no

Property Name: Superintendants House, Spring Grove Inventory Number: BA-2344
 Address: Spring Grove Hospital City: Catonsville Zip Code: _____
 County: Baltimore County USGS Topographic Map: Baltimore West
 Owner: DHMH Is the property being evaluated a district? yes
 Tax Parcel Number: _____ Tax Map Number: _____ Tax Account ID Number: _____
 Project: _____ Agency: _____
 Site visit by MHT staff: no yes Name: L. Bowlin, 1985 Date: _____
 Is the property is located within a historic district? yes no

If the property is within a district District Inventory Number: BA-2319
 NR-listed district yes Eligible district yes Name of District: Spring Grove Hospital Center
 Preparer's Recommendation: Contributing resource yes no Non-contributing but eligible in another context yes

If the property is not within a district (or the property is a district) Preparer's Recommendation: Eligible yes no

Criteria: A B C D Considerations: A B C D E F G None

Documentation on the property/district is presented in:

#BA 157 (Bowlin, 1986); Project Review & Compliance Files; Spring Grove Architectural Survey Notebook

Description of Property and Eligibility Determination: *(Use continuation sheet if necessary and attach map and photo)*

Spring Grove Hospital Center, Catonsville, Baltimore County was initially determined eligible for the Maryland Register of Historic Properties in 1986. Trust policy is that any property eligible for the MRHP is also eligible for the National Register of Historic Places. Spring Grove is eligible under Criterion A, events, as the first state-sponsored facility for the mentally ill. The hospital had its origins in 1797 where the indigent sick and insane were cared for in Baltimore. By 1872 the hospital had outgrown its site and the state chose a new 200-acre site in Catonsville. The District is also eligible under Criterion C, as an architectural example. The hospital center does not have a specific layout, but rather its growth and development are demonstrated through the construction of buildings in response to new needs and developments in the care of the mentally ill. The 1985 survey included 25 buildings built between 1872 and 1944. All are eligible contributing resources to the historic district.

[*from Spring Grove Hospital Center DOE]

As a result of the recently completed survey, 25 buildings have been determined to be historically and architecturally significant to the development of public mental health care in Maryland at Spring Grove Hospital Center. This property, BA-2336, Rice Auditorium, was included on the list of significant properties. (See Bowlin, 1985)

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

The Superintendent's House is a two-and-a-half story, common bond brick building, designed in the Colonial Revival style. Built in 1940 as a home for the superintendent, the residence is located east of the Foster-Wade Building and north of the Stone Cottage Group. The building is currently being used as office space.

The Superintendent's House displays an L shape configuration. The dominant facade faces south and measures five bays wide and three bays deep. The extension which gives the building its L shape is two bays by two bays and projects from the northwest portion of the main block. A one-story brick garage stands adjacent to the house. Both the dwelling and the garage have steeply-pitched roofs and painted white bricks.

The dominant facade of five bays wide displays a broken pedimented doorway flanked by two windows on each side. The classical entrance has fluted pilasters, three rosettes across the abacus, scrollwork on the frieze, and dentil course on the cornice and the broken pediment. Centered in the broken pediment, a wooden urn rests. A beaded surround adorns the doorway. The door itself displays a fanlight window.

Wooden shutters and sills, a 6/6 double-hung sash, and a brick jack arch lintel characterize the first floor windows throughout the building. The second story windows repeat the pattern minus the brick lintel. Decorative wrought-iron fixtures retain the shutters.

Wooden modillions and dentils embellish the cornice. The slate, truncated hip roof begins above the cornice. Hipped dormers appear throughout the roof's surfaces. The dormers exhibit a similar pattern of a 6/6 double-hung sash, slate roof and wooden sills.

The eastern wall has an external wall chimney. Doors flank the chimney on both floors. In addition, the face exhibits a two-story portico based on a brick foundation. Wrought-iron pillars and balustrade add a decorative appearance to the portico. A steeply-pitched hip roof caps the portico.

The one story brick garage is joined to the main house by a slate, gable roof and a cement walkway. The common bond brick structure shows a retractable, wooden door on the east wall. The one car garage measures two bays by two bays and displays a simple cornice.

The interior of the dwelling perpetuates the Colonial Revival style. The floor plan reveals a central hallway flanked by two rooms on each side. The wide stairway consumes most of the hallway. The main parlor exhibits wainscoting, dentilled cornice, and an elaborate mantle with fluted pilasters,

rosettes, and miniature triglyphs. In contrast to this classicism, the interior of the building also displays a current fashion of the 1940's: Art Deco bathrooms. Brightly colored tiles and streamlined metal light fixtures characterize two of the bathrooms. The Superintendent's House received more interior detail than many of the buildings at Spring Grove. The decoration of the dwelling reflects the importance of the inhabitant's position and the public function of the building.

Level of Significance: national state local

Prepare both a summary paragraph of significance and a general statement of history and support.

Built during the administration of Silas W. Weltmer, the Superintendent's House provided the chief administrator with a new residence. Before the construction of the dwelling, the superintendent lived in private accommodations in the Main Building. The new residence for the superintendent allowed the administrator to live on the hospital property while removing him symbolically from the patients but still maintaining his position of authority. The superintendent held the ultimate power in the mental hospital environment and his home helped to reinforce that supremacy.

Henry Powell Hopkins broke from his usual pattern of Spring Grove buildings and designed a dwelling which complimented his earlier buildings but also showed an air of individuality. Leaving the cut limestone for the institutional buildings, Hopkins designed the Superintendent's House in brick, another one of his preferred construction materials. The architect utilized his trademark of academic classicism but added some different features such as the hipped roof, L shape plan, and shutters to give the building some individuality. While the exterior exhibits classical elements, the interior continues the ornamentation in detail. Few buildings on the campus have interior decoration of this extent, even the gatehouses show simple interiors. The decorative interior again reflects the influential resident of the dwelling.
