FOR LIBRARY OF CONGRESS USE
4. NOTABLE FEATURES, HISTORICAL SIGNIFICANCE AND DESCRIPTION <span style="float: right;">OPEN TO PUBLIC <u>NO</u></span>  <p>Frisby's Prime Choice is an early nineteenth century house with hipped roof. It is five bays wide and three bays deep. It is "L" shaped. The main entrance has an elliptical headed arch of gauged brick. The door is flanked by fluted pilasters and side lights. There is a fanlight above. On the second floor above the entrance is a crude Palladian window with fluted pilasters which match those on the entrance. There is a molded brick cornice, but neither a belt course nor water-table. There are two 6/6 dormers in the tin roof which appear to be later additions. The lintels over the windows 6/6 are of wood and have corner blocks. There are panelled shutters on the first floor and louvered shutters on the second floor. There are flat brick arches above the windows on the east facade. The two story asbestos shingle wing to the north contains a kitchen.</p>
