DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

There are four bungalows on Courtland Ave. which are very similar to those on Susquehanna Ave., and this house is one of them. This bungalow has many features typical to that style including a large oversized dormer and a single story porch which incorporates its roof into the roof on the main block thus creating a catslide roof.

Generally, this building is a 1½ story frame structure covered with asbestos shingles, resting on a high rock-face formstone foundation. It is three bays wide and the equivalent of three bays deep. The gable-end roof is accentuated with deep overhanging eaves and exposed rafter ends.

The West side of the house facing the street is the main facade. The most prominent feature is the oversized, shed-roofed dormer centrally located above the porch roof. This dormer is vented by a pair of 6/1 sash windows.

The porch, an essential part of the bungalow style, rests on rock-face formstone piers. The space between the porch and ground is filled with lattice. The roof of the porch, which has a tongue-and-groove ceiling, is supported by truncated columns. Steps lead to the porch from the north side.

The fenestration is regular, however there are two doors in the southernmost bay of the first level.

The south facade is characterized by the irregular fenestration. There is a single 6/1 sash in the upper south bay, a casement window on the first level providing light for the staircase within and a single casement for the cellar.

The overhanging eaves of this gable-end contain tongue-and-groove soffit. A corbeled brick flue chimney rests on a brick and poured concrete foundation and pierces the eaves of the roof just east of the ridge.

The east facade is similar to the west facade in that it is approximately three bays wide and contains an oversized dormer.

Unlike the south facade, no chimney exists on the north facade, therefore a pair of centrally located 6/1 sash windows vent the gable-end on the second level.

The strongest feature of this facade is a projection two bays wide (suggesting a bay window) on the first level measuring 10'2" wide and projecting 16". This projection has its own shed roof.
