Is the property located within a historic district? X no ___ Yes Name of district: _____

Is district listed? ___ no ___ Yes Determined eligible? ___ No ___ yes District Inventory Number: _____

Documentation on the property/district is presented in: Project review and compliance files.

Description of Property and Eligibility Determination: (Use continuation sheet if necessary and attach map and photo)

This is a one and one-half story stone residence located at 5 Keller Road, immediately to the northeast of Reisterstown Road (MD 140). It is less than a half mile from the I-695 interchange near Pikesville. Keller Road is a side-road in this area that still contain pre-1950 buildings, and No. 5 is the house closest to MD 140. Immediately to the northwest of Keller Road is a gated development with large modern residences, incongruous in scale with the relatively modest houses along Keller Road.

No. 5 Keller Road side-gable house has an off-center door flanked by single windows on each side, and there are two gable-roofed dormers on the roof. Windows are the one-over-one sash type and most have storm windows and replaced vinyl frames. A single-cell, altered wing on the north gable end of the house is covered with vinyl siding and rests on a stone foundation. This wing/addition now partially masks the exterior, gable end chimney. The wing/addition also features a wood balustrade on its roof, which is accessed from the ground via an outside wooden stairway. There is a second, added entrance at the top landing, perhaps indicating an upstairs apartment. There is an internal, drive-in garage in the rear of the house. The upper half-story of the house and the dormers are covered with vinyl siding.

NR-ELIBILITY REVIEW FORM

BA-2933

Continuation Sheet No. 1

Tax assessor information indicates that the house was built in 1940, and it appears on a topographic (7.5' Cockeysville) by 1943. It is typical of the Colonial Revival style influence of the day as applied to single family houses throughout the Mid-Atlantic region. Some builders called this simple plan and form a "Cape Cod"-style house. The property lacks significant architectural distinction and therefore would not meet the National Register Criterion C. Although there are approximately five other pre-1950 buildings along this road, they do not appear to constitute a significant concentration of residences that area united historically, or by plan or physical development. Consequently, there is no potential for a local historic district here. Furthermore, No. 5 Keller Road has no known significant association with important persons or events, nor would it likely have significance for the potential information contained in associated archaeological materials. The Peterson-Braswell House is unlikely to qualify for listing in the National Register of Historic Places under Criteria A, B, C, or D.
