Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

11905 Woodberry Place is a two story brick dwelling of common bond (5 rows stretchers/1 row headers) resting on a coarsed rubble foundation. It is six bays wide one bay deep, of regular and even fenestration. A massive central chimney exits between bays three and four at the ridge of a gable end roof running east to west.

The fenestration of the main facade has been altered. Four basement windows in the foundation have been bricked in. Evidence of an entrance in the sixth bay would make this a double entrance house. A projecting brick cornice extends across the facade. All windows are 6/6 capped by flat arches on the second story and segmental arches on the first story. The west gable end is one bay wide with a segmental arch above the window and a lintel at its base. The north facade is three distinct levels, making it a bank house with what was once a basement kitchen. The first level is six bays wide; all windows are 6/6 with segmental arches and wooden lintels. A brick cornice extends across the facade. The east end is equivalent to two long bays. On the first floor is a centrally located 6/6 window with a segmental arch and lintel below. The north bay is a three light casement window. The second story is blind except for a modern vent in the gable.

Level of Significance: <input type="checkbox"/> national <input type="checkbox"/> state <input type="checkbox"/> local	

Prepare both a summary paragraph of significance and a general statement of history and support.

Franklinville was a small mill community built on the banks of Little Gunpowder Falls, a suitable natural resource for a water powered industry. Franklinville Mill was constructed in 1826 and changed ownership several times during the nineteenth century. It was one of seven Maryland properties incorporated by Mt Vernon Woodberry Mills in 1899, a national industry specializing in the highly efficient production of cotton duck. Under the management of this large corporation, Franklinville with its Presbyterian church, dance hall and general store with post office, took on the character of a 19th century planned mill community. Company employees occupied duplex houses clustered around the mill and were provided with their essentials right in the village. Franklinville's standard of living hinged upon the responsible management of Mt. Vernon Woodberry, Inc. which derived its success from the profits of each mill town under its control.

This structure, one of two brick houses in Franklinville, is a two story bankhouse. It is more substantial than the mill hand duplexes in the village. Situated on a knoll close to the mill, and across from the stone house that once belonged to the mill manager, this may have been the residence of a superintendent or other mill employee either ranked higher than most of the mill workers.
