

CAPSULE

Dr. Grafton M. Bosley was initially responsible for the residential development of west Towson. He was a prominent land owner who is especially noted for having donated part of his estate for the site of the Court House and Jail in 1853. By 1899, Bosley Avenue, Allegheny Avenue, W. Pennsylvania Avenue, W. Chesapeake Avenue, Highland Avenue, and later Central Avenue were laid out for accessibility to lots ready for public development.

This is one of two houses built for the purpose of housing several families in the west Towson area; an example of an early 20th century apartment building. This late Victorian structure is one of four in the Towson area which employs local red sandstone on the first level with frame upper levels. It remains as one of only two houses in the 300 block of W. Chesapeake Avenue.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Exterior Only:

This house is somewhat similar to three other houses in the Towson area. Features that tie all four together include the red sandstone first level topped by upper frame levels. Steeply pitched gables have very deep eaves, suggesting pedimented ends. The fenestration is a regular 1/1 sash. The upper levels of this house are covered with asbestos shingles.

The main facade or south facade of this structure is very symmetrical. On both levels, centrally located doorways with side lights and a transom are flanked by two 1/1 sash windows in each bay thus making a total of five bays. Each window has white colored sandstone lintels on the first level.

Most interesting is a two story, three bay centrally located porch supporting a large gabled-end roof. The two tall columns are also sandstone. The gable-end itself has very deep eaves as the main block, tongue-and-groove soffit and a Palladian window lighting the area within.

As the main facade, the west facade is very symmetrical, being a strict four bays wide. The third level has a smaller sized pair of 1/1 in each outer bay and the gable end is lighted by a Palladian window.

The only irregularities displayed on the north facade are where some minor alterations have taken place. The outer bays remain unchanged.

The central bay of the first level is occupied by a shed roofed projection one bay deep by three bays wide. This frame projection rests on a concrete foundation. The upper level also contains a projection, this being original and projecting approximately two feet. There is only one centrally located window. This portion is topped by a gable-end roof which also has deep eaves. This area, however, does not have a Palladian window but an entrance door and window which are surrounded by a wrought iron porch supported by the shed roof addition below.

The only difference in the east facade from the west is a shed roof single story porch covering the southern two bays. The roof itself is supported by two clusters of three doric columns which cover an entrance door with transom and one window.
