Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

This house has been considerably restored since the following description was written by James T. Wollon, Jr., in 1980:

The small stone house on Cradock Lane appears to date from the opening years of the 19th century but inconclusive indications of possible early alterations suggest that an 18th century date may be possible, as will be described below. Built in two sections, the principal facade oriented to the road, to the south, the easterly section is the original. The westerly section was added at a very early date.

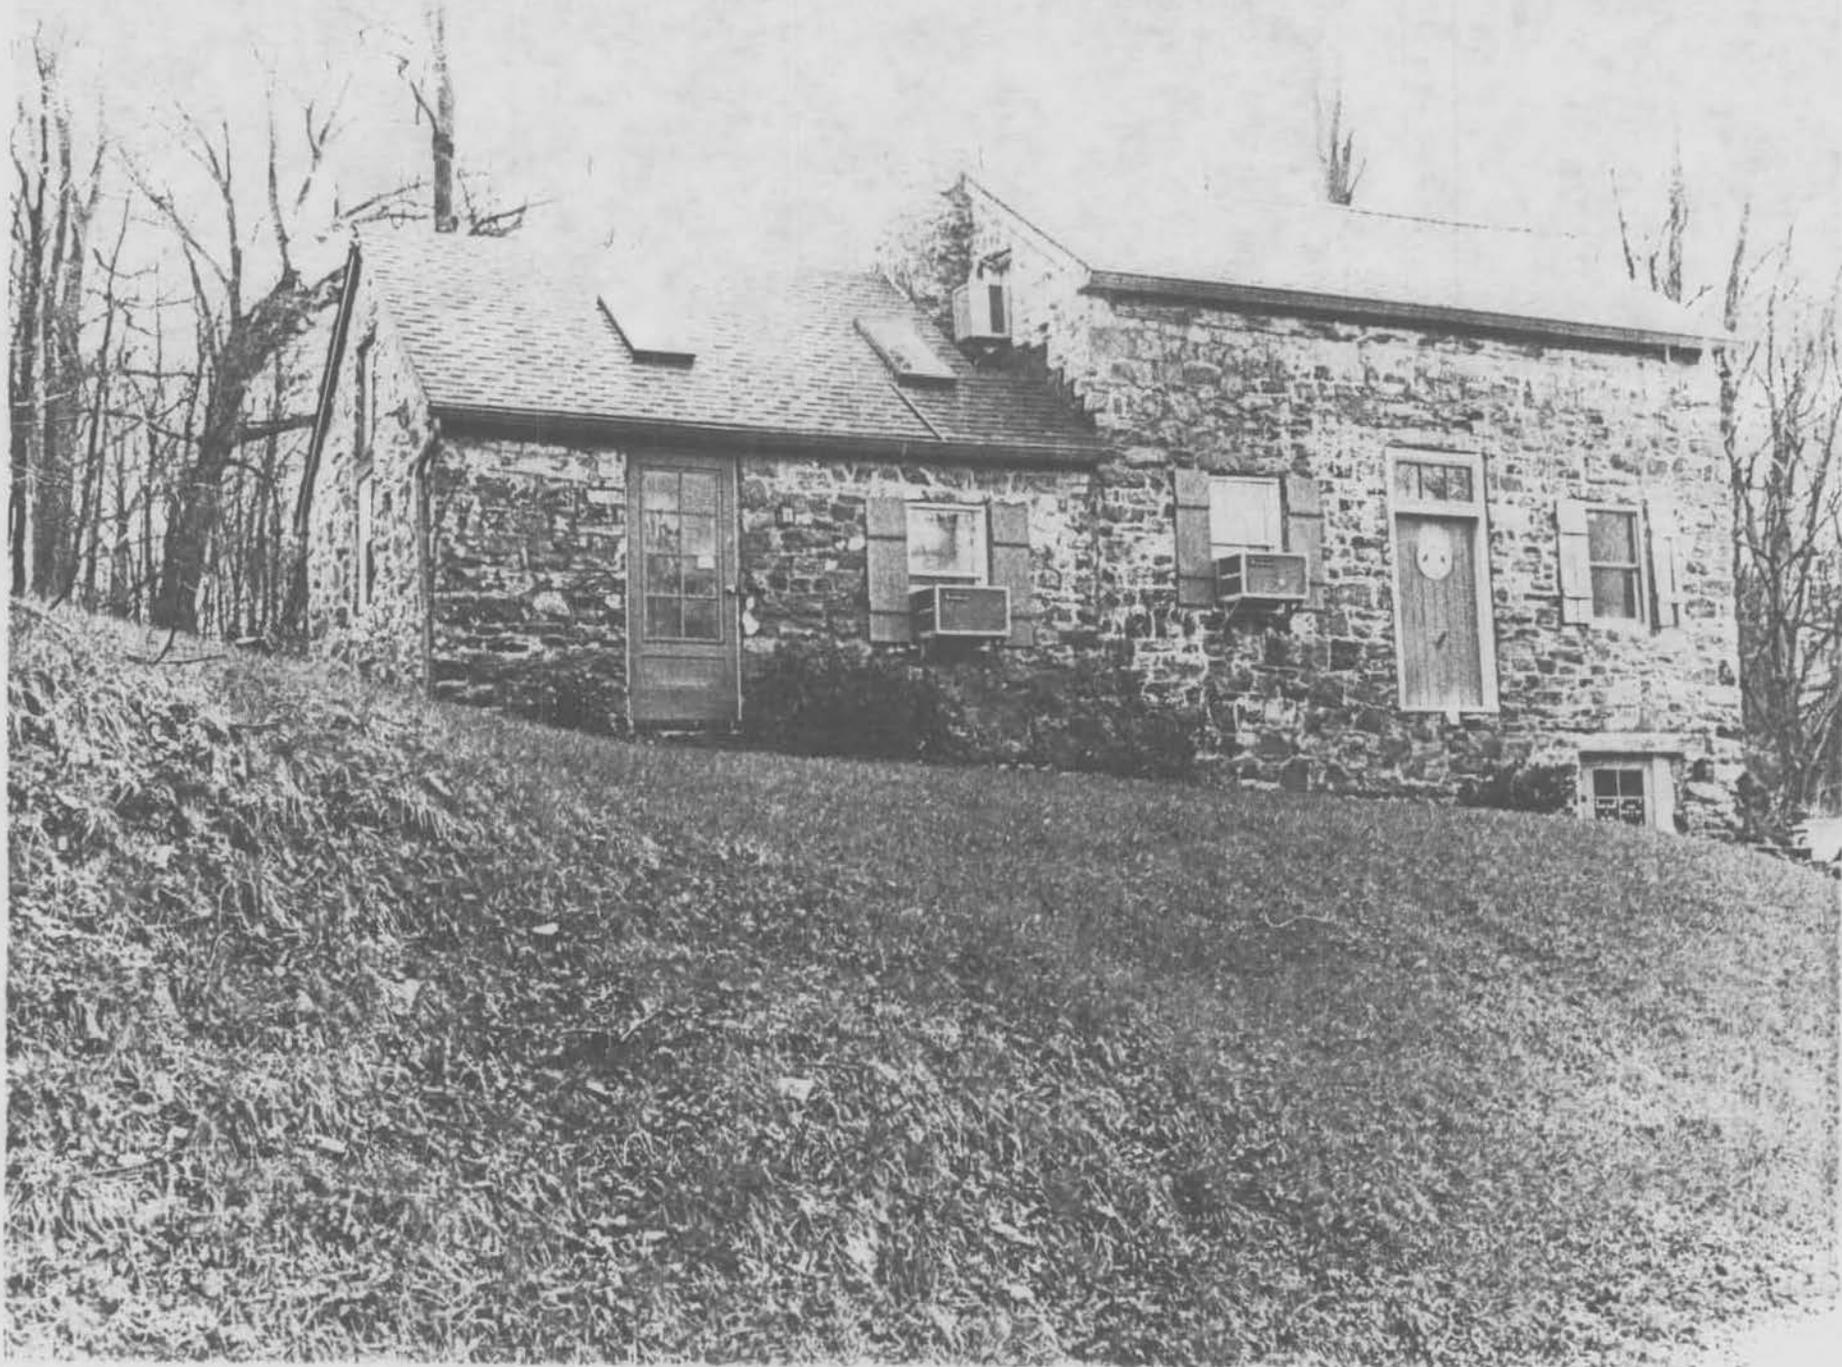

The original section is three bays in length, one and one half storeys in height. The door is centered in the south front and a 6/6 window is on either side, symmetrically spaced. Falling grade allows a door to the basement in the easterly bay of the south front. A small basement window in the east end has two iron bars built into the masonry; a window in the east gable lights the low second storey. A centered door is the only opening in the northwall. The hewn top wall plate is exposed flush with the south and north walls, entirely void of a cornice.

A single chimney rises externally at the west end of the original section, a brick stack above a stone chimney. That chimney broadens in width toward the north and its north side is flush and continuous with the north wall of the house. Internally, a chimney breast of conventional width projects into the large west room, its firebox trimmed with an architrave surround having a quirked