate south, which developed more through the early 20th century than Germantown. The rural character of the area did not change until after the Great Depression. Increased out migration from Baltimore and development of the surrounding area led to the suburbanization of Perry Hall. Belair Road, now a main thoroughfare through the town, was widened in the latter half of the 20th century and is now a four lane highway. Commercial buildings, churches, and other institutional buildings now intermingle with a few pockets of residential construction along Belair Road just north of its intersection with Joppa Road.

The Spamer Homestead is shown on the 1850 Sidney map belonging to John Fox.(4) By 1877, the property had transferred to Renshaw.(5) In 1915, W. Spamer was the resident of the dwelling at 9811 Oak Park Drive.(6) In 2002, screened by mature trees and overgrowth, the property is nestled within a 1990s suburban development. The owner of the property in 2002, is William J. Spamer. The Spamer's have resided at this located since 1881.(7)
