Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

This house faces east, away from Back Creek. Set on a concrete foundation, it is a two-story double-pile framed and asbestos shingled house with a three-bay asymmetrical facade and a gable roof. There are two exterior brick stove flues and the windows all have reused two-over-two double-hung sash. There is an added enclosed shed-roofed front porch and an original rear three-bay shed extension. There is no cornice; the rafter ends are exposed at the eaves.