cyma reversa with astragal on fillet backband, a design typical of the early 19th century. No interior evidence is visible of a fireplace as wide as the chimney would allow, suggesting an original chimney of unusual width (possibly 18th century) abandoned early in the 19th century and replaced by the conventional projecting chimney breast.

The west wing consists of three stone walls, the original section forming the east wall. It is two bays in length, one story in height. Doors are in the westerly bay of the south front and approximately centered in the north side; windows are in the easterly bay of the south front and centered in the west end. Internally, is a single room, void of detail. The massive original chimney projects in the northeast corner, without a fireplace in evidence. A ladder-stair in the southwest corner, in ruins, gives access to the unfinished loft.

A partition extends through the original section of the house just east of the door bay; its handsplit lath is fastened with early cut nails. The larger west room has the chimney breast fireplace and architrave surround described above. A simple chair rail surrounds the room, beaded top and bottom. Walls are plastered on the stone; the ceiling is covered with plywood and there are no other early details. The stair rises straight and enclosed against the north wall immediately north of the east room, then turns to the south to reach the second floor near its ridge line. The single room there, with sloping ceiling beneath the roof, has a very small fireplace in its west end. A few loose floorboards reveal nails with wrought heads on cut shafts, whitewashed straight-sawn joists and whitewashed undersides of the floorboards.

In the dirt-floored cellar, the first-floor joists are logs. A recess beneath the fireplace suggests a fireplace but it seems to have no flue. The exterior entrance to the cellar in the easterly bay of the south front retains a board door with long strap hinges, the only early door on the premises.

Prepare both a summary paragraph of significance and a general statement of history and support.

This small house was added to the Maryland Historical Trust Inventory in 1973 by volunteer Alice Martin. The house is shown in the 1877 atlas but marked as part of the Green Spring estate (BA 45) rather than Trentham (BA 41). For lack of a name, it has been written up as "the Gayley House" for a tenant family that rented it in this century. During the Valleys Planning Council's 1980 study, historian-researcher Anne Brooks reported:

This very early small stone house, formerly abandoned due to its cramped location on a sloping site, on a busy road, with insufficient space for contemporary water and sewage disposal systems, is typical of the first-generation dwellings erected on newly patented lands. This example may be that, it may be a much later tenant house or it may have been the modest dwelling of a local shopkeeper, craftsman, or artisan. Its stone walls are in very good condition, attesting to the skill and care with which it was built, and many of its few original details remain, albeit in poor condition.

