

Oil Storage House (Building 13), Henryton Sanatorium
CARR-1623
Carroll County
Marriottsville Vicinity
1940
Public

The Oil Storage House, Building 13, stands one-story in height and displays wood-frame construction. The building features aluminum siding and has a corrugated metal-clad shed-roof. There is a hinged wood door on the north side of the building.

Construction of the Oil Storage House probably occurred around 1940. Located adjacent to one of the Sanatorium's garages, the Oil Storage Building housed motor oil in 55 gallon drums according to a 1950s insurance survey.

Helping to describe the range of buildings present at the Henryton Sanatorium during the mid-twentieth century, the Oil Storage Building, Building 13, is a contributing element to the proposed Maryland Register eligible Henryton Sanatorium Historic District (CARR-1616). A minor subsidiary building within the complex, the Oil Storage Building does not appear to meet Maryland Register eligibility criteria as an individual resource.

Construction dates circa 1940

Evaluation for:
 National Register Maryland Register not evaluated

Prepare a one-paragraph summary statement of significance addressing applicable criteria, followed by a narrative discussion of the history of the resource and its context. (For compliance projects, complete evaluation on a DOE Form – see manual.)

Helping to describe the range of buildings present at the Henryton Sanatorium during the mid-twentieth century, the Oil Storage Building, Building 13, appears to constitute a contributing element to the proposed Maryland Register eligible Henryton Sanatorium Historic District (CARR-1616). A minor subsidiary building within the complex, the Oil Storage Building does not appear to meet Maryland Register eligibility criteria as an individual resource.

The building was constructed circa 1945 for the storage of motor oil. The oil was stored in 55 gallon drums, which were housed in this building. The building was constructed adjacent to a gasoline pump, which was situated over the Henryton Center's underground gasoline tank (Riggs-Warfield-Roloson 1953-59).

The Henryton Sanatorium was one of four state-operated tuberculosis sanatoria established during the early twentieth century that represented a significant part of Maryland's public health campaign to stop the spread of tuberculosis. The first state tuberculosis sanatorium was at Sabillasville, Frederick County, and opened in 1908. The other state sanatoria established after Sabillasville included Henryton (1923), Mount Wilson (1924), and the Eastern Shore Tuberculosis Sanatorium (1928). The Henryton Sanatorium was the first and only of the state sanatoria established for the treatment of African-American patients, whom statistical trends in Maryland show had a high mortality rate attributed to tuberculosis. The Oil Storage House represents part of the expansion of the Henryton Sanatorium during the 1940s.

10. Geographical Data

Acreage of surveyed property	<u>46</u>	
Acreage of historical setting	<u>105</u>	
Quadrangle name	<u>Sykesville Maryland</u>	Quadrangle scale: <u>1:24 000</u>

Verbal boundary description and justification

The Oil Storage House is located within the proposed boundaries for the Henryton Sanatorium Historic District. The proposed boundaries for the district include all of the historic Sanatorium parcel west of Henryton Road and north of the former B&O Railroad tracks. These boundaries encompass the Sanatorium's historic setting and landscape features, as well as all surviving resources related to the property's use as a tuberculosis facility. The district has been documented as MHT inventory number CARR-1616.
