Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

This early twentieth-century house faces southwest onto Maryland Route 765. Set on a molded concrete block foundation, the house is a two-story three-bay double-pile gable-roofed, framed and weatherboarded structure with a one-story shed-roofed porch supported on classical piers and partially screened in. The placement of the sidelighted doorway indicates that the house has a side-passage plan. All windows have six-over-six double-hung sash. There is an off-center interior brick chimney. The most distinctive feature of the house is a pair of gabled dormers, each with a pair of windows, that are set into the front face of the roof. The roof is covered with molded sheet metal. There is a one-story shed extension to the rear. Aluminum siding has recently been added.