Such houses exist in many places, usually abandoned, usually far below the standards of their surroundings, usually zoned out of usefulness and therefore usually threatened with certain annihilation, as is the cause with this example.

However, this house was not to disappear, and in an update by the Valleys Planning Council, the links with the original owners was clarified:

Clark and Ann MacKenzie bought the little stone house with 0.575 acres on the corner of Cradock Lane and Green Spring Valley Road on December 12, 1979, from Ralph DeChario. They are presently restoring it for rental purposes.

Ralph DeChario had owned this house together with the major part of the former Cradock Estate, which is now Queen Anne Village, since September 10, 1975, when he purchased it from Harry Waller. ² Harry Waller had in turn purchased this particular parcel of land from Thomas Cradock Jensen in 1971. ⁴ Thomas Jensen had inherited this parcel of land, together with the entire Cradock estate, December 10, 1960, from Arthur Cradock. ⁵ Arthur Cradock's sister Miss Katherine Cradock owned the estate before him until her death January 13, 1953. She had inherited it from her father, Thomas Cradock, June 7, 1886, with provision that her mother, Sallie Cradock, retain residency for her lifetime. ⁷

The small stone house does appear on the 1877 atlas map of the 3rd District, ³ which is the earliest definite record of it found to date; however, due to the architect's description, there is reason to believe the house could be 100 years older. The Cradocks had many buildings and tenant houses on their estate, and the as maps of the late 18th century are not available, our only source has been tax assessment lists which do not specify exact locations of houses. The 1798 tax list does list two houses, one of which very easily could be the one in question. Both measure 20 x 20 according to the list, and the present owner says that the original part of the house is close to those dimensions. The architect's description (Item 7) states that due to the care taken in construction, an excellent craftsman was probably the builder and a "stone Doctor's Shop" measuring 20 x 20 is described on the 1798 tax list.

Trentham, as the Cradock estate was called, has been designated as an Historic Site. ⁹ For five years prior to the construction of the mansion in 1750, the Cradocks lived in a one-room house on the property. ¹⁰ At that time, Cradock Lane, where the little stone house is, was the main route from Baltimore to Reisterstown; the present Reisterstown Pike not having been constructed until about 1790. ¹¹ Therefore, it is highly possible that due to the location of this house, it was the first house on the property and dates to at least 1745.

As promised in 1980, the house was restored, converted to office space, and in 1987 sold to the Gordons. Mrs. Gordon is also Dr. Gordon, and has been practicing psychaitry in the office, an interesting link with the medical activities of the Cradock family, and one would hope in the restored "doctor's shop" called for in the 1798 tax list.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

The small stone house on Craddock Lane appears to date from the opening years of the nineteenth century but inconclusive indications of possible early alterations suggest that an eighteenth century date may be possible, as will be described below. Built in two sections, the principal facade oriented to the road, to the south, the easterly section is the original. The westerly section was added at a very early date.

The original section is three bays in length, one and one-half storeys in height. The door is centered in the south front and a 6/6 window is on either side, symmetrically spaced. Falling grade allows a door to the basement in the easterly bay of the south front. A small basement window in the east end has two iron bars built into the masonry; a window in the east gable lights the low second storey. A centered door is the only opening in the north wall. The hewn top wall plate is exposed flush with the south and north walls, entirely void of a cornice.

A single chimney rises externally at the west end of the original section, a brick stack above a stone chimney. That chimney broadens in width toward the north and its north side is flush and continuous with the north wall of the house. Internally a chimney breast of conventional width projects into the large west room, its firebox trimmed with an architrave surround having a quirked cyma reversa with astrigal on fillet backband, a design typical of the early nineteenth century. No interior evidence is visible of a fireplace as wide as the chimney would allow, suggesting an original chimney of unusual width (possibly eighteenth century) abandoned early in the nineteenth century and replaced by the conventional projecting chimney breast.

