Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

This one-story framed and tarpapered, hipped-roof structure faces west onto Maltby Street. Set on brick piers, it is a single-pile, two-room dwelling with six-over-six double-hung sash windows. There is one interior brick chimney and one exterior brick stove flue. A shed has been added to the east end wall, and the original west-facing shed-roofed front porch has been enclosed. The house has been reoriented so that its four-bay, south-facing long side is now the facade. This house was built in 1903, (See Calvert Journal, June 27, 1903) specifically for use by the U.S. Government as a Public Health and Marine Hospital Service "Third-Class Relief Station." (See Attachment) The structure was leased by the government from 1903-1930, when the U.S. Public Health Service closed its operation in Solomons. For a short time afterwards, a library was located here before it became a private residence. It remained as such until 1996.

The U.S. Public Health Service established a marine hospital in Baltimore and two relief stations at Solomons and Crisfield in Maryland. The latter were built close to the port heavily used by oyster dredgers at the turn-of-the century and were primarily there to alleviate the harsh conditions for the crew on oyster dredgeboats. The one in Crisfield burned many years ago, leaving the building Solomons as the only example of its type in Maryland. It has great significance for the maritime heritage of the State of Maryland.
