National Register of Historic Places
Registration Form

Easement

This form is for use in nominating or requesting determinations for individual properties and districts. See instructions in *How to Complete the National Register of Historic Places Registration Form* (National Register Bulletin 16A). Complete each item by marking "x" in the appropriate box or by entering the information requested. If any item does not apply to the property being documented, enter "N/A" for "not applicable." For functions, architectural classification, materials, and areas of significance, enter only categories and subcategories from the instructions. Place additional entries and narrative items on continuation sheets (NPS Form 10-900a). Use a typewriter, word processor, or computer, to complete all items.

1. Name of Property

historic name Gilpin's Falls Covered Bridge

other names CE-78

2. Location

street & number MD Route 272 not for publication

city or town North East vicinity

state Maryland code MD county Cecil code 015 zip code 21901

3. State/Federal Agency Certification

As the designated authority under the National Historic Preservation Act of 1966, as amended, I hereby certify that this nomination request for determination of eligibility meets the documentation standards for registering properties in the National Register of Historic Places and meets the procedural and professional requirements set forth in 36 CFR Part 60. In my opinion, the property meets does not meet the National Register criteria. I recommend that this property be considered significant nationally statewide locally. (See continuation sheet for additional comments).

8. Statement of Significance

Applicable National Register Criteria

(Mark "x" in one or more boxes for the criteria qualifying the property for National Register listing)

- A** Property is associated with events that have made a significant contribution to the broad pattern of our history.
- B** Property associated with the lives of persons significant in our past.
- C** Property embodies the distinctive characteristics of a type, period, or method of construction or represents the work of a master, or possesses high artistic values, or represents a significant and distinguishable entity whose components lack individual distinction.
- D** Property has yielded, or is likely to yield, information important in prehistory or history.

Criteria Considerations

(Mark "x" in all the boxes that apply)

Property is:

- A** owned by a religious institution or used for religious purposes.
- B** removed from its original location.
- C** a birthplace or grave.
- D** a cemetery.
- E** a reconstructed building, object, or structure.
- F** a commemorative property.
- G** less than 50 years of age or achieved significance within the past 50 years.

Narrative Statement of Significance

(Explain the significance of the property on one or more continuation sheets)

Area of Significance

(Enter categories from instructions)

ENGINEERING

Period of Significance

1859-60

Significant Dates

Significant Person

(Complete if Criterion B is marked above)

Cultural Affiliation

Architect/Builder

George Johnson, Builder

Paperwork Reduction Statement: This information is being collected for applications to the National Register of Historic Places to nominate properties for listing or determine eligibility for listing, to list properties, and to amend existing listings. Response to this request is required to obtain a benefit in accordance with the National Historic Preservation Act, as amended (16 U.S.C. 470 et. seq.).

Estimated Burden Statement: Public reporting burden for this form is estimated to average 18.1 hours per response including the time for reviewing instructions, gathering and maintaining data, and completing and reviewing the form. Direct comments regarding this burden estimate or any aspect of this form to the Chief, Administrative Services Division, National Park Service, P.O. Box 37127, Washington, DC 20013-7127; and the Office of Management and Budget, Paperwork Reductions Project (1024-0018), Washington, DC 20503.

CE-78
Gilpin's Falls Covered Bridge
Name of Property

Section 7 Page 1

Cecil County, Maryland
County and State

Description Summary:

Gilpin's Falls Covered Bridge spans North East Creek near the village of Bay View in northern Cecil County, Maryland. It originally carried Nottingham Road, but was bypassed by the construction of Maryland Route 272 a short distance to the west (upstream). Constructed in 1859-60, it is a Burr arch through truss structure, measuring 119 feet overall.

General Description:

The Gilpin's Falls Bridge was built in 1859-60 by contractor George Johnson. It measures 119 feet in overall length, making it the longest surviving covered bridge in Maryland. The trusses consist of a series of twelve kingpost panels, with a pair of concentric timber arches fastened to the vertical members on both sides. The bridge rests on concrete abutments. The internal clear road width is 14 feet. Overhead clearance is approximately 13 feet. The bridge is capped with a gable roof covered in wood shingles; the exterior is clad in weatherboard siding which terminates below the eave line to allow light into the bridge. Horizontal window openings appear in both side walls, at mid-span.

