Description of Property and Justification: *(Please attach map and photo)*

Architectural Description

The Dowell House #2 is located at 91 Church Street in Prince Frederick; it was built in 1930. It is a two-and-a-half story, two-bay house that rests on a concrete foundation. The exterior's first-story is clad in clapboard while the second story is clad in shingle siding. The building is topped with a hip roof and contains a small shed roof addition on its rear elevation. Stylistically, the building is a modest, altered example of an American Foursquare.

The building's two-bay, northeast-facing facade contains its main entrance. A one-story, column-supported, hip-roof porch extends the width of the facade; it is covered in asphalt shingles. The wood floor porch rests on concrete piers and is lined with four Doric columns, support posts, and a low balustrade. Small, exposed rafters line the porch roof's underside. On the porch's north side, a small concrete stairway leads to a screened door. Beyond the screen door, the facade's first-story, westernmost bay contains a fixed-light wood door as the building's main entrance. The first story's easternmost bay contains a six-over-one, double-hung, wood-framed, paired window. Above the porch, the facade's second story contains evenly spaced six-over-one, double-hung, wood-framed windows in each bay. A central, hip-roof, shingle-clad, single-light, dormer window is located on the facade's roof section. Small, exposed rafters line the roof's underside.

The building's northwest (side) elevation is comprised of four bays. The northernmost and southernmost bays are identical and contain six-over-one, double-hung, wood-framed windows on both their first and second stories. Between the two outside bays are two additional second story windows. The north-of-center window is of six-over-one, double-hung, wood-framed composition. The window located south-of-center window is comprised of a six-light, wood-framed, fixed sash.

The rear, southwest elevation contains a small, one-story addition constructed on a concrete foundation and topped with a shed roof. A small concrete stairway leads to a door on the addition. The elevation contains two second-story windows.

The building's southeast (side) elevation is comprised of two evenly spaced and identical bays. Each bay contains a single first story and second story six-over-one, double-hung, wood-framed window.

The building's hip roof is covered with composite material and metal. In the roof's center is an interior brick chimney.

The Dowell House #2 is set back from Church Street near the intersection with Main Street. Surrounding the building is a large stand of mature deciduous and evergreen trees and shrubs. The area surveyed for this assessment included 2.5 acres.

**Historic Context**

Established in 1654, Calvert County is bordered by the Chesapeake Bay to the east and the Patuxent River to the west and south. Today, the county encompasses 413 square miles of land. "A History of Calvert County" states that the county extended north and northwest of its present boundaries when established, including present-day Prince George's County in its entirety. In 1658, the Prince George's County region was separated from Calvert County.

Calvert County's early settlers recognized the region's suitability for growing tobacco and tobacco cultivation emerged as the county's driving economic force in the late seventeenth century. In turn, this impacted many aspects of life in Calvert County, including its social structure and physical development. Slaves worked on tobacco plantations and the crop became so integral to life in the county that residents used the plant's leaves for currency. Residential and agrarian growth initially occurred along the county's shorelines and riverbanks, and transportation centers for shipping tobacco via the region's waterways developed instead of roads. With little need for a central market, towns did not rapidly develop and growth within the county's central region. Poor roads, along with the county's location on the Calvert Peninsula, left Calvert County isolated for many years.

According to "The County Courthouses and Records of Maryland," the original county seat was likely itinerant, but a legislative report from March 23, 1697/98 first mentions a Calvert County courthouse. Calvert County established this first courthouse at Calvertown, located on the county's western side at Battle Creek, but many residents found this location inconvenient. After repeated complaints about the location and the courthouse's declining condition, the Assembly relocated the county seat. In 1722, an act establishing the county seat on a centrally located tract of unsettled land passed. This land, known as William's Old Field, was renamed Prince Fredericktown and later Prince Frederick for King George I's eldest son. (Within this historic context, the town will be referred to as Prince Frederick, its present name.) The Assembly did not appropriate sufficient funding to build the courthouse and jail until 1725, Prince Frederick's official year of establishment.

Early settlement patterns occurred along the water. However, prior to Prince Frederick's 1725 establishment, several Calvert County residents built homes in the central region and landowners established lots in this central region. William Kidd and John Critchard completed the first Prince Frederick courthouse and nearby jail in 1732. From this site, Prince Frederick's Main Street (present-day MD 765A) and downtown evolved. After Kidd and Critchard completed the courthouse and jail, local landowners

laid out plots of land for homes in Prince Frederick during the 1730s. Small wooden buildings were constructed around the courthouse over time. These buildings in town primarily housed various merchants and law offices. Due to tobacco's dominance and the region's plantation-based economy, Prince Frederick's early residents and those living in the county seat's vicinity lived on large tracts of farmland. Residents came to town to shop for supplies, socialize, or attend court.

