DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

There are four bungalows on Courtland Ave. which are very similar to those on Susquehanna Ave., and this house is one of them. This bungalow has many features typical to that style including a large oversized dormer and a single story porch which incorporates its roof into the roof of the main block thus creating a catslide roof.

Generally, this building is a 1½ story frame structure covered with brown wooden shingles, resting on a high rock-face formstone foundation. It is three bays wide and the equivalent of three bays deep. The gable-end roof is accentuated with deep overhanging eaves and exposed rafter ends.

The west side of the house facing the street is the main facade. The most prominent feature is the oversized, shed-roofed dormer centrally located above the porch roof. This dormer is vented by a pair of 6/1 sash windows.

The porch, an essential part of the bungalow style, rests on rock-face formstone piers. The space between the porch and ground is filled with lattice. The roof of the porch, which has a tongue-and-groove ceiling, is supported by truncated columns.

There is an entrance door in the southernmost bay and a pair of 6/1 sash windows on the north bay of the first level.

The south facade is characterized by the irregular fenestration. There is a single 6/1 sash in the upper south bay, a casement window on the first level providing light for the staircase within and one 6/1 sash in the lower westernmost bay. The overhanging eaves of this gable-end contain tongue-and-groove soffit. A corbeled brick flue chimney pierces the eaves of the roof just east of the ridge.

The east facade is similar to that of the west facade.

No chimney exists on the north facade, therefore a pair of centrally located 6/1 sash windows vent the gable-end on the second level.

The strongest feature of this facade is a projection two bays wide (suggesting a bay window) on the first level measuring 10'2" wide and projecting 16". This projection has its own shed roof.

The interior design of these bungalows was originally identical. This house is two rooms deep and the equivalent of two rooms wide. The western most portion is occupied by the main parlor. A staircase runs along the south wall.

The dining area and kitchen share the easternmost portion of the house. It is the dining area which contains the slight bay projection.

The second level contains a central hall with three bedrooms and one bathroom.

In the full basement there are transverse joists (lap joined and toenailed) and a laminated "summer beam" 10" wide supported by two 6" x 8" posts. The block walls are penetrated by casement windows.