Just below the bridge, North East Creek drops 106 feet over Gilpin's Falls, named for Samuel Gilpin, a distant relative of the Washington family, who acquired extensive land holdings in Cecil County in the early 1730s. Gilpin harnessed the Falls' power to operate a grist and saw mill; in later years, a woolen mill and hydroelectric plant occupied the site. A dam breast, sluice, and foundation walls survive from these enterprises, located a short distance below the bridge.

The Gilpin's Falls Covered Bridge was closed to vehicular traffic in the early 1930s. Roofing and siding were replaced in 1958-59 following storm damage. Ownership was transferred to The Board of County Commissioners of Cecil County from the Maryland State Highway Administration in 1987. An engineering study in 1997 revealed significant deflection and side sway and advanced deterioration and insect infestation of the timbers, and the bridge was subsequently closed to pedestrian use. A comprehensive restoration is currently (2008) planned, using \$1,040,000 in funds awarded under the Historic Covered Bridge Program of the Federal Highway Administration.

County and State

Summary Statement of Significance:

The Gilpin's Falls Covered Bridge is significant under Criterion C as an example of a Burr truss structure. It is one of only six covered bridges surviving in Maryland, and one of two located in Cecil County. At 119 feet in length, it is the longest remaining wooden covered bridge in Maryland.

Resource History and Historic Context:

The Gilpin's Falls Covered Bridge exemplifies the type of structure patented by Theodore Burr of Connecticut in 1817. In Burr's design, a series of king-post trusses was combined with a long wooden arch, a combination which resulted in a stronger bridge. Single king posts had been used since the Middle Ages for short crossings. Nineteenth-century bridge builders learned to combine a series of structural triangles into a unified span. In Burr's truss, the arch, upper chord, and the diagonals act under compression; the vertical members and lower chord act under tension. A gable roof and weatherboard siding protected the structural members from deterioration by exposure to weather.

The Gilpin's Falls bridge is one of one of six surviving covered bridges in Maryland, and one of two located in Cecil County. A ubiquitous form in the latter 19th century – some 50 covered bridges are said to have existed in Harford County alone – the covered timber bridge was quickly superseded by metal and, later, concrete structures which were invulnerable to rot, insects, and fire. Maryland's surviving covered bridges include four Burr-truss structures: Gilpin's Falls, Fair Hill (CE-238), Jerusalem/Jericho (1865, HA-438/BA-361, NR), and Utica (c. 1860, F-3-004, NR). The other two were constructed without Burr's reinforcing arch; Loys Station (c. 1865, F-6-003, NR) is a multiple king post truss, and Roddy Road (c. 1860, F-6-006, NR) is a shorter span with a single king-post truss. At 119 feet overall, the Gilpin's Falls bridge is the longest covered bridge in the state.

Description of Property and Eligibility Determination: *(Use continuation sheet if necessary and attach map and photo)*

Located approximately 1/2 mile northeast of Bay View, the Gilpin's Falls Covered Bridge is one of only six or seven wooden covered bridges left in Maryland. Constructed by George Johnson between 1859 and 1860, the bridge originally connected Old Nottingham Road and the town of North East in the second half of the 19th century. The original structural framework, which spans some 119 feet, is supported by Burr trusses. Framing members are mortised and tenoned and remain intact. The exterior of the shed is very plain, and is capped by a shallow gable roof. The board walls on each side of the structure terminate below the eave line, to light the interior through wide horizontal unsheathed wall areas. The bridge's interior roof, siding, and flooring were replaced during 1958-1959, after they were destroyed by a storm. The Gilpin's Falls Covered Bridge represents the only historic wooden bridge under State Highway Administration ownership in Cecil County, and is the only bridge of this structural type throughout the state road system. It was identified by the Maryland Historical Trust for the Maryland Department of Transportation in a jointly conducted survey which took place during 1980-81.

This is a long narrow covered bridge dated 1860. It reaches from shore to shore with a single span. The interior is constructed with huge arched spans of wood. The bridge has been well-restored and maintained by the State. An historical marker nearby dates the bridge and says that this spot on the stream has been the site of several mills, the earliest of them being Samuel Gilpin's flour mill in 1735.