The west wing consists of three stone walls, the original section forming the east wall. It is two bays in length, one storey in height. Doors are in the westerly bay of the south front and approximately centered in the north side; windows are in the easterly bay of the south front and centered in the west end. Internally is a single room, void of detail. The massive original chimney projects in the northeast corner, without a fireplace in evidence. A ladder-stair in the southwest corner, in ruins, gives access to the unfinished loft.

A partition extends through the original section of the house just east of the door bay; its handsplit lath is fastened with early cut nails. The larger west room has the chimney breast, fireplace and architrave surround described above. A simple chair rail

surrounds the room, beaded top and bottom. Walls are plastered on the stone, the ceiling is covered with plywood and there are no other early details. The stair rises straight and enclosed against the north wall immediately north of the east room, then turns to the south to reach the second floor near its ridge line. The single room there, with sloping ceiling beneath the roof, has a very small fireplace in its west end. A few loose floorboards reveal nails with wrought heads on cut shafts, whitewashed straight-sawn joists and whitewashed undersides of the floorboards.

In the dirt-floored cellar the first floor joists are logs. A recess beneath the fireplace suggests a fireplace but it seems to have no flue. The exterior entrance to the cellar in the easterly bay of the south front retains a board door with long strap hinges, the only early door on the premises.

STATEMENT OF SIGNIFICANCE

This very early small stone house, ~~formerly~~ abandoned due to its cramped location on a sloping site, on a busy road, with insufficient space for contemporary water and sewage disposal systems, is typical of the first-generation dwellings erected on newly patented lands. This example may be that, it may be a much later tenant house or it may have been the modest dwelling of a local shopkeeper, craftsman or artisan. Its stone walls are in very good condition, attesting to the skill and care with which it was built, and many of its few original details remain, albeit in poor condition.

Such houses exist in many places, usually abandoned, usually far below the standards of their surroundings, usually zoned out of usefulness and therefore usually threatened with certain annihilation, as is the case with this example.

Clark and Ann Mackenzie bought the little stone house with .575 acres on the corner of Cradock Lane and Green Spring Valley Road on December 12, 1979 from Ralph DeChiaro. They are presently restoring it for rental purposes.² Ralph DeChiaro had owned this house together with the major part of the former Cradock Estate, which is now Queen Anne Village, since September 10, 1975 when he purchased it from Harry Waller.³ Harry Waller in turn had purchased this particular parcel of land from Thomas Cradock Jensen in 1971.⁴ Thomas Jensen inherited this parcel of land, together with the entire Cradock estate, December 9, 1960 from Arthur Cradock.⁵ His sister Miss Katherine Cradock owned the estate before him until her death January 13, 1953. She had inherited it from her father, Thomas Cradock, June 7, 1886 with provision that her mother, Sallie Cradock, retain residency for her lifetime.

This small stone house does appear on the 1877 map of the 3rd District⁸ which is the earliest definite record of it found to date; however, due to the architect's description, there is reason to believe the house could be 100 years older. The Cradocks had many buildings and tenant houses on the estate and as maps of the late 18th century are not available, our only source has been tax assessment lists which do not specify exact locations of houses. The 1798 tax list does list 2 houses one of which very easily could be the one in question. Both measure 20 x 20 according to the list and the present owner says that the original part of the house is close to those dimensions. The architect's description enclosed states that due to the care taken in construction, an excellent craftsman was probably the builder and a "stone Doctor's Shop" measuring 20 x 20 is described on the 1798 tax list.

Trentham, as the Cradock estate was called has been designated as an Historic Site.⁹ For 5 years prior to the construction of the mansion in 1750, the Cradocks lived in a one-room house on the property.¹⁰ At that time Cradock Lane, where the little stone house is, was the main route from Baltimore to Reisterstown; the present Reisterstown Pike not having been constructed until about 1790.¹¹ Therefore, it is highly possible that due to the location of this house, it was the first house on the property and dates to at least 1745.
