DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Leonard Long House

Although atypical because of lack of symmetry, this is nevertheless a common type of house because of its odd number of bays (3 wide and 1 deep) central pediment and L-plan (not a perfect L; front wing off set around 2'.)

According to the present owner Long, his grandfather, Leonard, built this house. Originally, it was like two others in the immediate area in that it was of the one up/one down variety made of hewn timbers. Mr. Long says that the uprights in his house are two story in height. Mr. Long's father was born in the house, and he would be in his late seventies if he were alive. Mr. Long remembers his father telling him that the access to the second story was an exterior staircase, and it was the only means of reaching the upper room.

All three generations of the Long living in this house have made their living through a combination of farming and fishing.

The oldest tobacco barn was dismantled a couple of years ago. The present barn and the several outbuildings appear to be modern.

What was once a tenant house for this farm is now on a separate parcel and has been for many years. Consequently, it is treated as a separate item. (See

The gable-end roof is still partially covered with wooden shingles, however, a modern roof is in progress. Modern siding and enclosed porches hide the original appearance of this building.
