In evaluating the C&D canal, the COE's consultant (CHRS) took a cursory look at the bridges which cross the canal. The Chesapeake City Bridge carries Rt. 213 over the canal. The original bridge, c.1927 was a vertical lift bridge. It was severely damaged in 1942 by a ship. The replacement bridge, completed in 1948, is the current single span tied arch bridge, designed by Parsons Brinckerhoff and Douglas. Since the bridge is not fifty years old and does not appear to possess exceptional significance, the Trust concurred that the bridge is not eligible. However, we did caution the COE that the bridge will most likely need to be re-evaluated in 1998 when it reaches the 50 year mark. However, I believe that the bridge is owned by SHA.
