

CARR-1421

3114 Kump Station Road  
Taneytown (vicinity)

**Summary:**

The house at 3114 Kump Station Road is a central gable I-house, a type that became rather popular in Carroll County beginning in the 1880's in towns, and was built on farms mostly in the late 1890's and early twentieth century. The front door of this house is identical to the front door of the Sallie and Samuel Sterner house (CARR-1387), which was built c. 1898. The 1877 map does not show a building here, but suggests that the lot was part of a farm owned by Mrs. Myers. The house was standing by 1917, and was owned then by Russell Myers. Presumably, he inherited or purchased the farm from his mother and built a new house at that time, c. 189-1905, although further research is needed to verify this. The house probably had a front porch, originally. The summer kitchen most likely dates from the same time as the house.

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

## Contributing Resources: 2

The house at 3114 Kump Station Road is located on the north side of the road several hundred feet east of Stone Road, approximately 3½ miles northeast of Taneytown in northwest Carroll County, Maryland. The house faces southwest toward the road and is a 2½ story three-bay by two-bay central gable dormer structure with a rubble stone foundation, aluminum siding, and a gable roof with a northwest to southeast running ridge and asphalt shingles. The southwest elevation on the first story has a center entrance with a twelve-panel door. The panels are arranged with two tall panels on the bottom, a lying panel in the center, and nine panels at the top, the four corner panels being small and square and the center panel being large and roughly square. On each side of this center entrance is a 2/2 double hung sash. The second story has three 2/2 sash. The wall dormer has a lancet-shaped 1/1 sash. The northwest elevation has a new exterior brick chimney. The first story has two 2/2 sash, as does the second story. The gable end has two one-light sash. On the southeast elevation there is an interior brick chimney centered on the gable ridge. The first story has an enclosed porch set on stone piers. The second story has two 2/2 sash and the gable end has two one-light sash.

There is a summer kitchen approximately 30 feet southeast of the house. It has a rubble stone foundation, German siding with corner boards, and a gable roof of standing-seam metal with a northeast to southwest running ridge. It is a 1½ story structure that is two-bays by three bays. The northwest elevation has a beaded-edge vertical-board door with a six-light sash set into it in the west bay. The center bay has a 6/6 sash. there is a one-story shed-roof porch attached to the northwest elevation. The north bay of the porch is enclosed with German siding and this is probably an original treatment. The northwest elevation of this enclosure has a 6/6 sash while the southwest elevation has a six-panel door with the square panels set in the center. The southwest elevation of the summer kitchen has two 6/6 sash on the first story and one 6/6 sash centered in the gable end. There is an interior brick chimney on the northeast end. The southeast elevation has two 6/6 sash and appears to have a hurricane door leading to steps to the cellar.