According to "The County Courthouse and Records of Maryland," Prince Frederick's first courthouse burned during a fire in 1748. Calvert County built a second courthouse, a brick building likely the same size as the first, on the site that year. Census data indicates that 3,788 Caucasian residents lived in Calvert County in 1800, but information for Prince Frederick's total population is not available. British forces burned Prince Frederick's second courthouse, along with several homes in the town, during the War of 1812. Anticipating the British forces' arrival, officials and residents removed the county records prior to the fire. Thus, Calvert County's records dating to the Colonial era were saved. Maryland's General Assembly did not authorize funding to repair and rebuild Prince Frederick's courthouse until 1816 and Calvert County completed the town's third courthouse in 1819. During the period after the attack on Prince Frederick, a new law office opened in town.

Referenced in the newspaper article "From Humble Origins: The Birth of Prince Frederick and Calvert County," an 1824 survey maps shows Prince Frederick's location at the intersection of two roads. The map only identifies the courthouse and two buildings opposite it on Main Street (MD 765A) in the town's center. These two roads, like those throughout Calvert County, were unpaved. Prince Frederick did not benefit from hard surface roads until the early twentieth century. Prior to 1830, the town's first post office was constructed. An 1835 newspaper advertisement also mentions a large building's existence, operating as a tavern, and likely Prince Frederick's first hotel.

Though census data pertaining to Prince Frederick is not available for the 1840s, an 1840 Calvert County map indicates that 2,895 Caucasians, 1,474 free African Americans, and 4,170 slaves (9,229 residents total) lived in the county at that time. According to this data, between 1800 and 1840, the number of Caucasian citizens living in Calvert County declined. However, Prince Frederick's population was large enough for residents to justify building a church in town. Many residents disliked traveling south to Port Republic to attend church. On March 1, 1841, residents organized Prince Frederick's first congregation, St. Paul's Episcopal Church. Dr. James Duke oversaw construction the following year and builders completed the one-and-one-half story brick building in late 1842. St. Paul's Episcopal Church (CT-818) remains in its original location on present-day Church Street.

Prince Frederick experienced marginal growth during the following decades. An 1850 account specifically mentions the town's courthouse, St. Paul's Episcopal Church, an inn, lawyer's office, post office, and several homes. During the 1860s, the Civil War and slavery's end briefly interrupted Prince Frederick's economy and social order. Several plantations throughout the county were ceased to operate, but many freed slaves were employed as farm hands or tenant farmers after the war. Ultimately, the Civil War did not affect tobacco's standing as southern Maryland's primary cash crop and life in Prince Frederick and Calvert County returned to normal after the war. Farmers also continued growing wheat, another major cash crop, and orchards were common throughout the county.

Simultaneously, discussion and planning began in 1861 to develop a railroad connecting Baltimore with the harbor at Drum Point in southeastern Calvert County. The proposed Baltimore & Drum Point Railroad (CT-1295) would pass directly through Prince Frederick's town center. According to "Documentation of The Baltimore & Drum Point Railroad," the railroad's presence would have dramatically affected Prince Frederick's social and economic fabric in the late nineteenth and early twentieth century, a region long isolated by poor roads and bodies of water. An 1866 USGS map illustrates moderate growth since 1850; the map notes ten buildings in Prince Frederick's town center, including the courthouse.

In 1868, the Baltimore & Drum Point Railroad received its charter. Before the railroad's construction began, the majority of Prince

Frederick burned during a devastating, accidental fire in 1882. An incident account and record, noting buildings destroyed, reveals Prince Frederick's moderate development since 1866. According to "Minutes and Proceedings of the Orphans' Court of Calvert County, Maryland," Prince Frederick's "Methodist Episcopal Church and Parsonage, Courthouse, Shoe shop, Journal Office, a large store, property of J. W. Shemwell & Bro., a large and fine hotel, property of D.R. Magruder, a dwelling house occupied by Silas R. King, and the law offices of Joseph A. Wilson, John P. Briscoe, C.S. Parran, and John B. Gray" were destroyed during the fire. In total, fourteen of the town's eighteen buildings burned, along with deeds, wills, and court records. Sommerville Sollers, the county clerk, saved some documents. Two extant buildings, the St. Paul's Episcopal Church and a Dowell family home (CT-739), survived the fire. Calvert County established a temporary courthouse in St. Paul's unoccupied rectory. Several months later on June 27, 1882, the church's rectory burned in a fire, likely caused by foul play, and records burned. According to "A History of Calvert County, Maryland," Prince Frederick and Calvert County documents dated prior to 1882 do not exist.

