

CAPSULE

Dr. Grafton M. Bosley was initially responsible for the residential development of west Towson. He was a prominent land owner who is especially noted for having donated part of his estate for the site of the Court House and Jail in 1853. By 1899, Bosley Avenue, Allegheny Avenue, W. Pennsylvania Avenue, W. Chesapeake Avenue, Highland Avenue, and later Central Avenue were laid out for accessibility to lots ready for public development.

This is one of two houses built for the purpose of housing several families in the west Towson area; an example of an early 20th century apartment building. This late Victorian structure is one of four in the Towson area which employs local red sandstone on the first level with frame upper levels. It remains as one of only two houses in the 300 block of W. Chesapeake Avenue.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Exterior Only:

This house is somewhat similar to three other houses in the Towson area. Features that tie all four together include the red sandstone first level topped by upper frame levels. Steeply pitched gables have very deep eaves, suggesting pedimented ends. The fenestration is a regular 1/1 sash. The upper levels of this house are covered with brown wooden shingles.

Most interesting is a two story, three bay centrally located porch supporting a large gable-end "dormer". The two tall columns are also sandstone. The gable-end itself has very deep eaves and tongue-and-groove soffit as the main block and a Palladian window lighting the area within.

As the main facade, the west facade is very symmetrical, being a strict four bays wide. The northern three bays are covered by a single story frame addition which projects one bay to the west, is covered with brown wooden shingles and is topped with a pedimented roof. The third level has a smaller sized pair of 1/1 in each outer bay and the gable end is lighted by a Palladian window.

The symmetry is somewhat broken on the north facade. The east bays of the first level have been enclosed with a frame addition projecting one bay to the north. The central bays of the second level project approximately 2 feet and support a pedimented "dormer" which is lighted by a Palladian window. All three levels have open porches with balustered railings.

The east facade is identical to the west but does not have a frame addition.