Calvert County built Prince Frederick's fourth courthouse on the same site; the March 1882 fire did not damage the previous courthouse's brick frame. During rebuilding, the Hotel Calvert was also constructed on Main Street (MD 765A), opposite and east of the courthouse. The hotel replaced the Brentford House, Prince Frederick's inn before the fire. In 1891, after years of legal battles and funding issues, the railroad company abandoned the Baltimore & Drum Point Railroad project. Though laborers prepared 25 miles of railroad bed by 1891, tracks were never laid. Due to the great fire and the railroad project's stoppage, Prince Frederick never experienced rapid growth or expansion during the late nineteenth and early twentieth century.

The 1986 newspaper article, "Shades of Old Prince Frederick," explains that local residents founded a Prince Frederick Development Company in 1894, "for the creation and maintenance of reading and lecture rooms in Prince Frederick." The same year, the company constructed a two-story Town Hall building on the lot located directly southeast of the courthouse. The first known photograph from the period after Prince Frederick burned, taken southwest of the small town, shows the Town Hall, young trees and shrubs, and narrow dirt roads lined by split-rail fences. Clapboard-clad one and two-story buildings surround the courthouse, the largest and only brick building. Typical of late-nineteenth and early-twentieth century rural communities, there were a variety of I-house and gable-ell buildings. A turn-of-the-century account confirms that lawyers' offices, a local newspaper office, and a cobbler's shop occupied small buildings in Prince Frederick.

Calvert County's population rose from 9,229 in 1840 to 10,223 in 1900. Despite this marginal population growth, a 1901 map identifies several buildings along the road leading southwestward toward the Patuxent River (MD 231) from the town's center. The map also notes several buildings, likely residences, further south on Main Street (MD 765A) Prince Frederick expanded, albeit slowly, during the early twentieth century. The 1907 Maryland Geological Survey's Calvert County Survey indicates that Solomons was the county's largest town, not Prince Frederick; however, because it was the county seat, Prince Frederick continued to hold a prominent place within the county. Photographs from 1908 show that a one-story, gable-front building in Prince Frederick housed the county's first bank. A one-story, gable-front building also housed the town's school. In 1910, the town's name was officially changed from Prince Fredericktown to Prince Frederick. The county's population reached 10,325 in 1910.

During the 1910s, the Maryland State Roads Commission (SRC) sought to improve road conditions statewide, attempting to utilize modern methods and materials to improve transportation. Prior to 1911, the SRC began preparing the existing dirt road connecting Owings in Calvert County with Prince Frederick. Originally named MD 2 after the SRC improved it, the road between Owings and Prince Frederick was a portion of the 84-mile-long road that extended between Baltimore and Solomons Island in southern Calvert County. MD 2 passed through Prince Frederick as the town's Main Street, today MD 765A. Covered in gravel, the SRC completed MD 2 in 1915 and it was Prince Frederick's first hard-surface road and state road.

Built between 1914 and 1916, Calvert County constructed a new courthouse on Main Street on the same lot. This building's lawn is the site of the town's previous courthouses, but the 1916 building was set back from the street with a chain-link fence

encompassing the grounds. The two-story brick courthouse featured Neoclassical-style elements, including a prominent gable pediment supported by two-story columns. A photograph collection from 1917 offers additional information about the town's appearance from this time. Businesses and offices concentrated around the courthouse tended to flank Main Street directly, whereas the residences are set back from the street, having lots enclosed by picket or split-rail fences. A picket fence also enclosed the Hotel Calvert's lot.

One of Prince Frederick's most prominent citizens, the widely respected Louis Goldstein, was born in Calvert County in 1913. His father owned the Prince Frederick Department Store, later renamed Goldstein's Department Store, and he worked there as a boy, developing an affinity for dealing with both people and numbers. The younger Goldstein entered politics immediately after serving in the U.S. Marine Corps during World War II and completing law school, serving first in Maryland's General Assembly, and later as the state comptroller from 1959 until his death in 1998.

Prince Frederick gradually became more modernized during the 1920s and 30s, but Calvert County experienced little change in population. In 1920, the county's population was 9,744 and in 1930, the county's population declined to 9,528. During the 1920s, officials established the town's first volunteer fire department and high school. The two-story building constructed for the high school also housed Prince Frederick's elementary school in one of its rooms. Prince Frederick's high school later absorbed two other area high schools, becoming Calvert County High School. Due to segregation, African American students attended the Colored Industrial School, a Rosenwald school completed in 1921 and enlarged in 1924; the building is extant and is located on Armory Road.

Sanborn Fire Insurance Maps and city directories do not exist for Prince Frederick and the lack of courthouse records presents challenges to research. However, many local residents have provided important oral histories, recounting their memories of growing up in Prince Frederick. Local resident Arthur Wilson Dowell gave his personal account of the town in his book, "Growing Up in Prince Frederick During the 1920's & 30's." Dowell's book includes a sketch map showing a concentration of businesses surrounding the courthouse on Main Street (MD 765A). These businesses include various shops, lawyers' offices, doctors' offices, motor companies, the Calvert Journal newspaper office, a fire station, butcher, restaurant, library, bank, and hotels. Homes were primarily located north of the courthouse and business district, as well as further south on Main Street.

After the Eastern Shore Public Service Company ran a line from the Eastern Shore during the 1930s, the company introduced electricity to Prince Frederick for the first time. In 1939, the Southern Maryland Electric Cooperative began offering electricity service on a larger scale throughout Calvert County. According to the 1974 Baltimore Sun article "Prince Frederick Inevitably Will Be 'A Different Place,'" the town's population barely exceeded 300 during the 1930s and 40s. Local author and newspaperman Hulbert Footner said, "Calvert is the least populated, the least improved, the least opulent, and is generally termed the least progressive county in Maryland, but I like it," regarding the county in 1942. However, World War II ushered in major changes for Prince Frederick and Calvert County. Between 1941 and 1945, the U.S. Navy and the U.S. Marine Corps established several training and testing bases at Solomons Island in southern Calvert County, introducing an influx of people to the region and new jobs for local residents. Between 1940 and 1950, the county's population increased from 10,484 to 12,100, but Calvert County's farming industry also began to decline the late 1940s and 1950s, following a nationwide trend of increased white-collar and industrial jobs in the post-war economy.

In 1951, the SRC completed a bypass, diverting traffic around the center of Prince Frederick from Main Street (MD 765A). During the 1960s, the bypass and extant portions of MD 2 were transitioned into the MD 2-4 dual highway, introducing change and development to the town and county; commercial strip malls soon populated the area around downtown Prince Frederick. The four-lane highway carried traffic from Washington, DC, through Prince Frederick, to southern Calvert County. In the mid-1970s, Calvert Cliffs Nuclear Power Plant was established approximately sixteen miles south of Prince Frederick. Downtown Prince

Frederick's appearance also changed quite a bit during the same time period when the present-day Calvert County Services Building was constructed in 1974. Since then, other historic buildings on Main Street have been demolished; in most cases, new construction or parking lots now occupy these spaces. Other historic residential buildings have been altered, many for commercial uses.

**Foursquare Houses**

American Four-Square houses are two or two-and-a-half story houses with pyramidal or hip roofs. They are generally square in shape with four rooms on each story; floor plans are two rooms wide and two rooms deep. The American Four-Square form has its roots in pyramidal folk forms. Particularly in the Northeast and Midwest, two-story examples of the pyramidal form became popular replacements of the common I-house as cities expanded into the surrounding countryside. Known as an American Four-Square in urban centers, the house form was frequently used during the period of streetcar suburb development from 1890 until approximately 1930. During this time, free-standing houses, lawns, and residential neighborhoods were highly desired as Americans moved outside of densely populated city centers. Neighborhoods were constructed with blocks of detached houses on narrow lots along streetcar lines. The American Four-Square house form is generally symmetrical. Notably absent is a central hallway. On the exterior, full-width, one-story front porches and off-center entry doors are common. Hip roof dormers are also common. The Four-Square is usually associated with the Prairie, Colonial Revival, Neoclassical, and Craftsman styles and represents a simple housing form in reaction to the prior building period's opulent Victorian-era styles.

**Dowell House #2 History**

The Dowell House #2 was built on land purchased by William Wakefield Duke from the Dowells, a locally prominent family. Duke built his home there in 1930. He was a long-time employee of the Calvert Journal newspaper, working many jobs including printer and editor, before he purchased the paper. He is also remembered as being an interesting and cultured individual who painted, played the piano, and participated in theatrical productions. He was also instrumental in establishing the local library in Prince Frederick. He was married to Cassie Duke, a local schoolteacher.

**Significance Evaluation**

The Dowell House #2 was evaluated for listing in the National Register of Historic Places (NRHP) under Criteria A, B, and C using guidelines set forth in the NRHP Bulletin "How to Apply the National Register Criteria for Evaluation." It was previously identified during a Maryland Historical Trust survey in 1986.

The building is not eligible under Criterion A. Research has not shown the building to be associated with events or trends important in history. Therefore, the property is not eligible under Criterion A.

The building is not eligible under Criterion B. Research has not shown the building to be associated with people important in history; although William Duke was an interesting and well-regarded individual, he does not appear to have impacted local history. Therefore, the property is not eligible under Criterion B.

The building is not eligible under Criterion C. It is an undistinguished example of a Foursquare house, a common form. The building has been altered, most notably by the application of disparate siding and roofing, resulting in a loss of integrity of materials, workmanship, design, feeling, and association. Therefore, the building is not eligible under Criterion C.

The property was not evaluated under Criterion D for this assessment.

# 7. Description

Survey No. CT-822

<b>Condition</b>		<b>Check one</b>	<b>Check one</b>	
<input type="checkbox"/> excellent	<input type="checkbox"/> deteriorated	<input type="checkbox"/> unaltered	<input checked="" type="checkbox"/> original site	
<input type="checkbox"/> good	<input type="checkbox"/> ruins	<input checked="" type="checkbox"/> altered	<input type="checkbox"/> moved	date of move _____
<input checked="" type="checkbox"/> fair	<input type="checkbox"/> unexposed			

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

This shingle-style house faces northeast onto Maryland Route 765, but is accessible from a driveway off Maryland Route 231. The house is a two-story four-square. Its very high hipped roof has a short ridge that is parallel to the facade of the house. The first story of the house is framed and weatherboarded; the second story is framed and sheathed with wood shingles. The foundation is molded concrete. The roof is constructed with exposed rafter ends and is sheathed with decoratively molded sheet metal. A hipped dormer interrupts the front face of the roof. The facade is probably two bays wide, but the configuration is concealed by a one-story screened-in porch that is supported by Doric columns connected by rails and balusters.

# 8. Significance

Survey No. CT-822

Period	Areas of Significance—Check and justify below			
<input type="checkbox"/> prehistoric	<input type="checkbox"/> archeology-prehistoric	<input type="checkbox"/> community planning	<input type="checkbox"/> landscape architecture	<input type="checkbox"/> religion
<input type="checkbox"/> 1400–1499	<input type="checkbox"/> archeology-historic	<input type="checkbox"/> conservation	<input type="checkbox"/> law	<input type="checkbox"/> science
<input type="checkbox"/> 1500–1599	<input type="checkbox"/> agriculture	<input type="checkbox"/> economics	<input type="checkbox"/> literature	<input type="checkbox"/> sculpture
<input type="checkbox"/> 1600–1699	<input checked="" type="checkbox"/> architecture	<input type="checkbox"/> education	<input type="checkbox"/> military	<input type="checkbox"/> social/
<input type="checkbox"/> 1700–1799	<input type="checkbox"/> art	<input type="checkbox"/> engineering	<input type="checkbox"/> music	<input type="checkbox"/> humanitarian
<input type="checkbox"/> 1800–1899	<input type="checkbox"/> commerce	<input type="checkbox"/> exploration/settlement	<input type="checkbox"/> philosophy	<input type="checkbox"/> theater
<input checked="" type="checkbox"/> 1900–	<input type="checkbox"/> communications	<input type="checkbox"/> industry	<input type="checkbox"/> politics/government	<input type="checkbox"/> transportation
		<input type="checkbox"/> invention		<input type="checkbox"/> other (specify)

Specific dates	Builder/Architect
check: Applicable Criteria: <input type="checkbox"/> A <input type="checkbox"/> B <input type="checkbox"/> C <input type="checkbox"/> D and/or	
Applicable Exception: <input type="checkbox"/> A <input type="checkbox"/> B <input type="checkbox"/> C <input type="checkbox"/> D <input type="checkbox"/> E <input type="checkbox"/> F <input type="checkbox"/> G	
Level of Significance: <input type="checkbox"/> national <input type="checkbox"/> state <input type="checkbox"/> local	

Prepare both a summary paragraph of significance and a general statement of history and support.

Directed historical research would more firmly establish the historical significance of this site.
